## Contents

<b>1</b>	<b>Bases and Basic Sequences</b> .....	1
1.1	Schauder bases .....	1
1.2	Examples: Fourier series .....	6
1.3	Equivalence of bases and basic sequences .....	10
1.4	Bases and basic sequences: discussion .....	15
1.5	Constructing basic sequences .....	19
1.6	The Eberlein-Šmulian Theorem .....	23
	Problems .....	25
<b>2</b>	<b>The Classical Sequence Spaces</b> .....	29
2.1	The isomorphic structure of the $\ell_p$ -spaces and $c_0$ .....	29
2.2	Complemented subspaces of $\ell_p$ ( $1 \leq p < \infty$ ) and $c_0$ .....	33
2.3	The space $\ell_1$ .....	36
2.4	Convergence of series .....	38
2.5	Complementability of $c_0$ .....	44
	Problems .....	48
<b>3</b>	<b>Special Types of Bases</b> .....	51
3.1	Unconditional bases .....	51
3.2	Boundedly-complete and shrinking bases .....	53
3.3	Nonreflexive spaces with unconditional bases .....	59
3.4	The James space $\mathcal{J}$ .....	62
3.5	A litmus test for unconditional bases .....	66
	Problems .....	69
<b>4</b>	<b>Banach Spaces of Continuous Functions</b> .....	73
4.1	Basic properties .....	73
4.2	A characterization of real $\mathcal{C}(K)$ -spaces .....	75
4.3	Isometrically injective spaces .....	79
4.4	Spaces of continuous functions on uncountable compact metric spaces .....	87

4.5	Spaces of continuous functions on countable compact metric spaces.....	95
	Problems .....	98
<b>5</b>	<b><math>L_1(\mu)</math>-Spaces and <math>\mathcal{C}(K)</math>-Spaces.....</b>	<b>101</b>
5.1	General remarks about $L_1(\mu)$ -spaces .....	101
5.2	Weakly compact subsets of $L_1(\mu)$ .....	103
5.3	Weak compactness in $\mathcal{M}(K)$ .....	112
5.4	The Dunford-Pettis property .....	115
5.5	Weakly compact operators on $\mathcal{C}(K)$ -spaces.....	118
5.6	Subspaces of $L_1(\mu)$ -spaces and $\mathcal{C}(K)$ -spaces .....	120
	Problems .....	122
<b>6</b>	<b>The <math>L_p</math>-Spaces for <math>1 \leq p &lt; \infty</math> .....</b>	<b>125</b>
6.1	Conditional expectations and the Haar basis .....	125
6.2	Averaging in Banach spaces.....	131
6.3	Properties of $L_1$ .....	142
6.4	Subspaces of $L_p$ .....	148
	Problems .....	161
<b>7</b>	<b>Factorization Theory .....</b>	<b>165</b>
7.1	Maurey-Nikishin factorization theorems .....	165
7.2	Subspaces of $L_p$ for $1 \leq p < 2$ .....	173
7.3	Factoring through Hilbert spaces .....	180
7.4	The Kwapien-Maurey theorems for type-2 spaces .....	187
	Problems .....	191
<b>8</b>	<b>Absolutely Summing Operators.....</b>	<b>195</b>
8.1	Grothendieck's Inequality.....	196
8.2	Absolutely summing operators .....	205
8.3	Absolutely summing operators on $L_1(\mu)$ -spaces.....	213
	Problems .....	217
<b>9</b>	<b>Perfectly Homogeneous Bases and Their Applications .....</b>	<b>221</b>
9.1	Perfectly homogeneous bases .....	221
9.2	Symmetric bases .....	227
9.3	Uniqueness of unconditional basis .....	229
9.4	Complementation of block basic sequences .....	231
9.5	The existence of conditional bases .....	235
9.6	Greedy bases .....	240
	Problems .....	244

<b>10</b>	<b><math>\ell_p</math>-Subspaces of Banach Spaces</b>	247
10.1	Ramsey theory	247
10.2	Rosenthal's $\ell_1$ theorem	251
10.3	Tsirelson space	254
	Problems	259
<b>11</b>	<b>Finite Representability of <math>\ell_p</math>-Spaces</b>	263
11.1	Finite representability	263
11.2	The Principle of Local Reflexivity	272
11.3	Krivine's theorem	275
	Problems	285
<b>12</b>	<b>An Introduction to Local Theory</b>	289
12.1	The John ellipsoid	289
12.2	The concentration of measure phenomenon	293
12.3	Dvoretzky's theorem	296
12.4	The complemented subspace problem	301
	Problems	306
<b>13</b>	<b>Important Examples of Banach Spaces</b>	309
13.1	A generalization of the James space	309
13.2	Constructing Banach spaces via trees	314
13.3	Pełczyński's universal basis space	316
13.4	The James tree space	317
<b>A</b>	<b>Fundamental Notions</b>	327
<b>B</b>	<b>Elementary Hilbert Space Theory</b>	331
<b>C</b>	<b>Main Features of Finite-Dimensional Spaces</b>	335
<b>D</b>	<b>Cornerstone Theorems of Functional Analysis</b>	337
D.1	The Hahn-Banach Theorem	337
D.2	Baire's Theorem and its consequences	338
<b>E</b>	<b>Convex Sets and Extreme Points</b>	341
<b>F</b>	<b>The Weak Topologies</b>	343
<b>G</b>	<b>Weak Compactness of Sets and Operators</b>	347
	List of Symbols	349
	References	353
	Index	365
