
Contents – Volume IV

23	Scanning Probe Lithography for Chemical, Biological and Engineering Applications	
	<i>Joseph M. Kinsella, Alben Ivanisevic</i>	1
23.1	Introduction	2
23.2	Modeling of the DPN Process	4
23.3	Patterning of Biological and Biologically Active Molecules	7
23.3.1	DNA Patterning	8
23.3.2	Protein Patterning	10
23.3.3	Peptide Patterning	13
23.3.4	Patterning of Templates for Biological Bottom-Up Assembly . . .	15
23.4	Chemical Patterning	17
23.4.1	Thiols	17
23.4.2	ω -Substituted Thiols	18
23.4.3	Silanes and Silazanes	19
23.4.4	Deposition of Solid Organic Inks	20
23.4.5	Polymers	21
23.4.6	Polyelectrolytes	23
23.4.7	Dendrimers	23
23.4.8	Deposition of Supramolecular Materials	24
23.4.9	Deposition of Metals	25
23.4.10	Deposition of Solid-State Materials	26
23.4.11	Deposition of Magnetic Materials	27
23.5	Engineering Applications of DPN	28
23.6	Future Challenges and Applications	30
23.7	Conclusions	31
	References	31

24	Nanotribological Characterization of Human Hair and Skin Using Atomic Force Microscopy (AFM)	
	<i>Bharat Bhushan, Carmen LaTorre</i>	35
24.1	Introduction	35
24.2	Human Hair, Skin, and Hair Care Products	39
24.2.1	Human Hair and Skin	39
24.2.2	Hair Care: Cleaning and Conditioning Treatments, and Damaging Processes	46
24.3	Experimental Techniques	51
24.3.1	Experimental Procedure	53
24.3.2	Hair and Skin Samples	57
24.4	Results and Discussion	59
24.4.1	Surface Roughness, Friction, and Adhesion for Various Ethnicities of Hair	59
24.4.2	Surface Roughness, Friction, and Adhesion for Virgin and Chemically Damaged Caucasian Hair (with and without Commercial Conditioner Treatment).	70
24.4.3	Surface Roughness, Friction, and Adhesion for Hair Treated with Various Combinations of Conditioner Ingredients	78
24.4.4	Investigation of Directionality Dependence and Scale Effects on Friction and Adhesion of Hair	85
24.4.5	Surface Roughness and Friction of Skin	98
24.5	Closure	98
	References	102
	Appendix	103
25	Nanofabrication with Self-Assembled Monolayers by Scanning Probe Lithography	
	<i>Jayne C. Garino, James D. Batteas</i>	105
25.1	SPM-Based Methods of Lithography	105
25.1.1	Bias-Induced Nanofabrication	107
25.1.2	Force-Induced Nanofabrication of SAMs	108
25.1.3	Dip-Pen Nanolithography (DPN).	110
25.1.4	Automated Scanning Probe Lithography	111
25.2	Patterning with Self-Assembled Monolayers	112
25.2.1	Structure of SAMs.	112
25.2.2	Examples of SAM Nanopatterns Generated by Force-Induced SPL	114
25.2.3	Nanofabrication of SAMs by DPN and Bias-Induced SPL	118
25.3	Directed Fabrication of Polymeric Structures	120

25.4	Fabrication of Metallic Structures	122
25.5	Nanoscale Patterning of Proteins	126
25.5.1	Protein Arrays Generated by DPN	127
25.5.2	Applying Bias-Induced SPL for Protein Nanopatterns	128
25.5.3	Protein Immobilization on SAMs Generated by Force-Induced SPL	129
25.6	Conclusions and Outlook	130
	References	131

26 Fabrication of Nanometer-Scale Structures by Local Oxidation Nanolithography

	<i>Marta Tello, Fernando García, Ricardo García</i>	137
26.1	Introduction to AFM Nanolithographies	137
26.2	Basic Local Oxidation Aspects	138
26.3	Mechanism and Kinetics	141
26.4	Feature Size	143
26.5	Applications I: Patterning, Data Storage and Template Growth . .	146
26.6	Applications II: Nanoelectronic Devices	151
26.7	Parallel Oxidation	154
	References	155

27 Template Effects of Molecular Assemblies Studied by Scanning Tunneling Microscopy (STM)

	<i>Chen Wang, Chunli Bai</i>	159
27.1	Introduction	159
27.2	Single Guest Molecule Immobilization with Assembled Molecular Networks	160
27.2.1	Hydrogen Bonded Supramolecular Networks and Single Molecule Inclusions	160
27.2.2	Van der Waals Interaction Stabilized Networks	163
27.2.3	Metal-Organic Coordination Networks	165
27.2.4	Covalently Bonded Molecular Grids	166
27.3	Intralayer Heterogeneous Molecular Arrays	166
27.3.1	Hydrogen Bond Stabilized Heterogeneous Lamellae	167
27.3.2	Van der Waals Interaction Stabilized Intralayer Arrays	168
27.4	Interlayer Effect on Molecular Adsorption and Assemblies	171
27.4.1	Site Selective Adsorption	172

27.4.2	Molecular Arrays	176
27.4.3	Directional Assembly of Nanoparticle Arrays	177
27.5	Future Perspectives	179
	References	179
28	Microfabricated Cantilever Array Sensors for (Bio-)Chemical Detection	
	<i>Hans Peter Lang, Martin Hegner, Christoph Gerber</i>	183
28.1	Introduction	183
28.1.1	Sensors	183
28.1.2	Cantilevers	184
28.1.3	Cantilever Operating Modes	186
28.1.4	Cantilever Arrays	192
28.2	Experimental Setup	196
28.2.1	Measurement Chamber	196
28.2.2	Cantilever Functionalization	198
28.3	Measurements	203
28.3.1	Artificial Nose for Detection of Perfume Essences	204
28.3.2	Label-Free DNA Hybridization Detection	206
28.4	Applications and Outlook	209
	References	210
29	Nano-Thermomechanics: Fundamentals and Application in Data Storage Devices	
	<i>B. Gotsmann, U. Dürig</i>	215
29.1	Introduction	215
29.2	Heat Transfer Mechanisms	215
29.2.1	Heat Generation in Microcantilevers	216
29.2.2	Heat Transfer Through Air and Silicon	217
29.2.3	Heat Transfer Through Radiation	222
29.2.4	Heat Transfer Through a Tip-Surface Point Contact	224
29.3	Momentum Transfer Through Air	227
29.4	Thermomechanical Nanoindentation of Polymers	229
29.4.1	General Considerations	229
29.4.2	Indentation Experiments	230
29.4.3	Interlude: Carbon Nanotube Tips	232
29.4.4	Interlude: Thermal Force and Indentation Formation	234
29.4.5	Interlude: Rim Formation on Polymer Samples	234
29.4.6	Indentation Kinetics and the Indentation Mechanism	236
29.4.7	Interlude: Thermo-Nano-Mechanics Without a Heater	239

29.5	Thermomechanical Nanowear Testing	241
29.6	Application to Data-Storage Devices	243
29.6.1	Introduction	243
29.6.2	Scaling Challenges for Nanoindentation of Polymers	245
References	248
30	Applications of Heated Atomic Force Microscope Cantilevers	
	<i>Brent A. Nelson, William P. King</i>	251
30.1	Introduction	251
30.2	Physical and Environmental Sensing	252
30.2.1	Pressure Sensing	252
30.2.2	Thermal Conductivity Mapping and Subsurface Imaging	253
30.2.3	Topographical Detection	258
30.3	Chemical Sensing Applications	261
30.3.1	Calorimetry	261
30.3.2	Mass Detection	262
30.3.3	Time-of-Flight Scanning Force Microscopy	263
30.3.4	Explosives Detection	264
30.4	Data Storage and Lithography	264
30.4.1	Data Storage	265
30.4.2	Lithography	269
30.5	Summary and Conclusions	272
References	272
Subject Index	277
