
Contents

Preface	v
Contributors	xi
1. Infrared Temperature-Jump Study of the Folding Dynamics of α -Helices and β -Hairpins Feng Gai, Deguo Du, and Yao Xu	1
2. The Use of High-Pressure Nuclear Magnetic Resonance to Study Protein Folding Michael W. Lassalle and Kazuyuki Akasaka	21
3. Characterization of Denatured Proteins Using Residual Dipolar Couplings Erika B. Gebel and David Shortle	39
4. Characterizing Residual Structure in Disordered Protein States Using Nuclear Magnetic Resonance David Eliezer	49
5. Population and Structure Determination of Hidden Folding Intermediates by Native-State Hydrogen Exchange-Directed Protein Engineering and Nuclear Magnetic Resonance Yawen Bai, Hanqiao Feng, and Zheng Zhou	69
6. Characterizing Protein Folding Transition States Using Ψ -Analysis Adarsh D. Pandit, Bryan A. Krantz, Robin S. Dothager, and Tobin R. Sosnick	83
7. Advances in the Analysis of Conformational Transitions in Peptides Using Differential Scanning Calorimetry Werner W. Streicher and George I. Makhatadze	105
8. Application of Single Molecule Förster Resonance Energy Transfer to Protein Folding Benjamin Schuler	115
9. Single Molecule Studies of Protein Folding Using Atomic Force Microscopy Sean P. Ng, Lucy G. Randles, and Jane Clarke	139
10. Using Triplet–Triplet Energy Transfer to Measure Conformational Dynamics in Polypeptide Chains Beat Fierz, Karin Joder, Florian Krieger, and Thomas Kiefhaber	169

11. A Hierarchical Protein Folding Scheme Based on the Building Block Folding Model Nurit Haspel, Gilad Wainreb, Yuval Inbar, Hui-Hsu (Gavin) Tsai, Chung-Jung Tsai, Haim J. Wolfson, and Ruth Nussinov	189
12. Replica Exchange Molecular Dynamics Method for Protein Folding Simulation Ruhong Zhou	205
13. Estimation of Folding Probabilities and Φ Values From Molecular Dynamics Simulations of Reversible Peptide Folding Francesco Rao, Giovanni Settanni, and Amedeo Caflisch	225
14. Packing Regularities in Biological Structures Relate to Their Dynamics Robert L. Jernigan and Andrzej Kloczkowski	251
15. Intermediates and Transition States in Protein Folding D. Thirumalai and Dmitri K. Klimov	277
16. Thinking the Impossible: <i>How to Solve the Protein Folding Problem With and Without Homologous Structures and More</i> Rita Casadio, Piero Fariselli, Pier Luigi Martelli, and Gianluca Tasco	305
Index	321

Protein Folding Protocols

Bai, Y. (Ed.)

2006, XIV, 328 p. 111 illus., Hardcover

ISBN: 978-1-58829-622-1
