
Contents

Part I Background

1 What Is an Agent? And What Is an Agent Community?	
<i>Walter F. Truszkowski</i>	3
2 Introduction to Formal Methods	
<i>Michael Hinchey, Jonathan P. Bowen, and Christopher A. Rouff</i>	25
3 Formal Methods and Agent-Based Systems	
<i>Michael Luck and Mark d’Inverno</i>	65

Part II Formal Methods in Agent Design

4 A Process-Algebraic Agent Abstraction	
<i>Albert Esterline, Toinette Rorie, and Abdollah Homaifar</i>	99
5 Dynamic Team Formation in Executable Agent-Based Systems	
<i>Michael Fisher, Chiara Ghidini, and Antony Kakoudakis</i>	139
6 Scenario-Based Engineering of Multi-Agent Systems	
<i>Jon Whittle and Johann Schumann</i>	159

Part III Formal Agent Verification and Redesign

7 Verification Within the KARO Agent Theory	
<i>Ullrich Hustadt, Clare Dixon, Renate A. Schmidt, Michael Fisher, John-Jules Charles Meyer, and Wiebe van der Hoek</i>	193

8 Assuring the Behavior of Adaptive Agents	
<i>Diana F. Spears</i>	227
9 Agents in a Wild World	
<i>Tim Menzies and Ying Hu</i>	259

Part IV Significant Applications

10 Formal Methods at NASA Goddard Space Flight Center	
<i>Christopher A. Rouff, James L. Rash, Michael G. Hinchey, and Walter F. Truszkowski</i>	287
11 Formal Verification of Autonomy Models	
<i>Charles Pecheur, Reid Simmons, and Peter Engrand</i>	311
A Walking And-Or Graphs in Linear Time	
<i>Tim Menzies and Ying Hu</i>	341
Index	343

Agent Technology from a Formal Perspective

Rouff, C.; Hinchey, M.; Rash, J.; Truszkowski, W.;

Gordon-Spears, D.F. (Eds.)

2006, XVI, 354 p., Hardcover

ISBN: 978-1-85233-947-0
