# Contents

Preface .....	v
Contributors .....	xiii
1 Markers, Selection, and Media in Yeast Artificial Chromosome Cloning <i>David Markie</i> .....	1
2 Construction of Yeast Artificial Chromosome Libraries From Pathogens and Nonmodel Organisms <i>Cecilia P. Sanchez and Michael Lanzer</i> .....	13
3 Analysis and Screening of Yeast Artificial Chromosome Libraries by Filter Hybridization <i>Cecilia P. Sanchez and Michael Lanzer</i> .....	27
4 Analysis of Yeast Artificial Chromosome DNA by Restriction Digestion, Southern Blotting Nucleic Acid Hybridization, and Polymerase Chain Reaction <i>Sylvia Vasiliou and John Peter Quinn</i> .....	33
5 Postgenomic Bioinformatic Analysis of Yeast Artificial Chromosome Sequence <i>Kerry Miller, Scott Davidson, and Alasdair MacKenzie</i> .....	41
6 Transformation of Yeast Using Bioactive Beads With Surface-Immobilized Yeast Artificial Chromosomes <i>Shigeki Kawakami, Satoshi Harashima, Akio Kobayashi, and Kiichi Fukui</i> .....	61
7 Modification and Amplification of Yeast Artificial Chromosomes <i>Sanbing Shen, Anthony Harmar, and Nick Hastie</i> .....	67
8 Modifying Yeast Artificial Chromosomes to Generate <i>Cre/LoxP</i> and FLP/FRT Site-Specific Deletions and Inversions <i>Gabriela G. Loots</i> .....	75
9 Selective Isolation of Large Chromosomal Regions by Transformation-Associated Recombination Cloning for Structural and Functional Analysis of Mammalian Genomes <i>Natalay Kouprina, Vladimir N. Noskov, and Vladimir Larionov</i> .....	85

10	A Polymerase Chain Reaction-Mediated Yeast Artificial Chromosome-Splitting Technology for Generating Targeted Yeast Artificial Chromosomes Subclones <b>Yeon-Hee Kim, Minetaka Sugiyama, Yoshinobu Kaneko, Kiichi Fukui, Akio Kobayashi, and Satoshi Harashima</b> .....	103
11	Genomic Reconstruction by Serial Mitotic Recombination of Yeast Artificial Chromosomes <b>David Markie, Emma Jones, and Jiannis Ragoussis</b> .....	117
12	Targeting Vector Construction by Yeast Artificial Chromosome Modification <b>Peter J. Murray</b> .....	127
13	Production of Yeast Artificial Chromosome Transgenic Mice by Pronuclear Injection of One-Cell Embryos <b>Alasdair MacKenzie</b> .....	139
14	Generation of Yeast Artificial Chromosome Transgenic Mice by Intracytoplasmic Sperm Injection <b>Pedro N. Moreira, Julio Pozueta, Patricia Giraldo, Alfonso Gutiérrez-Adán, and Lluís Montoliu</b> .....	151
15	Establishment of Cell Lines That Exhibit Correct Ontogenic Stage-Specific Gene Expression Profiles From Tissues of Yeast Artificial Chromosome Transgenic Mice Using Chemically Induced Growth Signals <b>C. Anthony Blau and Kenneth R. Peterson</b> .....	163
16	Application of Yeast Artificial Chromosomes in Fluorescence <i>In Situ</i> Hybridization <b>Thomas Liehr</b> .....	175
17	Contribution of Yeast Artificial Chromosome-Based Physical Maps to the Final Assembly of the <i>Trypanosoma cruzi</i> Genome <b>Márcia R. M. Santos, Roberto R. M. Barros, Patrício E. Porcile, Mariano J. Levin, and José Franco da Silveira</b> .....	187
Index	.....	199
