

Contents

<i>Preface</i>	v
<i>Contributors</i>	xi
<i>Color Plate</i>	xvii
1 Molecular Biology and Genomic Organization of G Protein–Coupled Serotonin Receptors	
<i>Wesley K. Kroeze and Bryan L. Roth</i>	1
2 Structure and Function Reveal Insights in the Pharmacology of 5-HT Receptor Subtypes	
<i>Richard B. Westkaemper and Bryan L. Roth</i>	39
3 Polymorphic and Posttranscriptional Modifications of 5-HT Receptor Structure: Functional and Pathological Implications	
<i>Marilyn A. Davies, Chiao-ying Chang, and Bryan L. Roth</i>	59
4 Strategies for the Development of Selective Serotonergic Agents	
<i>Richard A. Glennon</i>	91
5 5-HT Receptor Signal Transduction Pathways	
<i>John R. Raymond, Justin H. Turner, Andrew K. Gelasco, Henry B. Ayiku, Sonya D. Coaxum, John M. Arthur, and Maria N. Garnovskaya</i>	143
6 Agonist-Directed Trafficking of 5-HT Receptor-Mediated Signal Transduction	
<i>Kelly A. Berg and William P. Clarke</i>	207
7 Identification of 5-HT₂ and 5-HT₄ Receptor-Interacting Proteins: A Proteomic Approach	
<i>Joël Bockeaert, Carine Bécamel, Lara Joubert, Sophie Gavarini, Aline Dumuis, and Philippe Marin</i>	237

8	5-HT Receptor-Associated Proteins (FRAPs): Relevance for Targeting, Trafficking, and Signal Transduction <i>Zongqi Xia, Douglas J. Sheffler, and Bryan L. Roth</i>	257
9	Cellular and Subcellular Localization of Serotonin Receptors in the Central Nervous System <i>Laurent Descarries, Virginia Cornea-Hébert, and Mustapha Riad</i>	277
10	Chemical Neuroanatomy of 5-HT Receptor Subtypes in the Mammalian Brain <i>Guadalupe Mengod, M. Teresa Vilaró, Roser Cortés, Juan F. López-Giménez, Andreu Raurich, and José M. Palacios</i>	319
11	Modulation of the Neuronal Activity and Neurotransmitter Release by 5-HT_{1A} and 5-HT_{1B/1D} Receptors <i>Pau Celada, Albert Adell, and Francesc Artigas</i>	365
12	Electrophysiology of 5-HT_{2A} Receptors and Relevance for Hallucinogen and Atypical Antipsychotic Drug Actions <i>Evelyn K. Lambe and George K. Aghajanian</i>	403
13	The Emergence of 5-HT_{2B} Receptors as Targets to Avoid in Designing and Refining Pharmaceuticals <i>Vincent Setola and Bryan L. Roth</i>	419
14	The 5-HT₃ Receptor <i>Andrew J. Thompson, Li Zhang, and Sarah C. R. Lummis</i>	439
15	5-HT₃ and 5-HT₄ Receptors as Targets for Drug Discovery for Dementia <i>Frank Lezoualc'h and Magali Berthouze</i>	459
16	Electrophysiological Properties of Gα_s-Coupled 5-HT Receptors (5-HT₄, 5-HT₆, 5-HT₇) <i>Rodrigo Andrade</i>	481
17	5-HT₆ Receptors as Targets for the Treatment of Cognitive Deficits in Schizophrenia <i>Rudy Schreiber, Andrew Sleight, and Marie Woolley</i>	495

18	5-HT₇ Receptors as Favorable Pharmacological Targets for Drug Discovery	
	<i>Peter B. Hedlund and J. Gregor Sutcliffe</i>	517
19	Serotonin System Gene Knockouts:	
	<i>A Story of Mice With Implications for Man</i>	
	<i>Miles Berger and Laurence H. Tecott</i>	537
20	Effects of Serotonin-Related Gene Deletion on Measures of Anxiety, Depression, and Neurotransmission	
	<i>Anita J. Bechtholt and Irwin Lucki</i>	577
Index		607

The Serotonin Receptors

From Molecular Pharmacology to Human Therapeutics

Roth, B.L. (Ed.)

2006, XVIII, 618 p. 82 illus., 5 illus. in color., Hardcover

ISBN: 978-1-58829-568-2

A product of Humana Press
