

# Contents

Preface .....	vii
Scientific Lectures given at the Sturm Colloquium .....	x
Introduction (David Pearson) .....	xiii
<i>Don Hinton</i>	
Sturm's 1836 Oscillation Results. Evolution of the Theory .....	1
<i>Barry Simon</i>	
Sturm Oscillation and Comparison Theorems .....	29
<i>W. Norrie Everitt</i>	
Charles Sturm and the Development of Sturm-Liouville Theory in the Years 1900 to 1950 .....	45
<i>Joachim Weidmann</i>	
Spectral Theory of Sturm-Liouville Operators. Approximation by Regular Problems .....	75
<i>Yoram Last</i>	
Spectral Theory of Sturm-Liouville Operators on Infinite Intervals: A Review of Recent Developments .....	99
<i>Daphne Gilbert</i>	
Asymptotic Methods in the Spectral Analysis of Sturm-Liouville Operators .....	121
<i>Christer Bennewitz and W. Norrie Everitt</i>	
The Titchmarsh-Weyl Eigenfunction Expansion Theorem for Sturm-Liouville Differential Equations .....	137
<i>Victor A. Galaktionov and Petra J. Harwin</i>	
Sturm's Theorems on Zero Sets in Nonlinear Parabolic Equations ....	173
<i>Chao-Nien Chen</i>	
A Survey of Nonlinear Sturm-Liouville Equations .....	201
<i>Rafael del Río</i>	
Boundary Conditions and Spectra of Sturm-Liouville Operators .....	217

*Mark M. Malamud*

Uniqueness of the Matrix Sturm-Liouville Equation given a Part of the Monodromy Matrix, and Borg Type Results .....	237
--	-----

*W. Norrie Everitt*

A Catalogue of Sturm-Liouville Differential Equations .....	271
---	-----

Index .....	333
-------------	-----

Sturm-Liouville Theory

Past and Present

Amrein, W.O.; Hinz, A.M.; Pearson, D.B. (Eds.)

2005, XX, 336 p., Hardcover

ISBN: 978-3-7643-7066-4

A product of Birkhäuser Basel
