

Table of Contents

Preface	VII
Acknowledgments	XI
Chapter 1 Introduction	1
1.1 The Object of Discussion	1
1.2 Environmental Demands and Constraints	2
1.3 Three Dominating Effects and the Necessities Implied	5
1.3.1 Dynamics	5
1.3.2 Precision	6
1.3.3 Complexity	6
1.3.4 Conclusion	8
1.4 Consequences for the Engineering Domain	8
1.5 Knowledge and Intelligence: Natural Solutions to a Well-Known Problem	9
1.6 The Objective	11
Chapter 2 Background	13
2.1 The Intellectual Capital Discussion	13
2.2 Information Management and IT Driven Developments	14
2.3 The Pragmatic Extension of Organizational Learning	15
2.4 KM Models – Approaches to a Holistic Knowledge Management	16
2.5 The Traditional Knowledge Management	18
2.6 New Scientific Approaches	19
2.7 Conclusion and Consequences	20
Chapter 3 The Approach	23
3.1 The Biological Comparison	23
3.2 The Scales of Learning	26
3.3 Systems Exposed to Evolution	29
3.4 Scaling and Its Consequences	31
3.5 Phenomenological Consequences	32
Chapter 4 Theory of Real Systems	35
4.1 Classic Systems	36
4.1.1 Structure	36
4.1.2 Interactions and Properties	38

4.1.3 The Process	39
4.1.4 The System – A Classic Definition	40
4.2 Real Systems	42
4.3 Fundamentals of Autopoietic Systems	45
4.4 The Microscopic-Macroscopic Dichotomy	46
4.5 Social Systems – Communication as a Structural Element	48
4.6 Cognition, Reflection and Memory	49
4.6.1 Cognition	50
4.6.2 Reflection	51
4.6.3 Memory	51
Chapter 5 Theory of System Knowledge	53
5.1 Intelligent Systems	53
5.2 Knowledge	57
5.3 Knowledge from a Microscopic Perspective	58
5.4 Knowledge from a Macroscopic Perspective	60
5.5 Declarative Processing	62
5.6 Macroscopic – Microscopic Integration	64
5.7 Summary	65
Chapter 6 The Intelligent Enterprise	67
6.1 Enterprise Behavior	67
6.2 Enterprise Intelligence	69
6.3 Enterprise Knowledge	72
6.4 Declarative Processing on Enterprise Level	76
6.5 General Implications and Organizational Consequences	78
6.5.1 The Role of the Employees	78
6.5.2 Evaluating Enterprise Intelligence	81
6.5.3 Intelligent Interactions, Knowledge Types and Rational Behavior ..	82
Chapter 7 Realizing Enterprise Intelligence	87
7.1 Objectives and General Implications	88
7.2 Communicating Capabilities	89
7.2.1 The Service Requests, Fact Sets and the Ontology	89
7.2.2 The PBB – Functional Description and Reasoning Engine	91
7.2.3 The Wrapping Information	96
7.2.4 The Implementation of PBBs	97
7.3 The Declarative Processing Environment	97
7.4 The Autopoietic Framework	101
7.4.1 The Evaluation Mechanisms	101
7.4.2 Refinement of the System’s Organization	105
7.4.3 Refinement of the System’s Structure	106
7.5 System Architecture	107
7.6 Characteristics of the Running System	109

Chapter 8 Conclusion111

List of Figures and Tables115
