# Contents

<b>1 Introduction</b>	1
1.1 Scope of Process Control	1
1.2 Proportional–Integral–Derivative Control Performance	2
1.3 Relay Feedback Identification	5
1.4 Conclusion	6
1.5 References	7
<b>2 Features of Proportional–Integral–Derivative Control</b>	9
2.1 Proportional–Integral–Derivative Controller	9
2.1.1 Proportional Control	9
2.1.2 Proportional–Integral Control	10
2.1.3 Proportional–Integral–Derivative Control	12
2.2 Proportional–Integral–Derivative Implementation	13
2.2.1 Reset Windup	13
2.2.2 Arrangement of Derivative Action	15
2.3 Proportional–Integral–Derivative Tuning Rules	17
2.3.1 Ziegler–Nichols Types of Tuning Rules	17
2.3.2 Model-based Tuning	19
2.4 Conclusion	20
2.5 References	20
<b>3 Relay Feedback</b>	23
3.1 Experimental Design	24
3.2 Approximate Transfer Functions: Frequency-domain Modeling	26
3.2.1 Simple Approach	27
3.2.2 Improved Algorithm	30
3.2.3 Parameter Estimation	32
3.2.4 Examples	32
3.3 Approximate Transfer Functions: Time-domain Modeling	36
3.3.1 Derivation for a Second-order Overdamped System	39
3.3.2 Results	41

3.3.3	Validation .....	44
3.4	Conclusion .....	44
3.5	References .....	46
<b>4</b>	<b>Shape of Relay .....</b>	<b>47</b>
4.1	Shapes of Relay Response .....	47
4.1.1	Shapes .....	48
4.1.2	Model Structures .....	50
4.1.2.1	First-order Plus Dead Time .....	50
4.1.2.2	Second-order Plus Small Dead Time .....	51
4.1.2.3	High Order .....	52
4.2	Identification .....	52
4.2.1	Identification of Category 1: First-order Plus Dead Time .....	52
4.2.1.1	Category 1a: True First-order Plus Dead Time .....	52
4.2.1.2	Category 1b: Approximated First-order Plus Dead Time .....	55
4.2.2	Identification of Category 2: Second-order Plus Small Dead Time ..	56
4.2.3	Identification of Category 3: High order .....	58
4.2.4	Validation .....	59
4.3	Implications for Control .....	62
4.3.1	Proportional–Integral–Derivative Control .....	62
4.3.1.1	Category 1: First-order Plus Dead Time .....	62
4.3.1.2	Category 2: Second-order Plus Small Dead Time .....	64
4.3.1.3	Category 3: High Order .....	64
4.3.2	Results .....	64
4.3.3	Extension .....	70
4.3.3.1	Dead-time-Dominant Process .....	70
4.3.3.2	Higher Order Process .....	71
4.4	Conclusion .....	72
4.5	References .....	73
<b>5</b>	<b>Improved Relay Feedback .....</b>	<b>75</b>
5.1	Analysis .....	76
5.1.1	Ideal (On–Off) Relay Feedback .....	76
5.1.2	Saturation Relay Feedback .....	78
5.1.3	Potential Problem .....	83
5.2	Improved Experimental Design .....	84
5.2.1	Selection of the Slope of Saturation Relay .....	84
5.2.2	Procedure .....	89
5.3	Applications .....	89
5.4	Conclusion .....	95
5.5	References .....	96
<b>6</b>	<b>Multivariable Systems .....</b>	<b>97</b>
6.1	Concept .....	97
6.1.1	Single-input–Single-output Autotuning .....	97
6.1.2	Multiple-input–Multiple-output Autotuning .....	99
6.2	Theory .....	101

6.2.1	Sequential Design .....	101
6.2.2	Process Characteristics .....	104
6.2.3	Sequential Identification .....	108
6.3	Controller Tuning .....	111
6.3.1	Potential Problem in Ziegler–Nichols Tuning .....	111
6.3.2	Modified Ziegler–Nichols Method .....	111
6.3.3	Performance Evaluation: Linear Model .....	115
6.4	Properties .....	117
6.4.1	Convergence .....	117
6.4.2	Tuning Sequence .....	119
6.4.3	Problem of Variable Pairing .....	120
6.4.4	Summary of Procedure .....	122
6.5	Applications .....	123
6.5.1	Moderate-purity Column .....	123
6.5.2	High-purity Column .....	124
6.5.3	T4 Column .....	128
6.6	Conclusion .....	130
6.7	References .....	130
	Appendix .....	132
<b>7</b>	<b>Load Disturbance .....</b>	<b>135</b>
7.1	Problems .....	135
7.1.1	Step Change versus Continuous Cycling .....	135
7.1.2	Effect of Load Change on Relay Feedback Test .....	138
7.2	Analyses .....	139
7.2.1	Causes of Errors .....	139
7.2.2	Output-biased Relay Feedback System .....	142
7.2.3	Derivation of Bias Value $\delta_o$ .....	144
7.2.3.1	Effect of Load Disturbance .....	144
7.2.3.2	Opposite Effect from Output-biased Relay .....	146
7.3	Summary of Procedure .....	148
7.4	Applications .....	149
7.4.1	Linear System .....	150
7.4.2	Binary Distillation Column .....	152
7.5	Conclusion .....	153
7.6	References .....	154
<b>8</b>	<b>Multiple Models for Process Nonlinearity .....</b>	<b>155</b>
8.1	Autotuning and Local Model .....	156
8.2	Model Scheduling .....	157
8.2.1	Takagi–Sugeno Fuzzy Model .....	157
8.2.1.1	Single Input Systems .....	158
8.2.1.2	Multiple Inputs Systems .....	160
8.2.2	Selection of Scheduled Variable .....	162
8.3	Nonlinear Control Applications .....	163
8.3.1	Transfer Function System .....	163
8.3.2	Tennessee Eastman Process .....	167

8.4 Conclusion.....	173
8.5 References .....	173
<b>9 Control Performance Monitoring.....</b>	<b>175</b>
9.1 Shape Factor for Monitoring.....	176
9.1.1 Shapes of the Relay Feedback .....	176
9.2 Performance Monitoring and Assessment .....	179
9.2.1 Optimal Performance .....	179
9.2.2 Proposed Monitoring and Assessment Procedure .....	180
9.2.2.1 Case 1: $\tau_I/\tau = 1$ .....	180
9.2.2.2 Case 2: $\tau_I/\tau > 1$ .....	180
9.2.2.3 Case 3: $\tau_I/\tau < 1$ .....	181
9.2.3 Illustrative Examples.....	184
9.3 Applications.....	188
9.3.1 Second-order Plus Dead Time Processes.....	188
9.3.2 High-order Processes .....	193
9.4 Conclusion.....	196
9.5 References .....	196
<b>10 Imperfect Actuators .....</b>	<b>197</b>
10.1 Potential Problems .....	197
10.2 Identification Procedure .....	202
10.2.1 Two-step Procedure .....	202
10.2.2 Simultaneous Identification .....	205
10.3 Applications.....	206
10.3.1 Linear Systems.....	206
10.3.1.1 Noise-free System.....	206
10.3.1.2 Systems with Measurement Noise.....	207
10.3.1.3 Load Disturbance.....	210
10.3.2 Nonlinear Process .....	212
10.3.2.1 Two-step Procedure .....	212
10.3.2.2 Simultaneous Procedure.....	212
10.4 Conclusion.....	216
10.5 References .....	217
<b>11 Autotuning for Plantwide Control Systems .....</b>	<b>219</b>
11.1 Recycle Plant .....	219
11.2 Control Structure Design .....	222
11.2.1 Unbalanced Schemes.....	222
11.2.1.1 Column Overwork .....	222
11.2.1.2 Reactor Overwork.....	226
11.2.2 Balanced Scheme.....	227
11.2.3 Controllability.....	228
11.2.4 Operability.....	231
11.3 Controller Tuning for Entire Plant .....	232
11.3.1 Tuning Steps.....	233

11.3.1.1 Inventory Control .....	233
11.3.1.2 Ratio Control .....	233
11.3.1.3 Quality Loop .....	235
11.3.2 Closed-loop Performance .....	238
11.4 Conclusion .....	242
11.5 References .....	242
<b>12 Guidelines for Autotune Procedure .....</b>	<b>245</b>
12.1 Process Characteristics .....	245
12.1.1 The Shape .....	245
12.1.2 Load Disturbance .....	246
12.1.3 Nonlinearity .....	246
12.1.4 Noise .....	247
12.1.5 Imperfect Actuator .....	248
12.2 Available Relays .....	248
12.3 Specifications .....	249
12.3.1 Direct Tuning .....	249
12.3.2 Model-based Tuning .....	251
12.3.3 Multiloop System .....	252
12.4 Discussion .....	256
12.5 Conclusion .....	257
12.6 References .....	258
