1 An Overview of Digital Communications Techniques Using Chaos and Nonlinear Dynamics

<i>Lawrence E. Larson, Lev S. Tsimring, Henry D. I. Abarbanel, Jia-Ming Liu, Kung Yao, Alexander R. Volkovskii, Nikolai F. Rulkov, Mikhail M. Sushchik</i>	1
1.1 Introduction	1
1.2 Wireless Communications Based on Nonlinear Dynamics and Chaos	3
1.3 Optical Communications Based on Nonlinear Dynamics	15
1.4 Conclusions	23
References	25

2 Digital Communication Using Self-Synchronizing Chaotic Pulse Position Modulation

<i>Nikolai F. Rulkov, Alexander R. Volkovskii, Michail M. Sushchik, Lev S. Tsimring, Lucas Illing</i>	29
2.1 Introduction	29
2.2 CPPM Basics	32
2.3 CPPM implementation	36
2.4 Experimental Studies of CPPM with Channel Distortions	42
2.5 CPPM Performance and Features	46
2.6 Multiuser Extension of CPPM	53
2.7 Conclusions	54
References	55

3 Spread Spectrum Communication with Chaotic Frequency Modulation

<i>Alexander R. Volkovskii, Lev S. Tsimring, Nikolai F. Rulkov, Ian Langmore, Stephen C. Young</i>	59
3.1 Introduction	59
3.2 Phase and Frequency Modulation of Chaotic Carrier	61
3.3 Chaotic Frequency Modulation of Periodic Carrier	67

3.4 Communication Using CFM Signals	74
3.5 Conclusions.....	86
References	87
 4 Ultra-Wideband Communications Using Pseudo-Chaotic Time Hopping	
<i>David C. Laney, Gian Mario Maggio</i>	91
4.1 Background	91
4.2 Single-User Pseudo-Chaotic Time Hopping	96
4.3 Multiple Access for Pseudo-Chaotic Time Hopping	113
4.4 Conclusions.....	127
References	130
 5 Optimum Spreading Sequences for Asynchronous CDMA System Based on Nonlinear Dynamical and Ergodic Theories	
<i>Kung Yao, Chi-Chung Chen</i>	133
5.1 Introduction	133
5.2 Introduction to CDMA Communication System	135
5.3 Chaotic CDMA Communication System.....	138
5.4 CDMA System Models	140
5.5 Derivation of Optimal Sequences	141
5.6 Ergodic Dynamical Systems	143
5.7 Chaotic Optimal Spreading Sequences Design	146
5.8 Performance Comparisons of CDMA Systems	148
5.9 Construction of Optimal Spreading Sequences from Gold Codes ...	152
5.10 Acquisition Time of Optimal Spreading Sequences	154
5.11 Conclusions.....	157
References	159
 6 Nonlinear Phenomena in Turbo Decoding Algorithms	
<i>Ljupco Kocarev</i>	163
6.1 Introduction	163
6.2 Dynamics of Iterative Decoding Algorithms	165
6.3 Nonlinear Dynamical Systems.....	169
6.4 Fixed Points in the Turbo-Decoding Algorithm.....	175
6.5 Bifurcation Analysis of Turbo-Decoding Algorithm	182
6.6 Control of Transient Chaos	185
6.7 Conclusions.....	188
References	189
 7 Security of Chaos-Based Communication and Encryption	
<i>Roy Tenny, Lev S. Tsimring, Henry D.I. Abarbanel, Lawrence E. Larson</i>	191
7.1 Introduction	191
7.2 Chaos-Based Encryption Schemes	192
7.3 Cryptanalysis Attacks on Chaos-Based Encryption Schemes	200

7.4 Security of Chaotic Encryption Schemes Based on Active/Passive Decomposition	203
7.5 Public Key Encryption Using Distributed Dynamics	212
7.6 Conclusions.....	226
References	228
 8 Random Finite Approximations of Chaotic Maps	
<i>Jesús Uriás, Eric Campos, Nikolai F. Rulkov</i>	231
8.1 Introduction	231
8.2 Random Finite Approximations	232
8.3 Maps with a Generating Partition	235
8.4 Approximations for the Tent Maps	238
8.5 Conclusions.....	241
References	241
 9 Numerical Methods for the Analysis of Dynamics and Synchronization of Stochastic Nonlinear Systems	
<i>How-Foo Chen, Jia-Ming Liu</i>	243
9.1 Introduction	244
9.2 Numerical Simulation of Stochastic Differential Equations	246
9.3 Characterization of Chaos	259
9.4 Robustness of Chaos Synchronization	268
9.5 Chaotic Communications	275
9.6 Conclusions.....	281
References	283
 10 Dynamics and Synchronization of Semiconductor Lasers for Chaotic Optical Communications	
<i>Jia-Ming Liu, How-Foo Chen, Shuo Tang</i>	285
10.1 Introduction	286
10.2 Basic Concepts of Laser Dynamics	287
10.3 Single-Mode Semiconductor Lasers	291
10.4 Nonlinear Dynamics of Single-Mode Semiconductor Lasers	298
10.5 Basic Concept of Chaos Synchronization	311
10.6 Chaos Synchronization of Single-Mode Semiconductor Lasers	315
10.7 Synchronization in the Presence of Message Encoding	330
10.8 Conclusions	335
References	337
 11 Performance of Synchronized Chaotic Optical Communication Systems	
<i>Shuo Tang, How-Foo Chen, Jia-Ming Liu</i>	341
11.1 Introduction	341
11.2 General Issues on Chaotic Optical Communications	345
11.3 Experiment of Chaotic Optical Communication at 2.5 Gb/s	350

XII Contents

11.4 Comparison of Different Encoding and Decoding Schemes	354
11.5 Chaotic Optical Communications at 10 Gb/s	363
11.6 Conclusions	375
References	376
Index	379

Digital Communications Using Chaos and Nonlinear
Dynamics

Liu, J.-M.; Tsimring, L.S. (Eds.)

2006, XIV, 382 p. 196 illus., Hardcover

ISBN: 978-0-387-29787-3
