Part I. Cell Cycle During the Development of the Mammalian Central Nervous System

1. Methodological Considerations in the Evaluation of the Cell Cycle in the Central Nervous System	3
<i>Richard A. Prayson</i>	
2. Neural Stem Cells	13
<i>Philippe Taupin</i>	
3. Progenitors and Precursors of Neurons and Glial Cells	23
<i>Monika Bradl</i>	
4. Vasculogenesis and Angiogenesis	31
<i>Gerald A. Grant and Damir Janigro</i>	
5. Neuronal Migration and Malformations of Cortical Development	43
<i>Giorgio Battaglia and Stefania Bassanini</i>	

Part II. Postnatal Development of Neurons and Glia

6. Genome-Wide Expression Profiling of Neurogenesis in Relation to Cell Cycle Exit	59
<i>P. Roy Walker, Dao Ly, Qing Y. Liu, Brandon Smith, Caroline Sodja, Marilena Ribeco, and Marianna Sikorska</i>	
7. Neurogenesis and Apoptotic Cell Death	71
<i>Klaus van Leyen, Seong-Ryong Lee, Michael A. Moskowitz, and Eng H. Lo</i>	
8. Ion Channels and the Cell Cycle	81
<i>Annarosa Arcangeli and Andrea Becchetti</i>	
9. Nonsynaptic GABAergic Communication and Postnatal Neurogenesis	95
<i>Xiuxin Liu, Anna J. Bolteus, and Angélique Bordey</i>	
10. Critical Roles of Ca ²⁺ and K ⁺ Homeostasis in Apoptosis	105
<i>Shan Ping Yu</i>	

11. Mammalian Neural Stem Cell Renewal	119
<i>Yvan Arsenijevic</i>	
<i>Part III. Control of the Cell Cycle and Apoptosis in Glia</i>	
12. Methods of Determining Apoptosis in Neuro-Oncology: <i>Review of the Literature</i>	143
<i>Brian T. Ragel, Bardia Amirlak, Ganesh Rao, and William T. Couldwell</i>	
13. Cell Cycle, Neurological Disorders, and Reactive Gliosis	163
<i>Kerri L. Hallene and Damir Janigro</i>	
14. Potassium Channels, Cell Cycle, and Tumorigenesis in the Central Nervous System	177
<i>Gabriele Dini, Erin V. Ilkanich, and Damir Janigro</i>	
<i>Part IV. Adult Neurogenesis: A Mechanism for Brain Repair?</i>	
15. Enhanced Neurogenesis Following Neurological Disease	195
<i>Philippe Taupin</i>	
16. Endothelial Injury and Cell Cycle Re-Entry	207
<i>Ljiliana Krizanac-Bengez</i>	
17. The Contribution of Bone Marrow-Derived Cells to Cerebrovascular Formation and Integrity	221
<i>David Kobilier and John Glod</i>	
18. Microvessel Remodeling in Cerebral Ischemia	233
<i>Danica B. Stanimirovic, Maria J. Moreno, and Arsalan S. Haqqani</i>	
19. Vascular and Neuronal Effects of VEGF in the Nervous System: <i>Implications for Neurological Disorders</i>	245
<i>Lieve Moons, Peter Carmeliet, and Mieke Dewerchin</i>	
20. Epidermal Growth Factor Receptor in the Adult Brain	265
<i>Carmen Estrada and Antonio Villalobo</i>	
<i>Part V. Cell Cycle Re-Entry: A Mechanism of Brain Disease?</i>	
21. Neurodegeneration and Loss of Cell Cycle Control in Postmitotic Neurons	281
<i>Randall D. York, Samantha A. Cicero, and Karl Herrup</i>	
22. Cell Cycle Activation and the Amyloid- β Protein in Alzheimer's Disease	299
<i>Katarzyna A. Gustaw, Gemma Casadesus, Robert P. Friedland, George Perry, and Mark A. Smith</i>	
23. Neuronal Precursor Proliferation and Epileptic Malformations of Cortical Development	309
<i>Jorge A. González-Martínez, William E. Bingaman, and Imad M. Najm</i>	
24. Vascular Differentiation and the Cell Cycle	319
<i>Luca Cucullo</i>	

25. Adult Neurogenesis and Central Nervous System Cell Cycle Analysis: <i>Novel Tools for Exploration of the Neural Causes and Correlates of Psychiatric Disorders</i>	331
<i>Amelia J. Eisch and Chitra D. Mandyam</i>	
26. Neurogenesis in Alzheimer's Disease: <i>Compensation, Crisis, or Chaos?</i>	359
<i>Gemma Casadesus, Xiongwei Zhu, Hyoun-gon Lee, Michael W. Marlatt, Robert P. Friedland, Katarzyna A. Gustaw, George Perry, and Mark A. Smith</i>	
<i>Part VI. The Biology of Gliomas</i>	
27. p53 and Multidrug Resistance Transporters in the Central Nervous System	373
<i>Shirley Teng and Micheline Piquette-Miller</i>	
28. Signaling Modules in Glial Tumors and Implications for Molecular Therapy	389
<i>Gurpreet S. Kapoor and Donald M. O'Rourke</i>	
29. Detection of Proliferation in Gliomas by Positron Emission Tomography Imaging	419
<i>Alexander M. Spence, David A. Mankoff, Joanne M. Wells, Mark Muzi, John R. Grierson, Janet F. Eary, S. Finbarr O'Sullivan, Jeanne M. Link, Daniel L. Silbergeld, and Kenneth A. Krohn</i>	
30. Transition of Normal Astrocytes Into a Tumor Phenotype	433
<i>Sean E. Aeder and Isa M. Hussaini</i>	
31. Mechanisms of Gliomagenesis	449
<i>Wei Zhang and Howard A. Fine</i>	
<i>Part VII. Future Directions</i>	
32. Cell Cycle of Encapsulated Cells	465
<i>Roberto Dal Toso and Sara Bonisegna</i>	
33. Viral Vector Delivery to Dividing Cells	477
<i>Yoshinaga Saeki</i>	
34. Electrical Stimulation and Angiogenesis: <i>Electrical Signals Have Direct Effects on Endothelial Cells</i>	495
<i>Min Zhao</i>	
35. Development and Potential Therapeutic Aspects of Mammalian Neural Stem Cells	511
<i>L. Bai, S. L. Gerson, and R. H. Miller</i>	
36. Mammalian Sir2 Proteins: <i>A Role in Epilepsy and Ischemia</i>	525
<i>Barbara Aumayr and Damir Janigro</i>	
<i>Index</i>	541
