PART I. GROWING *ARABIDOPSIS*

1 Growth of Plants and Preservation of Seeds <i>Luz Rivero-Lepinckas, Deborah Crist, and Randy Scholl</i>	3
2 Prevention and Control of Pests and Diseases <i>Jenifer Bush, Georg Jander, and Frederick M. Ausubel</i>	13
3 Growth of Other Species Related to <i>Arabidopsis thaliana</i> <i>Krithika Yogeewaran and Mikhail Elia Nasrallah</i>	27
4 Grafting <i>Katherine Bainbridge, Tom Bennett, Colin Turnbull, and Ottoline Leyser</i>	39
5 Synchronization, Transformation, and Cryopreservation of Suspension-Cultured Cells <i>Margit Menges and James A. H. Murray</i>	45

PART II. GENETIC ANALYSES

6 Genetic Analysis <i>Maarten Koornneef, Carlos Alonso-Blanco, and Piet Stam</i>	65
7 QTL Analysis <i>Carlos Alonso-Blanco, Maarten Koornneef, and Johan W. van Ooijen</i>	79
8 EMS Mutagenesis of <i>Arabidopsis</i> <i>YongSig Kim, Karen S. Schumaker, and Jian-Kang Zhu</i>	101
9 Low-Resolution Mapping of Untagged Mutations <i>M. Rosa Ponce, Pedro Robles, Francisca M. Lozano, M. Asunción Brotóns, and José L. Micol</i>	105
10 Gene Identification and Cloning by Molecular Marker Mapping <i>Georg Jander</i>	115
11 High-Throughput TILLING for <i>Arabidopsis</i> <i>Bradley J. Till, Trenton Colbert, Christine Codomo, Linda Enns, Jessica Johnson, Steven H. Reynolds, Jorja G. Henikoff, Elizabeth A. Greene, Michael N. Steine, Luca Comai, and Steven Henikoff</i>	127
12 Genotyping and Mapping With High-Density Oligonucleotide Arrays <i>Justin Borevitz</i>	137
13 Forward Genetic Screening of Insertional Mutants <i>Anja Schneider and Dario Leister</i>	147

14	PCR-Based Screening for Insertional Mutants Anna N. Stepanova and Jose M. Alonso	163
15	Cytogenetic Analysis of <i>Arabidopsis</i> Martin Lysak, Paul Fransz, and Ingo Schubert	173
16	Using Information From Public <i>Arabidopsis</i> Databases to Aid Research Margarita Garcia-Hernandez and Leonore Reiser	187
PART III. TRANSIENT AND STABLE TRANSFORMATION		
17	<i>In Planta Agrobacterium</i> -Mediated Transformation by Vacuum Infiltration Brian W. Tague and Joanna Mantis	215
18	Transient Expression Assay by Agroinfiltration of Leaves Min Woo Lee and Yinong Yang	225
19	Functional Analysis of Transcription Factors by Microparticle Bombardment Ida Ruberti, Giovanna Sessa, and Giorgio Morelli	231
20	Transfection Assays With Protoplasts Containing Integrated Reporter Genes Shiv Tiwari, Shucai Wang, Gretchen Hagen, and Tom J. Guilfoyle	237
21	Chloroplast Genetic Engineering Via Organogenesis or Somatic Embryogenesis Amit Dhingra and Henry Daniell	245
22	β -Glucuronidase as Reporter Gene: <i>Advantages and Limitations</i> Kye-Won Kim, Vincent R. Franceschi, Laurence B. Davin, and Norman G. Lewis	263
23	Use of Fluorescent Proteins as Reporters Guido Jach	275
24	Luciferases as Reporter Genes Megan M. Southern, Paul E. Brown, and Anthony Hall	293
25	Aequorin as a Reporter Gene Christoph Plieth	307
26	Applications of Chemical-Inducible Expression Systems in Functional Genomics and Biotechnology Jianru Zuo, Peter D. Hare, and Nam-Hai Chua	329
PART IV. TRANSCRIPTOMICS		
27	RNA Extraction Huazhong Shi and Ray Bressan	345
28	Target Preparation for DNA Microarray Hybridization Tong Zhu, Sherman H. Chang, and Pedro Gil	349
29	Statistical Issues in Microarray Data Analysis Willem A. Rensink and Samuel P. Hazen	359
30	Preparation and Quality Assessment of RNA From Cell-Specific Samples Obtained by Laser Microdissection Regine Kleber and Julia Kehr	367

PART V. PROTEOMICS

31	Protein Isolation and Second-Dimension Electrophoretic Separation Bernhard Schlesier and Hans-Peter Mock	381
32	Isolation of Nuclear Proteins Tomasz T. Calikowski and Iris Meier	393
33	Purification and Fractionation of Membranes for Proteomic Analysis Anne Marmagne, Daniel Salvi, Norbert Rolland, Geneviève Ephritikhine, Jacques Joyard, and H������ Barbier-Brygoo	403
34	Protein Microsequencing Alberto Paradela and Juan Pablo Albar	421
35	Peptide-Based Phosphoproteomics With Immobilized Metal Ion Chromatography Thomas S. N������ and Scott C. Peck	431

PART VI. METABOLOMICS

36	Metabolite Profiling in <i>Arabidopsis</i> Oliver Fiehn	439
37	Hormone Profiling in <i>Arabidopsis</i> Axel M������, Petra D��������, and Elmar W. Weiler	449
Index		459
