|          |  |           |
|----------|--|-----------|
| <b>1</b> | <b>Two Methods for Analysis of Continuum Mechanics of Elastic Structures</b> | <b>1</b>  |
| 1.1      | Longitude Vibration of a Bar   | 1         |
| 1.1.1    | Formulation – By Equation of Motion  | 1         |
| 1.1.2    | Solutions  | 2         |
| 1.1.3    | An Example – A Fixed-Free Bar  | 3         |
| 1.1.4    | Orthogonality of Normal Functions – Clebsch’s Theorem [34]                   | 3         |
| 1.1.5    | Transient and Forced Vibrations  | 4         |
| 1.2      | Transverse Vibration of a Beam   | 5         |
| 1.2.1    | Formulation – By Energy Method – Hamilton’s Principle [23]                   | 5         |
| 1.2.2    | An Example – A Fixed-Free Beam   | 7         |
| <b>2</b> | <b>Vibrations of Inclined Bars with End Constraint</b>                       | <b>9</b>  |
| 2.1      | One-Dimensional Model of Inclined Members                                    | 9         |
| 2.2      | Formulation for Vibrations of Inclined Bars                                  | 10        |
| 2.3      | Normal Functions and Frequency Equations                                     | 12        |
| 2.3.1    | Inclined Bars with Hinged – “Hinged” Ends                                    | 12        |
| 2.3.2    | Inclined Bars with Bottom Hinged and Top “Clamped”                           | 15        |
| 2.3.3    | Inclined Bars with Bottom Clamped and Top “Hinged”                           | 16        |
| 2.3.4    | Inclined Bars with Bottom Clamped and Top Clamped in Rotation                | 17        |
| 2.4      | Orthogonality of the Normal Functions  | 19        |
| <b>3</b> | <b>Vibrations of Frames with Inclined Members</b>                            | <b>21</b> |
| 3.1      | Formulation  | 21        |
| 3.2      | Vibrations of Two-Bar Frames   | 23        |
| 3.2.1    | Frames with All Joints Hinged  | 24        |

|          |   |           |
|----------|---|-----------|
| 3.2.2    | Frames with Two Ends Fixed and Central Joint Hinged   | 27        |
| 3.2.3    | Frames with All Joints Rigidly Connected  | 28        |
| 3.2.4    | Frames with Two Ends Hinged<br>and Central Joint Rigidly Connected  | 30        |
| 3.3      | Vibrations of Three-Bar Frames  | 31        |
| 3.4      | Orthogonality of the Normal Functions   | 33        |
| <b>4</b> | <b>Vibrations of X-Braced Portal Frames</b>   | <b>35</b> |
| 4.1      | Free Vibration  | 35        |
| 4.2      | Forced Vibration  | 42        |
| <b>5</b> | <b>Vibrations of X-Braced Multi-Story Frames</b>  | <b>47</b> |
| 5.1      | Formulation   | 47        |
| 5.2      | Free Vibration  | 49        |
| 5.3      | Vibrations due to Horizontal Forces<br>and Ground Motion  | 49        |
| 5.4      | Numerical Examples  | 51        |
| 5.4.1    | Natural Frequencies of 2- to 5-Story Frames   | 51        |
| 5.4.2    | Modes of Free Vibrations of Two 3-Story Frames  | 55        |
| 5.4.3    | Forced Vibrations of a 3-Story Frame  | 56        |
| 5.4.4    | Response to Horizontal Ground Vibrations<br>for 3-, 4- and 5-Story Frames                                     | 57        |
| 5.4.5    | Comparison with a Rectangular Unbraced Frame  | 58        |
| 5.5      | Discussion  | 59        |
| <b>6</b> | <b>Effect of Rotatory Inertia and Shear Deformation<br/>on Vibration of Inclined Bars with End Constraint</b> | <b>63</b> |
| 6.1      | Formulation   | 63        |
| 6.2      | Solutions   | 65        |
| 6.2.1    | Inclined Bars with Hinged – “Hinged” Ends   | 66        |
| 6.2.2    | Inclined Bars with Bottom Hinged-Top “Clamped”  | 69        |
| 6.2.3    | Inclined Bars with Bottom Clamped-Top “Hinged”  | 70        |
| 6.2.4    | Inclined Bars with Bottom Clamped-Top Clamped<br>in Rotation  | 71        |
| <b>7</b> | <b>Out-of-Plane Vibrations of Plane Frames</b>  | <b>75</b> |
| 7.1      | Formulation   | 75        |
| 7.2      | Free Vibration  | 78        |
| 7.3      | Forced Vibration  | 80        |
| 7.4      | Numerical Examples  | 85        |
| 7.5      | Discussion  | 87        |

|           |   |     |
|-----------|---|-----|
| <b>8</b>  | <b>Buckling of Inclined Columns</b> .....   | 93  |
| 8.1       | Large Deflection Theory for Buckling of Inclined Columns ....                           | 94  |
| 8.2       | Solutions .....   | 97  |
| 8.2.1     | Inclined Columns with Two Ends Simply Supported ...                                     | 97  |
| 8.2.2     | Inclined Columns with Lower End Fixed<br>and Upper End “Hinged” .....                   | 101 |
| 8.2.3     | Inclined Columns with Lower End Hinged<br>and Upper End Fixed in Rotation .....         | 103 |
| 8.2.4     | Inclined Columns with Lower End Fixed<br>and Upper End Fixed in Rotation .....          | 103 |
| 8.3       | Eigenvalue Method .....   | 104 |
| 8.4       | Effect of Angle Change .....  | 108 |
| 8.5       | Comparison with Conventional Approach .....   | 109 |
| 8.5.1     | Mises Truss .....   | 110 |
| 8.5.2     | For an Inclined Column .....  | 111 |
| <b>9</b>  | <b>Inclined Girders with End Constraint Subjected<br/>to Normal Loads</b> .....         | 113 |
| 9.1       | Formulation and Solutions .....   | 115 |
| 9.2       | Effect of Angle Change .....  | 120 |
| 9.3       | Comparison of Beam-Column Solutions .....   | 124 |
| 9.3.1     | AISC Formula .....  | 124 |
| 9.3.2     | Cheong’s Beam-Column Formula .....  | 125 |
| <b>10</b> | <b>A Boundary-Layer Solution Verified by Buckling<br/>of a Rectangular Plate</b> .....  | 127 |
| 10.1      | Basic Equations for Buckling of a Plate<br>and Boundary-Layer Solution .....            | 127 |
| 10.2      | Comparison of Analytic Solutions<br>with Experimental Results .....                     | 130 |
| <b>11</b> | <b>Buckling of Conical Shells under a Single Axial Load</b> .....                       | 133 |
| 11.1      | Formulation of Large Deflection Theory for Buckling<br>of Conical Shells .....          | 133 |
| 11.2      | Membrane and Bending Solutions .....  | 136 |
| 11.3      | Deformation .....   | 138 |
| 11.4      | Effect of Angle Change .....  | 141 |
| 11.5      | Discussion of the Results .....   | 142 |
| <b>12</b> | <b>Conical Shells of Linearly Varying Thickness Subjected<br/>to Normal Loads</b> ..... | 145 |
| 12.1      | Basic and Characteristic Equations .....  | 145 |
| 12.2      | Asymptotic Solutions .....  | 151 |
| 12.3      | Particular Solutions due to Lateral Normal Loads .....                                  | 154 |

XII Contents

|   |            |
|---|------------|
| 12.4 An Example – A Semi-Circular Cone Subjected<br>to Normal Loads .....             | 156        |
| <b>13 Asymptotic Solutions of Conical Shells<br/>of Constant Thickness .....</b>      | <b>163</b> |
| 13.1 Basic Equations .....  | 163        |
| 13.2 Membrane Solutions .....   | 165        |
| 13.3 Solutions of Bending Effect .....  | 167        |
| 13.4 A Particular Solution .....  | 170        |
| 13.5 Numerical Examples .....   | 171        |
| 13.5.1 The Semi-Circular Cone Studied in Chap. 12 .....                               | 171        |
| 13.5.2 A Cantilever Complete Cone .....   | 171        |
| 13.6 Appendix .....   | 177        |
| <b>14 Membrane Vibrations of Conical Shells .....</b>                                 | <b>179</b> |
| 14.1 Basic Equations for Membrane Vibrations .....                                    | 179        |
| 14.2 Vibrations in the Meridional Direction .....                                     | 180        |
| 14.3 Solutions for Free Vibrations .....  | 181        |
| 14.4 Numerical Examples .....   | 183        |
| 14.4.1 Cones with the Small End Fixed (S-fixed)<br>and Large End Free (L-free) .....  | 183        |
| 14.4.2 Cones with the Small End Free, (S-free)<br>and Large End Fixed (L-fixed) ..... | 184        |
| 14.4.3 Cones with Both Ends Free (Free-free) .....                                    | 185        |
| 14.4.4 Cones with Both Ends Fixed (Fixed-fixed) .....                                 | 186        |
| 14.5 Forced and Transient Vibrations .....  | 186        |
| 14.6 Axisymmetric Torsional Vibrations .....  | 188        |
| 14.7 Solutions and Frequency Equations for Four Cases .....                           | 189        |
| <b>Appendix Elements of Matrix <math>[A_{ij}]</math> of (4.7) .....</b>               | <b>193</b> |
| <b>References .....</b>   | <b>197</b> |
| <b>Index .....</b>  | <b>201</b> |

Mechanics of Elastic Structures with Inclined Members  
Analysis of Vibration, Buckling and Bending of X-Braced  
Frames and Conical Shells

Chang, C.H.

2005, XII, 205 p., Hardcover

ISBN: 978-3-540-24384-7
