
Contents

Preface	v
Contributors	ix
1 Immunoassay Techniques Michael J. Wheeler	1
2 High-Performance Liquid Chromatography for Hormone Assay John W. Honour	25
3 Gas Chromatography-Mass Spectrometry John W. Honour	53
4 An Introduction to PCR Techniques Gill Rumsby	75
5 Methods for the Investigation of Thyroid Function Christine R. Squire	91
6 Assays for LH, FSH, and Prolactin Michael J. Wheeler	109
7 Adrenocorticotrophic Hormone and Related Peptides Les A. Perry	125
8 Measurement of Glucocorticoids in Biological Fluids Geoff Holder	141
9 Urinary Steroid Profiling Norman F. Taylor	159
10 Measurement of Aldosterone in Blood Marion L. Cawood	177
11 Measurement of Plasma Renin Activity Marion L. Cawood	187
12 Measurement of Androgens Michael J. Wheeler	197
13 Measurement of Gut Hormones in Plasma Shahrad Taheri, Mohammad Ghatei, and Steve Bloom	213
14 Measurement of Melatonin and 6-Sulphatoxymelatonin Benita Middleton	235
Index	255

Hormone Assays in Biological Fluids

Wheeler, M.J.; Fraser, W.D.; Hutchinson, J.S.M. (Eds.)

2006, IX, 258 p., Hardcover

ISBN: 978-1-58829-005-2
