

Contents

Part I Introduction

1 The Context of Bénard Scientific Work and Nonlinear Science	
<i>I. Mutabazi, J.E. Wesfreid, and E. Guyon</i>	3
2 Scientific Biography of Henri Bénard (1874–1939)	
<i>J.E. Wesfreid</i>	9

Part II Bénard Cellular Structures

3 Rayleigh–Bénard Convection: Thirty Years of Experimental, Theoretical, and Modeling Work	
<i>P. Manneville</i>	41
4 Experiments with Rayleigh–Bénard Convection	
<i>G. Ahlers</i>	67
5 Rayleigh–Bénard Convection as a Model of a Nonlinear System: A Personal View	
<i>Y. Pomeau</i>	95
6 Bénard Convection and Geophysical Applications	
<i>F.H. Busse</i>	103

Part III Bénard–Marangoni Cellular Structures

7 Bénard Layers, Overstability, and Waves	
<i>M.G. Velarde</i>	129
8 Hydrothermal Waves in a Disk of Fluid	
<i>N. Garnier, A. Chiffaudel, F. Daviaud</i>	147
9 Secondary Instabilities in Surface-Tension-Driven Bénard–Marangoni Convection	
<i>K. Eckert and A. Thess</i>	163

Part IV Bénard and Wakes

10 Wake Instabilities Behind Bluff Bodies

M. Provansal 179

11 Spatial Inhomogeneities of Hydrodynamic Instabilities

S. Goujon-Durand and J.E. Wesfreid 203

Part V Extension of Bénard's Work

12 Patterns and Chaotic Dynamics in Faraday Surface Waves

J.P. Gollub 213

**13 The Taylor–Couette Flow: The Hydrodynamic Twin of
Rayleigh–Bénard Convection**

A. Prigent, B. Dubrulle, O. Dauchot, and I. Mutabazi 225

Index 243

Dynamics of Spatio-Temporal Cellular Structures

Henri Bénard Centenary Review

Mutabazi, I.; Wesfreid, J.E.; Guyon, E. (Eds.)

2006, X, 249 p., Hardcover

ISBN: 978-0-387-40098-3
