## Part I Issues of Information Technology

---

<b>1</b>	<b>Introduction</b>	3
1.1	Preliminaries	3
1.2	General Problem-solving Framework	5
1.3	View from Artificial Intelligence Position	7
1.4	Composite Systems and Problems	8
1.5	Basic System Technological Problems	10
1.6	Information Support	11
1.7	Summary	11
<b>2</b>	<b>Components of Information Technology</b>	13
2.1	Properties of Information Technology	13
2.2	Information and Hierarchical Structuring	13
2.2.1	Schemes and Methods	13
2.2.2	Approaches to Knowledge Acquisition	15
2.2.3	Some Hierarchical Information Systems	16
2.2.4	Our Framework	17
2.3	Decision-making Paradigm	18
2.3.1	Decision-making Framework	18
2.3.2	Towards Architecture of Decision Support Systems	18
2.3.3	Four-domain Decision Making	20
2.3.4	Basic Structures	20
2.3.5	Multicriteria Ranking	22
2.4	Specialist	22
2.4.1	Role of the Specialist	22
2.4.2	Professional Levels	23
2.5	Solving Frameworks	23
2.5.1	Search Spaces and Strategies	23
2.5.2	Heuristics	25
2.5.3	Metaheuristics	26
2.5.4	Algorithm Systems	26
2.6	Summary	28

---

**Part II System Approaches**

---

<b>3</b>	<b>Systems: Models, Analysis, and Synthesis</b>	31
3.1	System, Frames, and Modularity	31
3.1.1	System and Structural Modeling	31
3.1.2	Two Basic Frames	32
3.1.3	Modular, Component-based Systems	33
3.2	System Analysis	34
3.2.1	Principles of System Analysis	34
3.2.2	Measurement Issues	34
3.2.3	System Properties, Requirements, and Criteria	35
3.3	System Synthesis	36
3.3.1	Approaches to System Design/Synthesis	36
3.3.2	Hierarchical Morphological Approach	38
3.3.3	Towards Efficiency of Combinatorial Synthesis	42
3.3.4	Multistage Design/Planning: Example	42
3.4	Multicriteria Evaluation of Composite Systems	46
3.4.1	Preliminaries	46
3.4.2	Traditional Approaches to Multicriteria Evaluation	48
3.4.3	Morphological Clique Problem for Evaluation	50
3.4.4	Usage of Poset-like Scales for System Components	50
3.5	Summary	50
<b>4</b>	<b>Issues of Systems Engineering</b>	53
4.1	Life-cycle Engineering	53
4.1.1	Basic Stages of the Life Cycle	53
4.1.2	Design/Management Problems and Life Cycle	53
4.1.3	System Requirements	55
4.1.4	System Design	55
4.1.5	System Redesign and Bottlenecks	56
4.2	Maintenance of Composite Systems	57
4.3	Multistage/Trajectory Design	59
4.3.1	Preliminaries	59
4.3.2	Morphological Scheme of Product	60
4.3.3	Multistage Product Trajectory	61
4.3.4	Design of Tree-like Trajectory	63
4.4	Summary	64
<b>5</b>	<b>System Development and Evolution</b>	65
5.1	Preliminaries	65
5.2	Short Survey	66
5.3	Basic System Models	67
5.4	Combinatorial Operations	67
5.4.1	Change Operations	67
5.4.2	Exchange Operations	68
5.4.3	Binary Relations over Change Operations	69

5.4.4	Multicriteria Description .....	69
5.5	Technological Evolution Problems .....	69
5.6	Combinatorial Problems .....	70
5.6.1	One-stage System Change .....	70
5.6.2	Multistage System Change .....	70
5.6.3	Auxiliary Problems .....	71
5.7	Extended Cycle of System Evolution .....	71
5.8	Applications .....	71
5.9	Summary .....	74
<b>6</b>	<b>Configuration and Multi-product Systems .....</b>	<b>75</b>
6.1	Configuration .....	75
6.2	Product Family .....	76
6.3	Multi-product System: Common Modules .....	77
6.3.1	Preliminaries .....	77
6.3.2	Two-level Hierarchy .....	77
6.3.3	Structural Models .....	84
6.3.4	Complex Design Problems .....	86
6.4	Summary .....	91

---

## Part III Applied Systems Decisions

---

<b>7</b>	<b>Synthesis of Composite Packaged Software .....</b>	<b>95</b>
7.1	Preliminaries .....	95
7.2	Approaches to Software Development .....	96
7.3	Criteria for Evaluation of Software .....	97
7.4	Assessment of Interconnection .....	97
7.5	Example of Modular Design .....	98
7.5.1	Model of Composite Applied Software .....	98
7.5.2	Hierarchy of Criteria .....	98
7.5.3	Comparison of Initial Alternatives for Components ....	99
7.5.4	Composing of Subsystem Alternatives .....	99
7.5.5	Composition and Analysis of System Alternatives ....	100
7.5.6	Redundancy of Alternatives .....	102
7.6	Example of Multistage Design .....	103
7.6.1	Aggregation Method .....	104
7.6.2	Trajectory Method .....	105
7.7	Summary .....	106
<b>8</b>	<b>Improvement of Buildings .....</b>	<b>107</b>
8.1	Evaluation and Redesign of Buildings .....	107
8.2	Scheme for Improvement/Redesign .....	109
8.3	Structure of Building, Criteria, and Scales .....	110
8.4	Basic Set of Improvement Actions .....	111
8.5	Numerical Examples .....	113
8.5.1	Evaluation Example: Integration Tables .....	113

8.5.2	Evaluation Example: Morphological Design . . . . .	114
8.5.3	Improvement Actions and Criteria . . . . .	118
8.5.4	Improvement Process . . . . .	120
8.6	Summary . . . . .	122
<b>9</b>	<b>Planning in Concrete Macrotechnology . . . . .</b>	<b>123</b>
9.1	Preliminaries . . . . .	123
9.2	Concrete Macrotechnology . . . . .	123
9.2.1	Basic Initial Information . . . . .	124
9.2.2	Example for Normal Weight Concrete 300 . . . . .	125
9.2.3	Example for System Improvement . . . . .	128
9.2.4	Example for Series-Parallel Production Process . . . . .	128
9.2.5	Example for Multistage Design . . . . .	128
9.3	Summary . . . . .	129
<b>10</b>	<b>Transformation of a Specialist's Profile . . . . .</b>	<b>131</b>
10.1	Preliminaries . . . . .	131
10.2	Example of Retraining . . . . .	131
10.3	Summary . . . . .	134
<b>11</b>	<b>Planning of Medical Treatment . . . . .</b>	<b>135</b>
11.1	Preliminaries . . . . .	135
11.2	Medical Treatment . . . . .	135
11.2.1	Structure of Medical Plan and Alternatives . . . . .	135
11.2.2	Criteria and Estimates . . . . .	136
11.2.3	Compatibility of Local Decisions . . . . .	137
11.2.4	Composite Decisions . . . . .	138
11.3	Adaptation, Improvement, and Multistage Planning . . . . .	140
11.3.1	Adaptation . . . . .	140
11.3.2	Improvement of Decisions . . . . .	141
11.3.3	Multistage Planning . . . . .	141
11.4	Discussion . . . . .	142
11.4.1	Towards Medical Decision Support Systems . . . . .	142
11.4.2	Issues of Knowledge Acquisition . . . . .	142
11.5	Summary . . . . .	143
<b>12</b>	<b>Design of Immunoassay Technology . . . . .</b>	<b>145</b>
12.1	Preliminaries . . . . .	145
12.2	Immunoassay . . . . .	145
12.3	Structure of Immunoassay System . . . . .	146
12.4	Numerical Example . . . . .	147
12.4.1	Alternative Local Decisions . . . . .	147
12.4.2	Compatibility of Local Decisions . . . . .	152
12.4.3	Design of Composite Decisions for Stages . . . . .	152
12.4.4	System Structure with Design Alternatives . . . . .	153
12.4.5	Compatibility for Stages . . . . .	154
12.4.6	Resultant Composite Decisions . . . . .	154
12.5	Summary . . . . .	154

<b>13 Common Part of Digraphs</b>	155
13.1 Preliminaries	155
13.2 Common Part of Two Digraphs	156
13.2.1 Problem Formulation	156
13.2.2 Basic Relations	158
13.2.3 Ordinal Weights of Arcs and Comparison Binary Relation	162
13.3 Common Part of Several Digraphs	165
13.3.1 Description of Arcs and Compatibility	165
13.3.2 Solving Scheme and Algorithm	167
13.3.3 Example	167
13.3.4 Discussion	168
13.4 Additional Issues	169
13.5 Summary	170
<b>14 The Last Mile Problem</b>	173
14.1 Preliminaries	173
14.2 Description of the Problem	173
14.3 Alternatives, Criteria, and Compatibility	173
14.4 Composite Decisions	174
14.5 Summary	176
<b>15 Combinatorial Model of Political Administration</b>	177
15.1 Preliminaries	177
15.2 General Frame	177
15.3 Schemes of Political Administration	178
15.4 Summary	179

---

## Part IV Educational Issues

---

<b>16 General Engineering</b>	183
16.1 Preliminaries	183
16.2 Generalized Overview	184
16.2.1 Trends in Engineering	184
16.2.2 Basic Design Flow	185
16.2.3 Educational Components	186
16.2.4 Educational Program	187
16.3 Implementation	187
16.3.1 Implementation of Program	187
16.3.2 Towards Organizational Structure	189
16.4 Summary	191
<b>17 Design of Systems (Structural Approach)</b>	193
17.1 Preliminaries	193
17.2 Fundamentals	194
17.3 Lectures	195
17.4 Laboratory Work	196

17.5 Textbooks .....	197
17.6 Summary .....	197
<b>18 Applied Combinatorial Optimization .....</b>	<b>199</b>
18.1 Preliminaries .....	199
18.2 Goals and Structure .....	200
18.3 Multi-layer Teaching .....	201
18.4 Lectures and Projects .....	202
18.5 Textbooks .....	204
18.6 Summary .....	204
<b>Conclusion .....</b>	<b>205</b>
<b>References .....</b>	<b>207</b>
<b>About the Author .....</b>	<b>247</b>
<b>Index .....</b>	<b>249</b>
