

# Contents

<b>Section I. Hyperlipidaemia and Atherosclerosis</b>	<b>1</b>
<b>Chapter 1:</b> Reverse Cholesterol Transport <i>Jim W. Burgess, Philip A. Sinclair, Christophe M. Chretien, Jonathon Boucher and Daniel L. Sparks</i>	3
<b>Chapter 2:</b> The Role of LCAT in Atherosclerosis <i>Dominic S. Ng</i>	23
<b>Chapter 3:</b> Howdy Partner: Apolipoprotein A-I-ABCA1 Interactions Mediating HDL Particle Formation <i>Sereyath Ngeth and Gordon A. Francis</i>	39
<b>Chapter 4:</b> Role of the Scavenger Receptor Class B Type I in Lipoprotein Metabolism and Atherosclerosis: Insights from Genetically Altered Mice <i>Bernardo Trigatti</i>	53
<b>Chapter 5:</b> The Role of Scavenger Receptors in Signaling, Inflammation and Atherosclerosis <i>Daisy Sahoo and Victor A. Drover</i>	70
<b>Chapter 6:</b> ABC Transporters and Apolipoprotein E: Critical Players in Macrophage Cholesterol Efflux and Atherosclerosis <i>Kathryn E. Naus and Cheryl L. Wellington</i>	92
<b>Chapter 7:</b> Provision of Lipids for Very Low-Density Lipoprotein Assembly <i>Dean Gilham and Richard Lehner</i>	121
<b>Chapter 8:</b> Oxidatively Modified Low-Density Lipoproteins and Thrombosis <i>Garry X. Shen</i>	150

## viii Contents

<b>Chapter 9:</b>	The Clinical Significance of Small, Dense Low-Density Lipoproteins <i>Manfredi Rizzo and Kaspar Berneis</i>	168
<b>Chapter 10:</b>	Bile Acids: At the Crossroads of Sterol, Fat and Carbohydrate Metabolism <i>Luis B. Agellon</i>	186
<b>Section II. Diabetes and Hypertension Induced Atherosclerosis</b>		<b>203</b>
<b>Chapter 11:</b>	Lipoprotein Metabolism in Insulin- Resistant States <i>Rita Kohen Avramoglu, Heather Basciano and Khosrow Adeli</i>	205
<b>Chapter 12:</b>	The Roles of Protein Glycation, Glycoxidation, and Advanced Glycation End-Product Formation in Diabetes-Induced Atherosclerosis <i>Imran Rashid, Bronwyn E. Brown, David M. van Reyk and Michael J. Davies</i>	247
<b>Chapter 13:</b>	Molecular and Cellular Mechanisms by Which Diabetes Mellitus Promotes the Development of Atherosclerosis <i>Geoff H. Werstuck</i>	284
<b>Chapter 14:</b>	Hypertension and Atherosclerosis: Advanced Glycation End Products— A Common Link <i>Sudesh Vasdev and Vicki Gill</i>	305
<b>Section III. Hyperhomocysteinemia and Atherosclerosis</b>		<b>327</b>
<b>Chapter 15:</b>	Homocysteine Metabolism <i>Enoka P. Wijekoon, Margaret E. Brosnan and John T. Brosnan</i>	329
<b>Chapter 16:</b>	Role of Hyperhomocysteinemia in Atherosclerosis <i>Stephen M. Colgan, Donald W. Jacobsen and Richard C. Austin</i>	358
<b>Chapter 17:</b>	Molecular and Biochemical Mechanisms of Hyperhomocysteinemia-Induced Cardiovascular Disorders <i>Karmin O. Yaw L. Siow, Patrick C. Choy and Grant M. Hatch</i>	380

<b>Section IV. Other Factors in Atherosclerosis and the Associated Complications</b>	<b>395</b>
<b>Chapter 18:</b> The Role of the Immune System in Atherosclerosis: Lessons Learned from Using Mouse Models of the Disease <i>Stewart C. Whitman and Tanya A. Ramsamy</i>	397
<b>Chapter 19:</b> The Role of Infectious Agents in Atherogenesis <i>Paul K. M. Cheung and Grant N. Pierce</i>	413
<b>Chapter 20:</b> Transplant Arteriopathy: Role of Nitric Oxide Synthase <i>Nandini Nair, Hannah Valentine and John P. Cooke</i>	435
<b>Chapter 21:</b> Insights into the Molecular Mechanisms of Plaque Rupture and Thrombosis <i>P.K. Shah and Behrooz Sharifi</i>	455
<b>Section V. Management of Atherosclerosis</b>	<b>473</b>
<b>Chapter 22:</b> Modification of Biochemical and Cellular Processes in the Development of Atherosclerosis by Red Wine <i>Harjot K. Saini, Parambir Dhami, Yan-Jun Xu, Sukhinder Kaur Cheema, Amarjit S. Arneja and Naranjan S. Dhalla</i>	475
<b>Chapter 23:</b> Endothelial Dysfunction and Atherosclerosis: Role of Dietary Fats <i>Kanta Chechi, Pratibha Dubey and Sukhinder Kaur Cheema</i>	495
<b>Chapter 24:</b> Oxidized LDL and Antioxidants in Atherosclerosis <i>Lesley MacDonald-Wicks and Manohar Garg</i>	519
<b>Chapter 25:</b> Dietary Fatty Acids and Stroke <i>Gene R. Herzberg</i>	542
<b>Index</b>	<b>553</b>
