## General part

<b>1</b>	<b>Architecture of the peripheral nerve</b> . . . . .	<b>3</b>
	P. YOUNG, M. BOENTERT	
	<b>Introduction</b> . . . . .	<b>3</b>
1.1	Cellular components of the PNS . . . . .	3
1.2	Architecture of the myelin compartment . .	5
1.2.1	The internode . . . . .	6
1.2.2	The node of Ranvier . . . . .	8
1.2.3	The paranodal region . . . . .	8
1.2.4	The juxtaparanodal region . . . . .	9
1.3	Unmyelinated nerve fibers . . . . .	9
	References . . . . .	10

## Approach to the patient with suspected hereditary neuropathy

<b>2</b>	<b>Clinical evaluation and differential diagnosis</b> . . . .	<b>15</b>
	R. KIEFER, E. B. RINGELSTEIN	
	<b>Introduction</b> . . . . .	<b>15</b>
2.1	General approach to the patient with peripheral neuropathy . . . . .	16
2.2	Specific features in the history of patients with hereditary neuropathies . . . . .	18
2.2.1	Chief complaint and functional deficits noted by the patient . . . . .	18
2.2.2	Onset and time course of disease . . . . .	20
2.2.3	Concomitant diseases . . . . .	21
2.2.4	Family history . . . . .	21
2.3	Specific features in the clinical examination of patients with suspected hereditary neuropathy . . . . .	22

2.3.1	Neurological examination .....	22
2.3.2	General examination .....	23
2.4	<b>Differential diagnosis in patients with suspected hereditary neuropathy ....</b>	24
2.4.1	Distal symmetric leg weakness with peroneal preponderance .....	24
2.4.2	Pes cavus and hammertoes .....	25
2.4.3	The HNPP phenotype .....	26
2.4.4	The HNA phenotype .....	26
2.4.5	Pain and the sensory abnormalities of HSAN .....	27
2.4.6	Nerve hypertrophy .....	27
	<b>References .....</b>	27
<b>3</b>	<b>Electrodiagnostic evaluation of hereditary polyneuropathies .....</b>	29
	M. MÜLLER	
3.1	<b>General considerations .....</b>	29
3.2	<b>Electrodiagnostic evaluation of hereditary polyneuropathies .....</b>	29
3.3	<b>Electrodiagnostic features and differential diagnosis of different forms of hereditary polyneuropathies .....</b>	32
3.3.1	Charcot-Marie-Tooth disease type 1 and 4 (CMT1/CMT4) .....	32
3.3.2	Charcot-Marie-Tooth disease type 2 (CMT2)	33
3.3.3	Dominant intermediate CMT (DI-CMT) ...	34
3.3.4	Charcot-Marie-Tooth disease X chromosomal (CMTX) .....	34
3.3.5	Déjerine-Sottas syndrome (DSS) .....	34
3.3.6	Congenital hypomyelination (CH) .....	35
3.3.7	Hereditary motor neuropathies (dHMN) ...	35
3.3.8	Hereditary sensory and autonomic neuro- pathies (HSAN)/hereditary sensory neuro- pathies (HSN) .....	35
3.3.9	Hereditary neuropathy with liability to pressure palsy (HNPP) .....	37
3.3.10	Hereditary neuralgic amyotrophy (HNA) ...	37
3.3.11	Giant axonal neuropathy (GAN) .....	38
	<b>References .....</b>	38

<b>4 Principles of pathology and nerve biopsy</b>	<b>41</b>
A. SCHENONE	
<b>Introduction</b>	<b>41</b>
<b>4.1 Charcot-Marie-Tooth disease type 1 (CMT1)</b>	<b>44</b>
4.1.1 Charcot-Marie-Tooth disease type 1A (CMT1A)	44
4.1.2 Charcot-Marie-Tooth disease type 1B (CMT1B)	46
4.1.3 Charcot-Marie-Tooth disease type 1C (CMT1C)	48
4.1.4 Charcot-Marie-Tooth disease type 1D (CMT1D)	48
4.1.5 Déjerine-Sottas syndrome (DSS)	48
4.1.6 Congenital hypomyelination (CH)	49
4.1.7 Hereditary neuropathy with liability to pressure palsy (HNPP)	50
<b>4.2 Charcot-Marie-Tooth disease type 4 (CMT4)</b>	<b>52</b>
4.2.1 Charcot-Marie-Tooth disease type 4A (CMT4A)	52
4.2.2 Charcot-Marie-Tooth disease type 4B1 and 4B2 (CMT4B1, CMT4B2)	53
4.2.3 Charcot-Marie-Tooth disease type 4C (CMT4C)	55
4.2.4 Charcot-Marie-Tooth disease type 4D (CMT4D)	55
4.2.5 Charcot-Marie-Tooth disease type 4E (CMT4E)	56
4.2.6 Charcot-Marie-Tooth disease type 4F (CMT4F)	56
<b>4.3 X-linked Charcot-Marie-Tooth disease (CMTX)</b>	<b>56</b>
<b>4.4 Charcot-Marie-Tooth disease type 2 (CMT2)</b>	<b>58</b>
<b>4.5 Hereditary sensory and autonomic neuropathies (HSAN)</b>	<b>59</b>
4.5.1 Hereditary sensory and autonomic neuropathy type 1 (HSAN1)	59
4.5.2 Hereditary sensory and autonomic neuropathy type 2 (HSAN2)	60
4.5.3 Hereditary sensory and autonomic neuropathy type 3 (HSAN3)	61

4.5.4 Hereditary sensory and autonomic neuropathy type 4 and 5 (HSAN4 and HSAN5) . . . . .	61
4.6 Hereditary motor neuropathies (HMN) . . .	62
4.7 Giant axonal neuropathy (GAN) . . . . .	62
4.8 Hereditary neuralgic amyotrophy (HNA) . .	63
References . . . . .	63

■ **Specific neuropathies, treatment and counseling**

<b>5 Overview of the classification and genetics of hereditary peripheral neuropathies and rare unclassified forms . . . . .</b>	<b>73</b>
G. KUHLENBÄUMER	
5.1 History . . . . .	73
5.2 Clinical and electrophysiological phenotype of hereditary motor and sensory neuropathies (HMSNs) . . . . .	74
5.3 Classification of hereditary neuropathies . .	75
5.3.1 The HMSN classification by Dyck, Chance, Lambert and Carney . . . . .	75
5.3.2 Classification of primary hereditary neuropathies according to clinical subgroups and genetic entities . . . . .	83
5.4 Rare forms of hereditary peripheral neuropathies which do not fit into the current classification schemes . . . . .	85
5.4.1 Giant axonal neuropathy – gigaxonin (GAN) (OMIM 256850) . . . . .	85
5.4.2 Agensis of the corpus callosum with peripheral neuropathy (ACCPN) or Anderman syndrome or hereditary motor and sensory neuropathy with agensis of the corpus callosum (HMSN/ACC) – solute carrier family 12 member 6 gene (SLC12A6 coding for the protein: KCC3) (OMIM 218000) . . . . .	86

5.4.3	Congenital hypomyelinating neuropathy, central dysmyelination and intestinal (pseudo) obstruction (Waardenburg-Hirschsprung disease) – SRY like box 10 transcription factor ( <i>SOX10</i> ) (OMIM 602229) ..	87
5.4.4	Hereditary peripheral neuropathy and deafness – gap junction protein 3 ( <i>GJB3</i> or <i>connexin31</i> ) .....	87
5.4.5	Minifascicular peripheral neuropathy, partial gonadal dysgenesis – desert hedgehog ( <i>DHH</i> ) (OMIM 607080) .....	88
	<b>References</b> .....	88
<b>6</b>	<b>Charcot-Marie-Tooth disease type 1 (CMT1) and hereditary neuropathy with liability to pressure palsy (HNPP) .....</b>	<b>92</b>
	E. NELIS, P. DE JONGHE, V. TIMMERMAN	
6.1	<b>Autosomal dominant CMT1 and HNPP</b> ...	92
6.1.1	Clinical features .....	92
6.1.2	Electrodiagnostic and laboratory features ..	94
6.1.3	Pathological features .....	95
6.1.4	Genetics and pathomechanism .....	96
6.2	<b>Autosomal recessive demyelinating CMT or CMT4</b> .....	103
6.2.1	Clinical features .....	103
6.2.2	Electrodiagnostic features .....	104
6.2.3	Pathological features .....	104
6.2.4	Genetics and pathomechanism .....	105
	<b>References</b> .....	109
<b>7</b>	<b>CMT2, dominant intermediate CMT and CMTX ....</b>	<b>121</b>
	M. C. HANNIBAL, P. F. CHANCE	
	<b>Introduction</b> .....	121
7.1	<b>Charcot-Marie-Tooth neuropathy type 2</b> ...	121
7.1.1	Autosomal dominant CMT2 .....	121
7.1.2	Autosomal recessive CMT2 .....	131
7.2	<b>DI-CMT: dominant intermediate Charcot-Marie-Tooth neuropathy</b> .....	133
7.2.1	DI-CMTA – chromosome 10q24.1-q25.1 (OMIM 606483 or CMTDIA) .....	133
7.2.2	DI-CMTB – chromosome 19p12-p13.2 (OMIM 606482 or CMTDIB) .....	134

7.2.3	DI-CMTC – chromosome 1p34-p35 (OMIM 608323, CMTDIC) . . . . .	134
7.2.4	DI-CMTD – myelin protein zero ( <i>MPZ</i> ) (OMIM 607791, CMTDID) . . . . .	135
7.2.5	DI-slowed nerve conduction velocities without Charcot-Marie-Tooth neuropathy – rho guanine nucleotide exchange factor 10 gene ( <i>ARHGEF10</i> ) (OMIM 608236, slowed nerve conduction velocities, autosomal dominant) . . . . .	135
7.2.6	HMSN-P – chromosome 3p14.1-q13 (OMIM 604484, HMSNO or Okinawa type) .	136
7.3	<b>CMTX: Charcot-Marie-Tooth neuropathy, X-linked types</b> . . . . .	136
7.3.1	CMTX1 – gap junction protein beta 1 gene ( <i>GJB1</i> , formerly connexin 32 ( <i>Cx32</i> )) (OMIM 302800) . . . . .	137
7.3.2	CMTX2 – chromosome Xp22.2 (OMIM 302801) . . . . .	138
7.3.3	CMTX3 – chromosome Xq26 (OMIM 302802) . . . . .	139
7.3.4	CMTX4 – chromosome Xq24-26.1 (OMIM 310490, Cowchock syndrome or neuropathy, axonal motor-sensory with deafness and mental retardation, NAMS) . . . . .	139
	<b>References</b> . . . . .	139
<b>8</b>	<b>Distal hereditary motor neuropathies (dHMN)</b> . . .	146
	F. STÖGBAUER, G. KUHLENBÄUMER	
	<b>Introduction</b> . . . . .	146
8.1	dHMN I – small heat shock protein 27 ( <i>HSP27</i> or <i>HSBP1</i> ) (OMIM 608634) . . . . .	148
8.2	dHMN II – small heat shock protein 22 ( <i>HSP22</i> or <i>HSBP8</i> ) (OMIM 158590) . . . . .	149
8.3	dHMN III – chromosomal location unknown . . . . .	150
8.4	dHMN IV – chromosome 11q13 (OMIM 607088) . . . . .	150
8.5	dHMN V a and b – Va: glycyl tRNA synthetase gene ( <i>GARS</i> ) (OMIM 600749) – Vb: Berardinelli Seip congenital muscular dystrophy gene ( <i>BSCL2</i> ) (OMIM 270685) . .	151
8.6	dHMN VI – immunoglobulin $\mu$ -binding protein 2 ( <i>IGHMBP2</i> ) (OMIM 604320) . . . .	152

8.7	dHMN VIIa – chromosome 2q14 (OMIM 158580) . . . . .	152
8.8	dHMN VIIb – dynactin (DCTN) (OMIM 607641) . . . . .	153
8.9	dHMN pyramidal/amyotrophic lateral sclerosis 4 (ALS4), senataxin (SETX) (OMIM 602433) . . . . .	153
8.10	dHMN Jerash type – chromosome 9p21.1-p12 (OMIM 605726) . . . . .	154
	References . . . . .	154
<b>9</b>	<b>Hereditary sensory and autonomic neuropathies (HSAN)</b> . . . . .	157
	P. DE JONGHE, G. KUHLENBÄUMER	
	<b>Introduction</b> . . . . .	157
9.1	<b>Assessment of HSANs with autonomic and neurophysiological examinations</b> . . . . .	160
9.1.1	Quantitative testing of thermal perception . . . . .	160
9.1.2	Histamine axonal flare test . . . . .	160
9.2	<b>Forms of HSAN</b> . . . . .	161
9.2.1	HSAN1/HSN I – serine palmitoyltransferase 1, long chain subunit 1 gene ( <i>SPTLC1</i> ) (OMIM 162400) . . . . .	161
9.2.2	HSAN2 – hereditary sensory neuropathy II gene ( <i>HSN2</i> ) (OMIM 201300) . . . . .	163
9.2.3	HSAN3 – (Syn: familial dysautonomia, Riley- Day syndrome) – inhibitor of kappa light polypeptide gene ( <i>IKBKAP</i> , protein IKAP) . . . . .	163
9.2.4	HSAN4 – neurotrophin receptor tyrosine kinase 1 gene ( <i>NTRK1</i> ) (OMIM 256800) . . . . .	165
9.2.5	HSAN5 – in some cases: nerve growth factor beta (NGFB), neurotrophin receptor tyrosine kinase 1 gene ( <i>NTRK1</i> ) (OMIM 256800) . . . . .	166
	References . . . . .	167
<b>10</b>	<b>Hereditary neuralgic amyotrophy (HNA)</b> . . . . .	170
	G. KUHLENBÄUMER	
10.1	<b>Clinical features</b> . . . . .	170
10.1.1	Classical remitting-relapsing HNA . . . . .	172
10.1.2	Chronic undulating HNA . . . . .	174
10.1.3	Sporadic brachial plexus neuropathy (sBPN) (also called idiopathic brachial plexus neuritis, Parsonage-Turner syndrome) . . . . .	174

10.2	Electrodiagnostic, laboratory and additional investigations .....	175
10.3	Pathologic features .....	175
10.4	Genetics and pathomechanism .....	176
	References .....	176
<b>11</b>	<b>Molecular genetic diagnosis of hereditary neuropathies .....</b>	<b>179</b>
	G. KUHLENBÄUMER	
11.1	Molecular genetic testing strategies .....	179
11.2	Molecular genetic tests .....	185
11.2.1	Methods for the detection of the chromosome CMT1A duplication/HNPP deletion ..	185
11.2.2	Mutation detection methods for other genetic defects causing hereditary neuropathies ...	189
	References .....	191
<b>12</b>	<b>Genetic counseling .....</b>	<b>193</b>
	M. HOELTZENBEIN	
	Introduction .....	193
12.1	Definition of genetic counseling and consequences .....	193
12.2	Course and general principles of genetic counseling .....	194
12.3	Diagnostic/molecular testing .....	195
12.3.1	Predictive testing of late-onset disorders ...	195
12.3.2	Prenatal testing .....	196
12.3.3	Preimplantation diagnostics .....	197
12.4	Special issues of genetic counseling .....	197
	References .....	197
<b>13</b>	<b>Medical treatment of hereditary neuropathies ...</b>	<b>199</b>
	P. YOUNG	
	Introduction .....	199
13.1	Causative therapy .....	200
13.1.1	Genetic treatment .....	200
13.1.2	Prevention of axonal degeneration .....	201
13.2	Symptomatic therapy .....	203
13.2.1	Neuropathic pain .....	203
13.2.2	Autonomic dysfunction .....	203

13.2.3 Surgery of foot deformities . . . . .	203
References . . . . .	204
<b>14 Orthopedic aspects in diagnosis, clinical management and therapy of CMT patients . . . . .</b>	<b>206</b>
R. FORST, A. INGENHORST	
Introduction . . . . .	206
14.1 Upper extremities . . . . .	207
14.2 Spine . . . . .	209
14.3 Hip joint . . . . .	209
14.4 Knee joint . . . . .	210
14.5 Ankle joint and foot . . . . .	210
14.5.1 Clinical basics . . . . .	210
14.5.2 Pathogenesis of the deformities . . . . .	211
14.5.3 Special diagnostic tests . . . . .	213
14.5.4 Therapy . . . . .	215
14.6 Fractures . . . . .	223
References . . . . .	223
<b>15 Animal models of hereditary neuropathies . . . . .</b>	<b>227</b>
P. YOUNG, U. SUETER	
Introduction . . . . .	227
15.1 Models for demyelinating CMT1A: peripheral myelin protein 22 (pmp22) . . . . .	227
15.1.1 <i>pmp22</i> transgenic rats . . . . .	227
15.1.2 <i>pmp22</i> transgenic mice . . . . .	228
15.1.3 Inducible <i>pmp22</i> transgenic mice . . . . .	228
15.1.4 <i>pmp22</i> knockout mice . . . . .	229
15.1.5 Mice carrying point mutations in <i>pmp22</i> : trembler, trembler J, Tr-m1H, Tr-m2H . . . . .	229
15.2 Models for demyelinating CMT1B: myelin protein zero ( <i>mpz</i> ) knockout mice . . . . .	231
15.3 Models for demyelinating and axonal CMTX: gap-junction-protein beta 1 ( <i>gjb1</i> ) knockout mice . . . . .	232
15.4 Model for demyelinating CMT4F: periaxin ( <i>prx</i> ) knockout mice . . . . .	232
15.5 Model for axonal CMT2A2: kinesin motor protein 1 beta ( <i>kif1b</i> ) knockout mice . . . . .	233
15.6 Model for axonal CMT2E: neurofilament light chain ( <i>nefl</i> ) knockout mice . . . . .	233

15.7	Model for recessive CMT4C1: lamin A/C ( <i>Imna</i> ) knockout mice .....	233
15.8	Conclusions .....	234
	References .....	234
<b>Appendix: genetic testing laboratories and support groups .....</b>		<b>237</b>
