

CONTENTS

Preface	v
Contributors	xi
1 Nucleoside Transport Into Cells: <i>Role of Nucleoside Transporters SLC28 and SLC29 in Cancer Chemotherapy</i> Marçal Pastor-Anglada and F. Javier Casado	1
2 The Role of Deoxycytidine Kinase in DNA Synthesis and Nucleoside Analog Activation Maria Staub and Staffan Eriksson	29
3 Deoxynucleoside Kinases and Their Potential Role in Deoxynucleoside Cytotoxicity Birgitte Munch-Petersen and Jure Piškur	53
4 Nucleotidases and Nucleoside Analog Cytotoxicity Sally Anne Hunsucker, Beverly S. Mitchell, and Jozef Spsychala	81
5 Pumping Out Drugs: <i>The Potential Impact of ABC Transporters on Resistance to Base, Nucleoside, and Nucleotide Analogs</i> Piet Borst and Peter Wielinga	109
6 Cytosine Arabinoside: <i>Metabolism, Mechanisms of Resistance, and Clinical Pharmacology</i> Isabelle Hubeek, Gert-Jan L. Kaspers, Gert J. Ossenkoppele, and Godefridus J. Peters	119
7 Clofarabine: <i>Mechanisms of Action, Pharmacology, and Clinical Investigations</i> Varsha Gandhi and William Plunkett	153
8 L-Nucleosides as Chemotherapeutic Agents Giuseppe Gumina, Youhoon Chong, and Chung K. Chu	173
9 Troxacitabine (Troxaty TM): <i>A Deoxycytidine Nucleoside Analog With Potent Antitumor Activity</i> Henriette Gourdeau and Jacques Jolivet	199
10 9-β-D-Arabinofuranosylguanine Sophie Curbo and Anna Karlsson	215

11	Gemcitabine: <i>Mechanism of Action and Resistance</i> <i>Andries M. Bergman and Godefridus J. Peters</i>	225
12	Clinical Activity of Gemcitabine as a Single Agent and in Combination <i>Judith R. Kroep, Godefridus J. Peters, and Robert A. Nagourney</i>	253
13	Nucleoside Radiosensitizers <i>Donna S. Shewach and Theodore S. Lawrence</i>	289
14	NONMEM Population Models of Cytosine Arabinoside and Fludarabine Phosphate in Pediatric Patients With Leukemia <i>Vassilios I. Avramis</i>	331
15	The cycloSal-Nucleotide Delivery System: <i>Development</i> <i>of Chemical Trojan Horses as Antiviral Agents</i> <i>Chris Meier, Jan Balzarini, and Astrid Meerbach</i>	353
16	Purine and Pyrimidine-Based Analogs and Suicide Gene Therapy <i>Zoran Gojkovic and Anna Karlsson</i>	403
17	3'-Deoxy-3'-Fluorothymidine as a Tracer of Proliferation in Positron Emission Tomography <i>Wieteke G. E. Direcks, Adriaan A. Lammertsma,</i> <i>and Carla F. M. Molthoff</i>	441
	Index	463
