

# Contents

Preface .....	v
Contributors .....	xi
1 Resources for Genetic and Genomic Studies of <i>Xenopus</i> <i>Steven L. Klein, Daniela S. Gerhard, Lukas Wagner, Paul Richardson, Lynn M. Schriml, Amy K. Sater, Wesley C. Warren, and John D. McPherson</i> .....	1
2 The Physiology of the <i>Xenopus laevis</i> Ovary <i>Melissa A. Rasar and Stephen R. Hammes</i> .....	17
3 Oocyte Isolation and Enucleation <i>X. Shawn Liu and X. John� Liu</i> .....	31
4 <i>Xenopus tropicalis</i> Oocytes: More Than Just a Beautiful Genome <i>Jean-Fran�ois L. Bodart and Nicholas S. Duesbery</i> .....	43
5 Oocyte Expression With Injection of Purified T7 RNA Polymerase <i>Xavier Altafaj, Nathalie Joux, Michel Ronjat, and Michel De Waard</i> .....	55
6 Visualization of the Cytoskeleton in <i>Xenopus</i> Oocytes and Eggs by Confocal Immunofluorescence Microscopy <i>Bret E. Becker and David L. Gard</i> .....	69
7 Multiphoton Laser Scanning Microscopy as a Tool for <i>Xenopus</i> Oocyte Research <i>Angela M. Prouty, Jun Wu, Da-Ting Lin, Patricia Camacho, and James D. Lechleiter</i> .....	87
8 Imaging Ca <sup>2+</sup> Signals in <i>Xenopus</i> Oocytes <i>Sheila L. Dargan, Angelo Demuro, and Ian Parker</i> .....	103
9 Chromosomal DNA Replication in a Soluble Cell-Free System Derived From <i>Xenopus</i> Eggs <i>Antonin V. Tutter and Johannes C. Walter</i> .....	121
10 Chromatin Assembly of DNA Templates Microinjected Into <i>Xenopus</i> Oocytes <i>Dani�le Roche, Genevi�ve Almouzni, and Jean-Pierre Quivy</i> .....	139
11 Pre-mRNA Splicing in the Nuclei of <i>Xenopus</i> Oocytes <i>Kyong Hwa Moon, Xinliang Zhao, and Yi-Tao Yu</i> .....	149

12	Chromatin Immunoprecipitation for Studying Transcriptional Regulation in <i>Xenopus</i> Oocytes and Tadpoles <b>David Stewart, Akihiro Tomita, Yun-Bo Shi, and Jiemin Wong .....</b>	<b>165</b>
13	Cytoplasmic mRNA Polyadenylation and Translation Assays <b>Maria Piqué, José Manuel López, and Raúl Méndez .....</b>	<b>183</b>
14	<i>Xenopus</i> Egg Extracts: A Model System to Study Proprotein Convertases <b>Kathleen I. J. Shennan .....</b>	<b>199</b>
15	Analysis of Molecular Chaperones Using a <i>Xenopus</i> Oocyte Protein Refolding Assay <b>John J. Heikkila, Angelo Kaldis, and Rashid Abdulle .....</b>	<b>213</b>
16	Ubiquitin-Mediated Protein Degradation in <i>Xenopus</i> Egg Extracts <b>Anna Castro, Suzanne Vigneron, Cyril Bernis, Jean-Claude Labbé, and Thierry Lorca .....</b>	<b>223</b>
17	Introduction to Nucleocytoplasmic Transport: Molecules and Mechanisms <b>Reiner Peters .....</b>	<b>235</b>
18	Use of <i>Xenopus laevis</i> Oocyte Nuclei and Nuclear Envelopes in Nucleocytoplasmic Transport Studies <b>Reiner Peters .....</b>	<b>259</b>
19	Nuclear Pore Complex Structure and Plasticity Revealed by Electron and Atomic Force Microscopy <b>Bohumil Maco, Birthe Fahrenkrog, Ning-Ping Huang, and Ueli Aebi .....</b>	<b>273</b>
20	In Vitro Study of Nuclear Assembly and Nuclear Import Using <i>Xenopus</i> Egg Extracts <b>Rene C. Chan and Douglass J. Forbes .....</b>	<b>289</b>
21	Use of Intact <i>Xenopus</i> Oocytes in Nucleocytoplasmic Transport Studies <b>Nelly Panté .....</b>	<b>301</b>
22	Studying the Mechanosensitivity of Voltage-Gated Channels Using Oocyte Patches <b>Catherine E. Morris, Peter F. Juranka, Wei Lin, Terence J. Morris, and Ulrike Laitko .....</b>	<b>315</b>
23	Oocytes as an Expression System for Studying Receptor/Channel Targets of Drugs and Pesticides <b>Steven David Buckingham, Luanda Pym, and David Barry Sattelle ....</b>	<b>331</b>

24	Microtransplantation of Neurotransmitter Receptors From Cells to <i>Xenopus</i> Oocyte Membranes: New Procedure for Ion Channel Studies <b>Ricardo Miledi, Eleonora Palma, and Fabrizio Eusebi</b> .....	347
25	Reconstitution of Golgi Disassembly by Mitotic <i>Xenopus</i> Egg Extracts in Semi-Intact MDCK Cells <b>Fumi Kano, Katsuya Takenaka, and Masayuki Murata</b> .....	357
26	Exploring RNA Virus Replication in <i>Xenopus</i> Oocytes <b>Andrea V. Gamarnik and Raul Andino</b> .....	367
27	Study of Apoptosis in Vitro Using the <i>Xenopus</i> Egg Extract Reconstitution System <b>Paula Deming and Sally Kornbluth</b> .....	379
28	Studying Fertilization in Cell-Free Extracts: <i>Focusing on Membrane/Lipid Raft Functions and Proteomics</i> <b>Ken-ichi Sato, Ken-ichi Yoshino, Alexander A. Tokmakov, Tetsushi Iwasaki, Kazuyoshi Yonezawa, and Yasuo Fukami</b> .....	395
29	Localized Sampling, Electrophoresis, and Biosensor Analysis of <i>Xenopus laevis</i> Cytoplasm for Subcellular Biochemical Assays <b>Christopher E. Sims, Veronica Luzzi, and Nancy L. Allbritton</b> .....	413
30	Monitoring Protein Kinase A Activities Using Expressed Substrate in Live Cells <b>Jing Wang and X. John� Liu</b> .....	425
31	Using <i>Xenopus</i> Oocyte Extracts to Study Signal Transduction <b>Richard F. Crane and Joan V. Ruderman</b> .....	435
32	Oocyte Extracts for the Study of Meiotic M–M Transition <b>Keita Ohsumi, Tomomi M. Yamamoto, and Mari Iwabuchi</b> .....	445
33	Methods for Studying Spindle Assembly and Chromosome Condensation in <i>Xenopus</i> Egg Extracts <b>Thomas J. Maresca and Rebecca Heald</b> .....	459
	Index .....	475
