
Contents

Medical Bioinformatics: Detecting Molecular Diseases with Case-Based Reasoning <i>Ralf Hofestädt, Thoralf Töpel</i>	1
Prototype Based Recognition of Splice Sites <i>Barbara Hammer, Marc Strickert, Thomas Villmann</i>	25
Content Based Image Compression in Biomedical High-Throughput Screening Using Artificial Neural Networks <i>Udo Seiffert</i>	57
Discriminative Clustering of Yeast Stress Response <i>Samuel Kaski, Janne Nikkilä, Eerika Savia, Christophe Roos</i>	75
A Dynamic Model of Gene Regulatory Networks Based on Inertia Principle <i>Florence d'Alché-Buc, Pierre-Jean Lahaye, Bruno-Edouard Perrin, Liva Ralaivola, Todor Vujasinovic, Aurélien Mazurie, Samuele Bottani</i>	93
Class Prediction with Microarray Datasets <i>Simon Rogers, Richard D. Williams, Colin Campbell</i>	119
Random Voronoi Ensembles for Gene Selection in DNA Microarray Data <i>Francesco Masulli, Stefano Rovetta</i>	143
Cancer Classification with Microarray Data Using Support Vector Machines <i>Feng Chu, Lipo Wang</i>	167
Artificial Neural Networks for Reducing the Dimensionality of Gene Expression Data <i>Ajit Narayanan, Alan Cheung, Jonas Gamalielsson, Ed Keedwell, Christophe Vercellone</i>	191

Bioinformatics Using Computational Intelligence
Paradigms

Seiffert, U.; Schweizer, P. (Eds.)

2005, VII, 211 p., Hardcover

ISBN: 978-3-540-22901-8
