

# Contents

- List of Authors ..... xix
- 1 Modelling of the Manufacturing Processes..... 1
  - 1.1 Manufacturing Systems in Electronics Production ..... 1
  - 1.2 Abstract Manufacturing Systems ..... 4
    - 1.2.1 Principles and Terms ..... 4
    - 1.2.2 Scheduling ..... 15
    - 1.2.3 Static Process Model ..... 19
  - 1.3 Characteristics of Technological Processes..... 29
    - 1.3.1 The Technological Process Term ..... 29
    - 1.3.2 Characteristics ..... 33
  - 1.4 Process Characteristic..... 47
    - 1.4.1 Explanation of the Process Characteristic Term..... 47
    - 1.4.2 Operating Point for Technological Processes..... 50
    - 1.4.3 Adjustment Point and Eccentricity ..... 50
    - 1.4.4 Variation Width of Technological Processes ..... 53
    - 1.4.5 Process Capability ..... 54
    - 1.4.6 Normal-distributed Process Characteristic ..... 54
  - 1.5 Measurement Characteristic ..... 55
    - 1.5.1 Measurement Process – Principles and Terms ..... 55
    - 1.5.2 Measurement and Chance..... 56
    - 1.5.3 Measured Process Characteristic ..... 57
    - 1.5.4 True and Measured Yield ..... 58
  - References ..... 59- 2 Structures, Graphs and Networks..... 61
  - 2.1 Directed Graphs..... 61
  - 2.2 Network Planning..... 64
    - 2.2.1 Principles ..... 64
    - 2.2.2 CPM Network and Equivalent Representations ..... 65
    - 2.2.3 Determining Dates in the Network..... 67
    - 2.2.4 Calculation of Buffer Times in the Network ..... 70
    - 2.2.5 Strategies in Network Planning ..... 70
    - 2.2.6 CPM Cost ..... 72

2.3	Product-flow Graphs .....	74
2.3.1	Weighting Function for Technological Processes .....	74
2.3.2	Operator Technological Processes.....	78
2.3.3	Basic Structures of Technological Processes .....	81
2.3.4	General Structures, Regularities, Relationships .....	84
2.4	Queue Models.....	89
2.4.1	Demand Flows.....	90
2.4.2	Classification of Queuing Systems.....	96
2.4.3	Loss System M/M/1/0 .....	96
2.4.4	Systems with Queue .....	102
2.5	Petri Nets .....	105
2.5.1	Definition.....	105
2.5.2	Example.....	111
2.5.3	Elementary Links in Petri Nets.....	114
2.5.4	Extended Petri Nets .....	116
	References .....	117
3	Simulation of Manufacturing Processes.....	119
3.1	Principles of the Simulation Methods .....	119
3.1.1	Definition of Terms .....	119
3.1.2	Discrete Event Simulation.....	120
3.1.3	Uses for the Simulation .....	123
3.2	Simulation Project .....	124
3.2.1	Preparation.....	124
3.2.2	Performing the Experiment .....	127
3.2.3	Evaluation.....	128
3.3	Analysis of the Simulation Results.....	128
3.3.1	Event Trace.....	128
3.3.2	Online Evaluations .....	130
3.3.3	Characteristic Variables.....	131
3.3.4	Representation Forms .....	135
3.4	The simcron MODELLER .....	142
3.4.1	Overview .....	142
3.4.2	Model Objects .....	143
3.4.3	Simulation Run .....	151
3.4.4	Report .....	152
3.5	Simulation Models.....	152
3.5.1	Flow Shop and Operating Curve .....	152
3.5.2	Cluster in Semiconductor Production.....	155
3.5.3	Quality Processes of Printed-Circuit Board Production .....	156
3.5.4	Job Shop in Electronics Manufacturing.....	158
3.6	Process-accompanying Simulation.....	161
3.6.1	Template Model.....	162

3.6.2	Integration .....	163
3.6.3	Comparison of Reality and Simulation .....	167
3.6.4	Model Adaptation .....	170
	References .....	171
4	Optimisation of Technological Processes .....	173
4.1	Calculation of Extreme Values .....	173
4.2	Linear Programming .....	175
4.2.1	Optimisation of Product Volumes – Problem .....	176
4.2.2	Optimisation of Product Volumes – Solution Method .....	176
4.2.3	Exchange Method and Simplex Algorithm .....	180
4.3	Dynamic Programming .....	184
4.3.1	Introduction .....	184
4.3.2	Example .....	184
4.3.3	Problem Definition for Dynamic Programming .....	186
4.3.4	Bellman Recursion Equation .....	187
4.3.5	Dynamic Programming Strategy .....	190
4.4	Simulation-based Optimisation .....	191
4.4.1	Principles .....	191
4.4.2	Optimisation Cycle .....	195
4.4.3	Search Algorithms .....	198
4.5	Optimisation with Several Goals .....	201
	References .....	205
5	Quality Assurance .....	207
5.1	General Goals and Terms .....	207
5.2	Description of Quality Characteristic Variables .....	209
5.2.1	Quality Characteristic Variables as Random Value .....	209
5.2.2	Calculation of Probabilities .....	210
5.3	Discrete Quality Characteristics and their Distributions .....	212
5.3.1	Discrete Quality Characteristic Variables .....	212
5.3.2	Discrete Probability Distribution .....	213
5.3.3	Distribution Function .....	214
5.3.4	Parameters for Discrete Probability Distributions .....	215
5.3.5	Important Discrete Probability Distributions .....	217
5.3.6	Uses in Module Production .....	220
5.4	Distribution Functions of Continuous Quality Characteristics .....	222
5.4.1	Continuous Quality Characteristic Variables .....	222
5.4.2	Density Function .....	222
5.4.3	Distribution Function .....	223
5.4.4	Parameters .....	224
5.4.5	Important Continuous Distributions .....	225
5.5	Evaluation of Quality Data and Point Estimates .....	230

5.5.1	Obtaining a Sample .....	230
5.5.2	Calculation of Statistical Measured Values .....	233
5.5.3	Random Sample and Sample Functions .....	235
5.5.4	Distributions and Parameters of Sample Functions .....	236
5.5.5	Point Estimates for Quality Characteristic Variables .....	238
5.6	Statistic Test and Interval Estimate for Quality Characteristics ...	241
5.6.1	General Problem Definition .....	241
5.6.2	Testing the Continuous Quality Characteristic Values .....	242
5.6.3	Comparing Continuous Quality Characteristic Values .....	246
5.6.4	Test Procedure for Discrete Quality Characteristic Values ..	251
5.6.5	Testing of Distributions .....	252
5.6.6	Confidence Estimates .....	254
5.7	Quality–Control Charts .....	257
5.7.1	Introduction .....	257
5.7.2	Process Types .....	258
5.7.3	Shewhart Quality–Control Charts .....	260
5.7.4	Control Charts .....	265
5.7.5	Operations Characteristics of Quality–Control Charts .....	271
5.7.6	Estimating Process Parameters Using a Preliminary Run ...	274
5.8	Quality Capability of Processes .....	278
5.8.1	Process Capability .....	278
5.8.2	Machine Capability .....	281
5.9	Acceptance Sample Test .....	282
5.9.1	Introduction .....	282
5.9.2	Single Sampling Plans .....	284
5.9.3	Determination of Single Sampling Plans .....	289
5.9.4	Double and Multiple Sampling Plans .....	290
5.9.5	Sequential Plans .....	293
5.9.6	Sample Test for the Number of Defects per Unit .....	295
5.9.7	Variable Sampling Plans .....	295
5.9.8	Sampling Systems .....	298
	References .....	301
6	Process Cost Optimisation .....	303
6.1	Process Chains in Electronics Manufacturing .....	303
6.1.1	Principal Technologies of Electronics Production .....	303
6.1.2	Quality Assurance in Modern Electronics Production .....	307
6.2	Quality Cost Optimisation to Reduce Process Costs .....	310
6.2.1	Goal of Quality Cost Optimisation .....	310
6.2.2	Yield $y$ and Defect Rate $p$ .....	311
6.2.3	Basic Quality Cost Model and Quality Distribution .....	313
6.2.4	Extensions to the Basic Quality Cost Model .....	321
6.2.5	Features of the Inspection Process .....	328

6.2.6 Cost Model for the Sampling Test.....	331
6.3 Effects of Process Optimisation .....	337
6.4 Dynamic Programming to Solve Complex Process Chains .....	340
References .....	346
7 Design of Experiments and Regression Analyses .....	349
7.1 General Goals .....	349
7.2 Regression Analysis .....	350
7.2.1 Problem Specification .....	350
7.2.2 Simple Linear Regression.....	352
7.2.3 Dual Linear Regression .....	358
7.2.4 Restrictions for Performing Regressions.....	359
7.3 Variance Analysis.....	360
7.4 Design of Experiments .....	363
7.4.1 Complete Factorial Test Designing.....	363
7.4.2 Reduced Test Designs .....	367
7.4.3 Test Designs with Repetitions .....	371
7.4.4 Test Designs for Nonlinear Relationships.....	371
7.4.5 Special Response Variables.....	373
7.4.6 Practical Recommendations for Designing Tests.....	374
7.4.7 Investigation of a Wave Soldering Bath.....	377
References .....	387
8 Reliability of Products and Processes .....	389
8.1 Reliability Characteristics and Models.....	389
8.2 Terms and Reliability Characteristics .....	389
8.3 Lifetime Distributions .....	393
8.3.1 Exponential Distribution .....	393
8.3.2 Weibull Distribution.....	393
8.3.3 Use of Lifetime Distributions.....	395
8.4 Reliability Tests.....	396
8.4.1 Graphical Evaluations of Reliability Data.....	396
8.4.2 Computed Evaluations of the Results.....	398
8.5 Markov Chains .....	402
8.5.1 Technological Process with Two States .....	402
8.5.2 Two Technological Processes .....	406
8.5.3 Technological Processes with More than Two States .....	407
8.5.4 Markov Chains with Infinitely Many States.....	408
8.6 Multidimensional Process and Test Characteristics .....	409
8.6.1 Two-dimensional Process Characteristic.....	409
8.6.2 Process Equation .....	411
8.6.3 Two-dimensional Process Operator .....	412
8.6.4 Chain Structure of Two Technological Processes.....	412

8.6.5 Measured Process Characteristic .....	414
8.6.6 Measured Process Equation.....	415
8.7 Reliability of Technological Processes.....	416
8.7.1 Process Defect Rate for Several Quality Characteristics.....	416
8.7.2 Operating Point Drift.....	418
8.7.3 Momentary Yield.....	420
8.7.4 Test Blurring.....	422
References .....	428
9 Assembly Accuracy Theory .....	429
9.1 Introduction .....	429
9.2 Positioning Tasks for the Solder Paste Application .....	430
9.2.1 Machine Accuracy (Positioning Accuracy).....	430
9.2.2 Assembly Accuracy .....	434
9.3 Positioning Actions for Component Placing .....	436
9.4 Improvement of the Assembly Accuracy .....	441
9.5 Assembly Accuracy as Quality Characteristic Variables .....	442
9.5.1 Introduction .....	442
9.5.2 Placement of Components with Peripheral Leads .....	444
9.5.3 Placement of Area-array Components.....	447
9.5.4 Positioning Accuracy as Random Variable .....	452
9.5.5 Defect Rate for Placement .....	455
9.6 Machine and Process Capability.....	461
References .....	463
Appendix – Tables.....	465
Index.....	473

Electronics Process Technology

Production Modelling, Simulation and Optimisation

Sauer, W.; Oppermann, M.; Weigert, G.; Werner, S.;

Wohlrabe, H.; Wolter, K.-J.; Zerna, Th.

2006, XX, 482 p. 281 illus., Hardcover

ISBN: 978-1-84628-353-6
