Preface ..... v  
Acknowledgment ..... vii  
Contributors ..... xiii  
List of Color Plates ..... xvii

## PART I. MELANOCYTE DEVELOPMENT AND FUNCTION

1. The Origin and Development of Neural  
Crest-Derived Melanocytes ..... 3  
*Debra L. Silver and William J. Pavan*

2. MITF: A Matter of Life and Death  
for Developing Melanocytes ..... 27  
*Heinz Arnheiter, Ling Hou, Minh-Thanh T. Nguyen,  
Keren Bismuth, Tamas Csermely, Hideki Murakami,  
Susan Skuntz, WenFang Liu, and Kapil Bharti*

3. MITF: Critical Regulator of the Melanocyte Lineage ..... 51  
*Erez Feige, Laura L. Poling, and David E. Fisher*

4. Melanocytes and the Transcription Factor Sox10 ..... 71  
*Michael Wegner*

5. Human Cutaneous Pigmentation: A Collaborative Act  
in the Skin, Directed by Paracrine, Autocrine,  
and Endocrine Factors and the Environment ..... 81  
*Zalfa A. Abdel-Malek and Ana Luisa Kadekaro*

6. Melanocyte Distribution and Function in Human Skin:  
Effects of Ultraviolet Radiation ..... 101  
*Yuji Yamaguchi and Vincent J. Hearing*

## PART II. MELANOCYTE TRANSFORMATION

### AND PROGRESSION TO MELANOMA

7. Altered Signal Transduction in Melanoma ..... 119  
*Pablo López Bergami, Anindita Bhounik, and Ze'ev Ronai*

8. BRN2 in Melanocytic Cell Development, Differentiation,  
and Transformation ..... 149  
*Anthony L. Cook, Glen M. Boyle, J. Helen Leonard,  
Peter G. Parsons, and Richard A. Sturm*

9. The Dynamic Roles of Cell-Surface Receptors  
in Melanoma Development ..... 169  
*Dong Fang and Meenhard Herlyn*

10. Familial Melanoma Genes, Melanocyte Immortalization,  
and Melanoma Initiation ..... 183  
*Dorothy C. Bennett*

11.	Genetic Progression From Melanocyte to Malignant Melanoma ....	197
	<b>Boris C. Bastian</b>	
12.	The Multiple Roles of the Oncogenic Protein SKI in Human Malignant Melanoma .....	211
	<b>Dahu Chen, Qiushi Lin, I. Saira Mian, Jon Reed, and Estela E. Medrano</b>	
13.	RB/E2F Regulation and Dual Activity in the Melanocytic System ....	223
	<b>Ruth Halaban</b>	
14.	Melanoma Development and Pigment Cell Transformation .....	247
	<b>Claudia Wellbrock</b>	
15.	The Biology and Genetics of Melanoma .....	265
	<b>Norman E. Sharpless and Lynda Chin</b>	
16.	The Biology of Xeroderma Pigmentosum: <i>Insights Into the Role of Ultraviolet Light in the Development of Melanoma</i> .....	291
	<b>James E. Cleaver</b>	
17.	Divergent Pathways to Cutaneous Melanoma .....	311
	<b>David C. Whiteman and Adèle C. Green</b>	
18.	Pigmentation, DNA Repair, and Candidate Genes: <i>The Risk of Cutaneous Malignant Melanoma in a Mediterranean Population</i> .....	329
	<b>Maria Teresa Landi</b>	
19.	Low-Penetrance Genotypes, Pigmentation Phenotypes, and Melanoma Etiology .....	347
	<b>Peter A. Kanetsky and Timothy R. Rebbeck</b>	
20.	The Biology of Melanoma Progression: <i>From Melanocyte to Metastatic Seed</i> .....	365
	<b>A. Neil Crowson, Cynthia Magro, and Martin C. Mihm, Jr.</b>	
21.	Optical Imaging Analysis of Atypical Nevi and Melanoma .....	399
	<b>Amanda Pfaff Smith and Dorothea Becker</b>	
22.	Proteomics Analysis of Melanoma Cell Lines and Cultured Melanocytes .....	409
	<b>Katheryn A. Resing and Natalie G. Ahn</b>	

### PART III. PRIMARY INVASIVE MELANOMA TO METASTATIC MELANOMA

23.	Paradigm of Metastasis for Malignant Melanoma .....	429
	<b>Stanley P. L. Leong</b>	
24.	Repair of UV-Induced DNA Damage and Melanoma Risk .....	441
	<b>Qingyi Wei</b>	
25.	High-Risk Factors for Melanoma Metastasis .....	455
	<b>Neil A. Accortt and Seng-jaw Soong</b>	
26.	Role of Melanoma Inhibitory Activity in Early Development of Malignant Melanoma .....	475
	<b>Anja-Katrin Bosserhoff</b>	

27.	Role and Regulation of PAR-1 in Melanoma Progression .....	489
	<b><i>Carmen Tellez and Menashe Bar-Eli</i></b>	
28.	Molecular Mechanisms of Melanoma Metastasis .....	503
	<b><i>Mohammed Kashani-Sabet</i></b>	
29.	Overview of Tumor Progression in Melanoma .....	513
	<b><i>David E. Elder</i></b>	
30.	The Plasticity of Melanoma Cells and Associated Clinical Implications .....	533
	<b><i>Mary J. C. Hendrix, Elisabeth A. Seftor, Angela R. Hess, and Richard E. B. Seftor</i></b>	
31.	The Clinical Use of Molecular Markers as Predictors of Disease Outcome and Response to Therapy in Malignant Melanoma .....	551
	<b><i>Steve R. Martinez, Hiroya Takeuchi, Dave S. B. Hoon</i></b>	
32.	The Role of DCT/TYRP2 in Resistance of Melanoma Cells to Drugs and Radiation .....	577
	<b><i>Brian J. Pak and Yaacov Ben-David</i></b>	
33.	How Melanoma Cells Evade Chemotherapy: <i>Role of Transporter-Dependent and -Independent Resistance Mechanisms</i> .....	591
	<b><i>Kevin G. Chen and Michael M. Gottesman</i></b>	
34.	Apoptosis in Melanoma: <i>Approaches to Therapy</i> .....	605
	<b><i>Heike Röckmann and Dirk Schadendorf</i></b>	
35.	Role of Melanoma-Associated Antigens .....	619
	<b><i>Rishab K. Gupta, Ana M. McElrath-Garza, and Donald L. Morton</i></b>	
36.	Host Responses to Melanoma: <i>Implications for Immunotherapy</i> ....	633
	<b><i>Julian A. Kim and Ernest Borden</i></b>	
37.	Future Perspectives .....	651
	<b><i>Vincent J. Hearing and Stanley P. L. Leong</i></b>	
	Index .....	653
