

## Contents

---

### Part I Astronomical Evidence for Dark Matter

---

<b>The Milky Way's Black Hole and the Central Stellar Cluster: Variable Emission from SgrA</b>	
<i>A. Eckart et al.</i> .....	3
<b>Indirect Evidence for WIMP Annihilation from Diffuse Galactic Gamma Rays</b>	
<i>W. de Boer</i> .....	12
<b>Probing Dark Objects with Gravitational Lensing</b>	
<i>K. Griest</i> .....	27
<b>Cosmological Interpretation from High Redshift Clusters Observed Within the XMM-Newton <math>\Omega</math>-Project</b>	
<i>A. Blanchard</i> .....	34
<b>Wakes in Dark Matter Halos</b>	
<i>B. Fuchs</i> .....	47
<b>Relic Neutrino Clustering and Implications for Their Detection</b>	
<i>A. Ringwald and Y.Y.Y. Wong</i> .....	62
<b>Shadow Shapes Around the Black Hole in the Galactic Centre</b>	
<i>A.F. Zakharov, A.A. Nucita, F. DePaolis, and G. Ingrosso</i> .....	77

---

### Part II Direct Hot and Cold Dark Matter Detection Search

---

<b>Neutrinoless Double Beta Decay – and Hot Dark Matter</b>	
<i>H.V. Klapdor-Kleingrothaus</i> .....	93

<b>DAMA/NaI Results on Dark Matter Particles by Annual Modulation Signature</b> <i>R. Bernabei et al.</i> .....	116
<b>DAMA/LIBRA and Beyond</b> <i>R. Bernabei et al.</i> .....	138
<b>The GENIUS-Test-Facility and the HDMS Detector in GRAN SASSO</b> <i>H.V. Klapdor-Kleingrothaus, I.V. Krivosheina</i> .....	149
<b>First CDMS II WIMP Search Results from the Soudan Underground Laboratory</b> <i>D.S Akerib et al.</i> .....	163
<b>Dark Matter Search at Boulby Mine</b> <i>R. Lüscher (for the UK Dark Matter Collaboration)</i> .....	185
<b>Prospects for the Detection of SUSY Dark Matter</b> <i>D.B. Cline</i> .....	195
<b>Status of ZEPLIN II and ZEPLIN III</b> <i>G.J. Alner et. al.</i> .....	208
<b>The XENON Dark Matter Experiment</b> <i>E. Aprile (on behalf of the XENON Collaboration)</i> .....	220
<b>Recent Status of the XMASS Project</b> <i>C. Mitsuda</i> .....	234
<b>DRIFT and Prospects for a Large Scale Directional WIMP Detector</b> <i>J.C. Davies and N.J.C. Spooner (for the DRIFT Collaboration)</i> .....	246
<b>COUPP, a Heavy-Liquid Bubble Chamber for WIMP Detection</b> <i>J. Bolte et al.</i> .....	254
<b>The SuperCDMS Experiment</b> <i>R.W. Schnee et al.</i> .....	259
<b>WIMP-Wind Detection with an Advanced Gaseous Tracking Device</b> <i>A. Takeda et al.</i> .....	269
<b>SIGN, a WIMP Detector Based on High Pressure Gaseous Neon</b> <i>J.T. White et al.</i> .....	276

<b>Exploring Novel Signatures in Direct Neutralino Searches</b>	
<i>J.D. Vergados</i> .....	285

---

### Part III Collider and Search for Dark Matter

---

<b>Indirect, Direct and Collider Detection of SUSY Dark Matter</b>	
<i>H. Baer</i> .....	299
<b>Dark Matter and Colliders</b>	
<i>R. Arnowitt et al.</i> .....	308
<b>Dark Matter Limits from the g-2 Experiment</b>	
<i>P. Cushman</i> .....	323
<b>RPV Neutralino Searches from LEP to LHC</b>	
<i>S. Costantini</i> .....	337
<b>Tripling the LHC: The Path from Technology to Discovery</b>	
<i>P. McIntyre and A. Sattarov</i> .....	348
<b>Update on the MINOS Experiment at the Fermilab Main Injector</b>	
<i>R.C. Webb (for the MINOS Collaboration)</i> .....	364

---

### Part IV Cosmology, Baryogenesis, Dark Energy

---

<b>Kinematics and Dark Energy from Supernovae at <math>z &gt; 1</math></b>	
<i>A.G. Riess</i> .....	377
<b>Low Redshift (<math>z &lt; 1</math>) Supernova Studies</b>	
<i>W.L. Freedman</i> .....	387
<b>Liouville Cosmology</b>	
<i>J. Ellis et al.</i> .....	396
<b>How Dark is ‘Dark’? Electromagnetic Interactions in the Dark Sector</b>	
<i>K. Sigurdson</i> .....	420
<b>Leptonic CP Violation and Baryon Asymmetry</b>	
<i>M.N. Rebelo</i> .....	432

XII Contents

<b>A New Type Baryogenesis: <math>Q</math>-Genesis</b> <i>J.E. Kim</i> .....	445
<b>Cosmological Constant and Gravity+Matter Self-Creation in a Cosmology with an Unbounded Hamiltonian Taking into Account Negative Energy of Gravity</b> <i>V.V. Kocharovsky, E.V. Derishev, and Vl.V. Kocharovsky</i> .....	454
<b>Precise Theory of Orbits in General Relativity, the Cosmological Constant and the Perihelion Precession of Mercury</b> <i>G.V. Kraniotis</i> .....	469
<b>Dark Matter and Pulsar Kicks from a Singlet Neutrino</b> <i>A. Kusenko</i> .....	480
<b>Dealing with Dark Energy</b> <i>E.V. Linder</i> .....	485
<b>Possible Influence of Dark Energy on the Dark Matter Relic Abundance</b> <i>A. Masiero and F. Rosati</i> .....	498
<b>Supersymmetric Dark Matter Q-balls and their Interactions with Matter</b> <i>L.C. Loveridge</i> .....	506
<b>Cosmology with Chandra Cluster Data</b> <i>A. Vikhlinin</i> .....	514
<b>Intrinsically Faint Quasars: Evidence for meV Axion Dark Matter in the Universe</b> <i>A.A. Svidzinsky</i> .....	523
<b>Quantum Theory of Neutrino Spin-Light in a Dense Matter</b> <i>A. Grigoriev, A. Studenikin and A. Ternov</i> .....	534
<hr/>	
<b>Part V SUSY/SUGRA Phenomenology in Dark Matter, New Symmetries</b>	
<hr/>	
<b>Upper Limits on Sparticle Masses from WMAP Dark Matter Constraints with Modular Invariant Soft Breaking</b> <i>U. Chattopadhyay and P. Nath</i> .....	547

<b>Dark Matter Candidates in Supersymmetric Models</b>	
<i>K.A. Olive</i> .....	560
<b>On the Mixed Spin-Scalar Coupling Approach in Dark Matter Search</b>	
<i>V.A. Bednyakov, H.V. Klapdor-Kleingrothaus</i> .....	583
<b>Light Neutralino Dark Matter in Gaugino Non-Universal Models</b>	
<i>N. Fornengo</i> .....	598
<b>How Can We Make Sure We Detect Dark Matter?</b>	
<i>P. Gondolo</i> .....	610
<b>From New Geometry Towards a New Symmetry. Reflexive Numbers and Berger Graphs from Calabi-Yau Spaces</b>	
<i>L.N. Lipatov et al.</i> .....	623
<b>List of Participants</b> .....	656
<b>Author Index</b> .....	663

Dark Matter in Astro- and Particle Physics  
Proceedings of the International Conference DARK  
2004, College Station, USA, 3-9 October, 2004  
Klapdor-Kleingrothaus, H.-V.; Arnowitt, R. (Eds.)  
2006, XX, 665 p. 305 illus., 8 illus. in color., Hardcover  
ISBN: 978-3-540-26372-2
