

Table of Contents

Conservation of Combinatorial Structures in Evolution Scenarios	1
<i>S��verine B��rard, Anne Bergeron, and Cedric Chauve</i>	
Toward a Phylogenetically Aware Algorithm for Fast DNA Similarity Search	15
<i>Jeremy Buhler and Rachel Nordgren</i>	
Multiple Genome Alignment by Clustering Pairwise Matches	30
<i>Jeong-Hyeon Choi, Kwangmin Choi, Hwan-Gue Cho, and Sun Kim</i>	
On the Structure of Reconciliations	42
<i>Pawe�� G��recki and Jerzy Tiuryn</i>	
The Statistical Significance of Max-Gap Clusters	55
<i>Rose Hoberman, David Sankoff, and Dannie Durand</i>	
Identifying Evolutionarily Conserved Segments Among Multiple Divergent and Rearranged Genomes	72
<i>Bob Mau, Aaron E. Darling, and Nicole T. Perna</i>	
Genome Rearrangement in Mitochondria and Its Computational Biology . .	85
<i>Istv��n Mikl��s and Jotun Hein</i>	
The Distribution of Inversion Lengths in Bacteria	97
<i>David Sankoff, Jean-Fran��ois Lefebvre, Elisabeth Tillier, Adrian Maler, and Nadia El-Mabrouk</i>	
Estimators of Translocations and Inversions in Comparative Maps	109
<i>David Sankoff and Matthew Mazowita</i>	
Databases for Comparative Analysis of Human-Mouse Orthologous Alternative Splicing	123
<i>Bahar Taneri, Alexey Novoradovsky, Ben Snyder, and Terry Gaasterland</i>	
Author Index	133

Comparative Genomics

RECOMB 2004 International Workshop, RCG 2004,
Bertinoro, Italy, October 16-19, 2004, Revised Selected
Papers

Lagergren, J. (Ed.)

2005, VIII, 134 p., Softcover

ISBN: 978-3-540-24455-4
