
Contents

<i>Foreword</i>	xiii
<i>Preface</i>	xv
Part I INTRODUCTION TO NETWORKING	I
CHAPTER 1 <i>Introduction</i>	3
1.1 Why Java?	3
1.2 Organization	4
1.3 Terminology and conventions	5
1.4 Examples	6
Part II IP — INTERNET PROTOCOL	7
CHAPTER 2 <i>Fundamentals of IP</i>	9
2.1 IP	9
2.2 Network addressing	10
2.3 Multi-homing	13
2.4 IPV6	14

Part III TCP — TRANSMISSION CONTROL PROTOCOL 17

CHAPTER 3	<i>Fundamentals of TCP</i>	19
3.1	Basic TCP sockets	19
3.2	Features and costs of TCP	24
3.3	Socket initialisation—servers	27
3.4	Socket initialisation—clients	32
3.5	Accepting client connections	37
3.6	Socket I/O	38
3.7	Termination	43
3.8	Socket factories	48
3.9	Permissions in TCP	51
3.10	Exceptions in TCP	51
3.11	Socket options	54
3.12	Socket timeouts	54
3.13	Socket buffers	56
3.14	Multi-homing	59
3.15	Nagle's algorithm	60
3.16	Linger on close	61
3.17	Keep-alive	63
3.18	Urgent data	65
3.19	Traffic class	66
3.20	Performance preferences	68
3.21	Putting it all together	69
CHAPTER 4	<i>Scalable I/O</i>	73
4.1	Introduction	73
4.2	Channels	75
4.3	Buffers	80
4.4	Non-blocking I/O	96
4.5	Multiplexing	98
4.6	Concurrent channel operations	109
4.7	Exceptions in new I/O	113
CHAPTER 5	<i>Scalable TCP</i>	117
5.1	Channels for TCP	117
5.2	TCP channel operations	119
5.3	Multiplexing in TCP	124

CHAPTER 6	<i>Firewalls</i>	129
6.1	Types of firewall	129
6.2	SOCKS	132
6.3	HTTP tunnelling	133
6.4	Java solutions	133
6.5	Network Address Translation	134
CHAPTER 7	<i>Secure Sockets</i>	135
7.1	A brief introduction to security	135
7.2	Introduction to SSL	136
7.3	Secure sockets in Java	141
7.4	Socket factory methods	143
7.5	Secure socket operations	146
7.6	Sessions	155
7.7	Binding & binding listeners	159
7.8	Session context	160
7.9	JSE and channel I/O	162
7.10	SSL and RMI	162
7.11	Debugging	164
7.12	The SSLContext	165
7.13	Recommendations	168
7.14	HTTPS	170
7.15	Exceptions in JSE	172
7.16	SSL system properties	173
7.17	Sample SSL client and server	175
7.18	The Java GSS-API	181
CHAPTER 8	<i>Scalable secure sockets</i>	185
8.1	Introduction	185
8.2	The SSLEngine class	186
8.3	Designing an SSLEngineManager class	191
8.4	Implementing the SSLEngineManager class	193
8.5	Using the SSLEngineManager class	205
8.6	Exercises	212
Part IV	UDP — USER DATAGRAM PROTOCOL	215
CHAPTER 9	<i>Unicast UDP</i>	217
9.1	Overview	217
9.2	Simple UDP servers and clients	221

9.3	Datagram socket initialization	229
9.4	Datagram I/O	233
9.5	Termination	235
9.6	Socket factories	236
9.7	Permissions	237
9.8	Exceptions	237
9.9	Socket options	239
9.10	Timeout	239
9.11	Buffers	240
9.12	Multi-homing	241
9.13	Traffic class	243
9.14	Putting it all together	243
9.15	Reliable UDP	245
CHAPTER 10 <i>Scalable UDP</i>		261
10.1	Channels for UDP	261
10.2	DatagramChannel I/O	262
10.3	Multiplexing	264
CHAPTER 11 <i>Multicast UDP</i>		269
11.1	Introduction	269
11.2	Benefits	275
11.3	Limitations	275
11.4	Applications of multicast	277
11.5	Broadcasting in Java	278
11.6	Multicasting in Java	281
11.7	Multicasting and channel I/O	290
11.8	Broadcast and multicast permissions	291
11.9	Multicast address allocation	291
11.10	Reliable multicast	292
Part V IN PRACTICE		297
CHAPTER 12 <i>Server and client models</i>		299
12.1	Import statements	300
12.2	Servers	300
12.3	Channel I/O servers	319
12.4	Client models	334
12.5	JDK 1.5 executors	336
12.6	Staged event-driven architectures	336

CHAPTER 13	<i>Fallacies of networking</i>	339
13.1	Eight fallacies of networking	339
13.2	Further fallacies	342
13.3	In conclusion	345
Part VI	APPENDICES	347
A	TCP port states	349
B	Platform dependencies	353
C	References	357
	Java Cross-Index	359
	General Index	373
