## Contents

<b>Multiscale Optimization in VLSI Physical Design Automation</b> <i>Tony F. Chan, Jason Cong, Joseph R. Shinnerl, Kenton Sze, Min Xie, Yan Zhang</i> .....	1
<b>A Distributed Method for Solving Semidefinite Programs Arising from Ad Hoc Wireless Sensor Network Localization</b> <i>Pratik Biswas, Yinyu Ye</i> .....	69
<b>Optimization Algorithms for Sparse Representations and Applications</b> <i>Pando G. Georgiev, Fabian Theis, Andrzej Cichocki</i> .....	85
<b>A Unified Framework for Modeling and Solving Combinatorial Optimization Problems: A Tutorial</b> <i>Gary A. Kochenberger, Fred Glover</i> .....	101
<b>Global Convergence of a Non-monotone Trust-Region Filter Algorithm for Nonlinear Programming</b> <i>Nicholas I. M. Gould, Philippe L. Toint</i> .....	125
<b>Factors Affecting the Performance of Optimization-based Multigrid Methods</b> <i>Robert Michael Lewis, Stephen G. Nash</i> .....	151
<b>A Local Relaxation Method for Nonlinear Facility Location Problems</b> <i>Walter Murray, Uday V. Shanbhag</i> .....	173
<b>Fluence Map Optimization in IMRT Cancer Treatment Planning and A Geometric Approach</b> <i>Yin Zhang, Michael Merritt</i> .....	205

<b>Panoramic Image Processing using Non-Commutative Harmonic Analysis Part I: Investigation</b> <i>Amal Aafif, Robert Boyer</i> .....	229
<b>Generating Geometric Models through Self-Organizing Maps</b> <i>Jung-ha An, Yunmei Chen, Myron N. Chang, David Wilson, Edward Geiser</i> .....	241
<b>Self-similar Solution of Unsteady Mixed Convection Flow on a Rotating Cone in a Rotating Fluid</b> <i>Devarapu Anilkumar, Satyajit Roy</i> .....	251
<b>Homogenization of a Nonlinear Elliptic Boundary Value Problem Modelling Galvanic Interactions on a Heterogeneous Surface</b> <i>Y.S. Bhat</i> .....	263
<b>A Simple Mathematical Approach for Determining Intersection of Quadratic Surfaces</b> <i>Ken Chan</i> .....	271
<b>Applications of Shape-Distance Metric to Clustering Shape-Databases</b> <i>Shantanu H. Joshi, Anuj Srivastava</i> .....	299
<b>Accurately Computing the Shape of Sandpiles</b> <i>Christopher M. Kuster, Pierre A. Gremaud</i> .....	305
<b>Shape Optimization of Transfer Functions</b> <i>Jiawang Nie, James W. Demmel</i> .....	313
<b>Achieving Wide Field of View Using Double-Mirror Catadioptric Sensors</b> <i>Ronald Perline, Emek Köse</i> .....	327
<b>Darcy Flow, Multigrid, and Upscaling</b> <i>James M. Rath</i> .....	337
<b>Iterated Adaptive Regularization for the Operator Equations of the First Kind</b> <i>Yanfei Wang, Qinghua Ma</i> .....	367
<b>Recover Multi-tensor Structure from HARD MRI Under Bi-Gaussian Assumption</b> <i>Qingguo Zeng, Yunmei Chen, Weihong Guo, Yijun Liu</i> .....	379
<b>PACBB: A Projected Adaptive Cyclic Barzilai-Borwein Method for Box Constrained Optimization</b> <i>Hongchao Zhang, William W. Hager</i> .....	387

<b>Nonrigid Correspondence and Classification of Curves Based on More Desirable Properties</b>	
<i>Xiqiang Zheng, Yunmei Chen, David Groisser, David Wilson . . . . .</i>	393

Multiscale Optimization Methods and Applications

Hager, W.W.; Huang, S.-J.; Pardalos, P.; Prokopyev, O.A.  
(Eds.)

2006, XVII, 407 p., Hardcover

ISBN: 978-0-387-29549-7
