
Contents

1	Crisp matrix and bi-matrix games: some basic results	1
1.1	Introduction	1
1.2	Duality in linear programming	1
1.3	Two person zero-sum matrix games	3
1.4	Linear programming and matrix game equivalence	6
1.5	Two person non-zero sum (bi-matrix) games	11
1.6	Quadratic programming and bi-matrix game	13
1.7	Constrained matrix games	17
1.8	Conclusions	20
2	Fuzzy sets	21
2.1	Introduction	21
2.2	Basic definitions and set theoretic operations	21
2.3	α -Cuts and their properties	24
2.4	Convex fuzzy sets	26
2.5	Zadeh's extension principle	29
2.6	Fuzzy relations	30
2.7	Triangular norms (t -norms) and triangular conorms (t -conorms)	33
2.8	Conclusions	38
3	Fuzzy numbers and fuzzy arithmetic	39
3.1	Introduction	39
3.2	Interval arithmetic	39
3.3	Fuzzy numbers and their representation	42
3.4	Arithmetic of fuzzy numbers	44
3.5	Special types of fuzzy numbers and their arithmetic	46

3.6	Ranking of fuzzy numbers	53
3.7	Conclusions	56
4	Linear and quadratic programming under fuzzy environment	57
4.1	Introduction	57
4.2	Decision making under fuzzy environment and fuzzy linear programming	58
4.3	LPPs with fuzzy inequalities and crisp objective function	61
4.4	LPPs with crisp inequalities and fuzzy objective functions	64
4.5	LPPs with fuzzy inequalities and objective function	67
4.6	Quadratic programming under fuzzy environment	72
4.7	A two phase approach for solving fuzzy linear programming problems	78
4.8	Linear goal programming under fuzzy environment	83
4.9	Conclusions	94
5	Duality in linear and quadratic programming under fuzzy environment	95
5.1	Introduction	95
5.2	Duality in LP under fuzzy environment: Rödder-Zimmermann's model	95
5.3	A modified linear programming duality under fuzzy environment	101
5.4	Verdegay's dual for fuzzy linear programming	108
5.5	Duality for quadratic programming under fuzzy environment	112
5.6	Conclusions	116
6	Matrix games with fuzzy goals	117
6.1	Introduction	117
6.2	Matrix game with fuzzy goals: a generalized model	118
6.3	Matrix game with fuzzy goals: Nishizaki and Sakawa model	122
6.4	Special cases	126
6.5	Conclusions	131
7	Matrix games with fuzzy pay-offs	133
7.1	Introduction	133
7.2	Definitions and preliminaries	134

7.3	Duality in linear programming with fuzzy parameters . . .	135
7.4	Two person zero sum matrix games with fuzzy pay-offs: main results	140
7.5	Campos' model: some comments	144
7.6	Matrix games with fuzzy goals and fuzzy payoffs	150
7.7	Conclusion	155
8	More on matrix games with fuzzy pay-offs	157
8.1	Introduction	157
8.2	Definitions and preliminaries	157
8.3	A bi-matrix game approach: Maeda's model	159
8.4	A multiobjective programming approach: Li's model	165
8.5	Conclusions	174
9	Fuzzy Bi-Matrix Games	175
9.1	Introduction	175
9.2	Bi-matrix games with fuzzy goals: Nishizaki and Sakawa's model	175
9.3	Bi-matrix games with fuzzy goals: another approach . . .	180
9.4	Bi-matrix games with fuzzy pay-offs: a ranking function approach	185
9.5	Bi-matrix Game with Fuzzy Goals and Fuzzy Pay-offs . .	190
9.6	Bi-matrix game with fuzzy pay-offs: A possibility measure approach	193
9.7	Conclusions	198
10	Modality and other approaches for fuzzy linear programming	199
10.1	Introduction	199
10.2	Fuzzy measure	199
10.3	Fuzzy preference relations	204
10.4	Modality constrained programming problems	206
10.5	Valued relations and their fuzzy extensions	212
10.6	Fuzzy linear programming via fuzzy relations	215
10.7	Duality in fuzzy linear programming via fuzzy relations .	220
10.8	Duality in fuzzy LPPs with fuzzy coefficients: Wu's model	222
10.9	Conclusion	229
