## List of Contents

Why RNA and DNA Have Different Structures . . . . .	1
<i>A. Rich</i>	
Regulatory RNAs as Mediators of Virulence Gene Expression in Bacteria . . . . .	9
<i>T. Geissmann, M. Possedko, E. Huntzinger, P. Fechter, C. Ehresmann, P. Romby</i>	
Regulatory RNAs in Mammals . . . . .	45
<i>M. Szymański, J. Barciszewski</i>	
Aminoglycoside Interactions with RNAs and Nucleases . . . . .	73
<i>L. A. Kirsebom, A. Virtanen, N. E. Mikkelsen</i>	
High-Throughput RNA Interference in Functional Genomics . . . . .	97
<i>M. Janitz, D. Vanhecke, H. Lehrach</i>	
Antiviral Applications of RNAi . . . . .	105
<i>K. V. Morris, J. J. Rossi</i>	
RNA Interference: Its Use as Antiviral Therapy . . . . .	117
<i>J. Haasnoot, B. Berkhout</i>	
Gene Silencing of Virus Replication by RNA Interference . . . . .	151
<i>N. Miyano-Kurosaki, H. Takaku</i>	
Progress in the Development of Nucleic Acid Therapeutics . . . . .	173
<i>A. Kalota, V. R. Dondeti, A. M. Gewirtz</i>	
Screening and Determination of Gene Function Using Randomized Ribozyme and siRNA Libraries . . . . .	197
<i>S. Matsumoto, H. Akashi, K. Taira</i>	
Ribozymes and siRNAs: From Structure to Preclinical Applications . . . . .	223
<i>M. Sioud</i>	
Strategies to Identify Potential Therapeutic Target Sites in RNA . . . . .	243
<i>M. Lützelberger, J. Kjems</i>	

Oligonucleotide-Based Antiviral Strategies . . . . .	261
<i>S. Schubert, J. Kurreck</i>	
Gene-Expressed RNA as a Therapeutic: Issues to Consider, Using Ribozymes and Small Hairpin RNA as Specific Examples . . . . .	289
<i>G. C. Fanning, G. Symonds</i>	
RNA Aptamers: From Basic Science Towards Therapy . . . . .	305
<i>H. Ulrich</i>	
RNA Aptamers Directed Against Oligosaccharides . . . . .	327
<i>M. Sprinzl, M. Milovnikova, C. S. Voertler</i>	
Aptamer-Based Biosensors: Biomedical Applications . . . . .	341
<i>A. K. Deisingh</i>	
Application of Aptamers in Therapeutics and for Small-Molecule Detection . . . . .	359
<i>M. Menger, J. Glökler, M. Rimmel</i>	
RNA Aptamers as Potential Pharmaceuticals Against Infections with African Trypanosomes . . . . .	375
<i>H. U. Göringer, M. Homann, M. Zacharias, A. Adler</i>	
RNA Targeting Using Peptide Nucleic Acid . . . . .	395
<i>E. Nielsen</i>	
Locked Nucleic Acid: High-Affinity Targeting of Complementary RNA for RNomics . . . . .	405
<i>S. Kauppinen, B. Vester, J. Wengel</i>	
Engineering RNA-Based Circuits . . . . .	423
<i>R. Narayanaswamy, A. D. Ellington</i>	
Selection of RNase-Resistant RNAs . . . . .	447
<i>S. Kainz, R. Czaja, T. Greiner-Stöffle, U. Hahn</i>	
<b>Subject Index . . . . .</b>	<b>457</b>

RNA Towards Medicine

Erdmann (Deceased), V.A.; Brosius, J.; Barciszewski, J.  
(Eds.)

2006, XI, 464 p., Hardcover

ISBN: 978-3-540-27261-8
