## Contents

<b>Preface</b> .....	VII
<b>1 Introduction</b> .....	1
<b>2 Deterministic and Stochastic Differential Games</b> .....	7
2.1 Dynamic Optimization Techniques .....	7
2.1.1 Dynamic Programming .....	8
2.1.2 Optimal Control .....	12
2.1.3 Stochastic Control .....	16
2.2 Differential Games and their Solution Concepts .....	22
2.2.1 Open-loop Nash Equilibria .....	24
2.2.2 Closed-loop Nash Equilibria .....	25
2.2.3 Feedback Nash Equilibria .....	27
2.3 Application of Differential Games in Economics .....	29
2.3.1 Open-loop Solution in Competitive Advertising .....	29
2.3.2 Feedback Solution in Competitive Advertising .....	31
2.4 Infinite-Horizon Differential Games .....	32
2.4.1 Game Equilibrium Solutions .....	33
2.4.2 Infinite-Horizon Duopolistic Competition .....	36
2.5 Stochastic Differential Games and their Solutions .....	38
2.6 An Application of Stochastic Differential Games in Resource Extraction .....	39
2.7 Infinite-Horizon Stochastic Differential Games .....	43
2.8 Problems .....	47
<b>3 Cooperative Differential Games in Characteristic     Function Form</b> .....	51
3.1 Cooperative Differential Games in Characteristic Function Form .....	51
3.1.1 Game Formulation .....	51

3.1.2	Solution Imputation .....	53
3.2	Imputation in a Dynamic Context .....	55
3.3	Principle of Dynamic Stability .....	57
3.4	Dynamic Stable Solutions .....	58
3.5	Payoff Distribution Procedure .....	59
3.6	An Analysis in Pollution Control .....	62
3.6.1	Decomposition Over Time of the Shapley Value .....	63
3.6.2	A Solution Algorithm .....	64
3.6.3	Rationale for the Algorithm and the Special Characteristic Function .....	67
3.7	Illustration with Specific Functional Forms .....	69
3.8	Problems .....	72
<b>4</b>	<b>Two-person Cooperative Differential Games with Discounting</b> .....	<b>75</b>
4.1	Game Formulation and Noncooperative Outcome .....	75
4.2	Cooperative Arrangement .....	79
4.2.1	Group Rationality and Optimal Trajectory .....	80
4.2.2	Individual Rationality .....	85
4.3	Dynamically Stable Cooperation and the Notion of Time Consistency .....	86
4.4	Equilibrating Transitory Compensation .....	88
4.4.1	Time Consistent Payoff Distribution Procedures .....	88
4.4.2	Time Consistent Solutions under Specific Optimality Principles .....	90
4.5	An Illustration in Cooperative Resource Extraction .....	91
4.6	An Economic Exegesis of Transitory Compensations .....	93
4.7	Infinite-Horizon Cooperative Differential Games .....	94
4.8	Games with Nontransferable Payoffs .....	101
4.8.1	Pareto Optimal Trajectories under Cooperation .....	102
4.8.2	Individual Player's Payoffs under Cooperation .....	104
4.8.3	Time Consistent Solutions .....	106
4.8.4	An Illustration .....	108
4.8.5	A Proposed Solution .....	113
4.9	Appendix to Chapter 4 .....	117
4.10	Problems .....	118
<b>5</b>	<b>Two-person Cooperative Stochastic Differential Games</b> ....	<b>121</b>
5.1	Game Formulation and Noncooperative Outcome .....	121
5.2	Cooperative Arrangement under Uncertainty .....	126
5.2.1	Group Rationality and Optimal Trajectory .....	126
5.2.2	Individual Rationality .....	132
5.3	Dynamically Stable Cooperation and the Notion of Subgame Consistency .....	132
5.4	Transitory Compensation and Payoff Distribution Procedures .	135

5.5	Subgame Consistent Solutions under Specific Optimality Principles .....	137
5.5.1	The Nash Bargaining/Shapley Value Solution .....	137
5.5.2	Proportional Distributions .....	139
5.6	An Application in Cooperative Resource Extraction under Uncertainty .....	141
5.7	An Exegesis of Transitory Compensation under Uncertainty ..	142
5.8	Infinite-Horizon Cooperative Stochastic Differential Games ...	144
5.9	Appendix to Chapter 5 .....	153
5.10	Problems .....	154
<b>6</b>	<b>Multiplayer Cooperative Stochastic Differential Games ....</b>	<b>157</b>
6.1	A Class of Multiplayer Games in Cooperative Technology Development .....	157
6.2	Theoretical Underpinning in a Deterministic Framework .....	158
6.2.1	A Dynamic Model of Joint Venture .....	158
6.2.2	Coalition Payoffs .....	159
6.2.3	The Dynamic Shapley Value Imputation .....	161
6.2.4	Transitory Compensation .....	163
6.3	An Application in Joint Venture .....	166
6.4	The Stochastic Version .....	173
6.4.1	Expected Coalition Payoffs .....	173
6.4.2	Stochastic Dynamic Shapley Value .....	175
6.4.3	Transitory Compensation .....	176
6.5	An Application in Cooperative R&D under Uncertainty .....	181
6.6	Infinite-Horizon Analysis .....	187
6.7	An Example of Infinite-Horizon Joint Venture .....	190
6.8	Problems .....	195
<b>7</b>	<b>Cooperative Stochastic Differential Games with Nontransferable Payoffs .....</b>	<b>199</b>
7.1	Game Formulation and Noncooperative Outcome .....	199
7.2	Cooperative Arrangement under Uncertainty and Nontransferable Payoffs .....	202
7.2.1	Pareto Optimal Trajectories .....	203
7.3	Individual Player's Payoffs under Cooperation .....	207
7.4	Subgame Consistent Solutions .....	213
7.5	A Proposed Solution .....	215
7.5.1	Typical Configurations of $S_t$ .....	216
7.5.2	A Subgame Consistent Solution .....	217
7.5.3	Numerical Illustrations .....	218
7.6	Infinite-Horizon Problems .....	220
7.6.1	Noncooperative Equilibria and Pareto Optimal Trajectories .....	220

XII     Contents

7.6.2	Individual Expected Payoffs .....	225
7.6.3	Subgame Consistent Solutions .....	228
7.7	An Infinite-Horizon Application .....	230
7.8	Appendix to Chapter 7.....	231
7.9	Problems .....	233
<b>References</b> .....		235
<b>Index</b> .....		241

Cooperative Stochastic Differential Games

Yeung, D.W.K.; Petrosjan, L.A.

2006, XIII, 242 p., Hardcover

ISBN: 978-0-387-27620-5
