
List of Contents

1	Introduction	1
2	The “Master Clock”: The Suprachiasmatic Nucleus	2
2.1	Neuroanatomy	2
2.2	The Endogenous Rhythm of the SCN	3
2.3	The SCN Molecular Clock	4
3	Photic Regulation of the Circadian Rhythm	5
3.1	Retinal Input—Neuroanatomy	6
3.1.1	The Retinohypothalamic Tract	6
3.1.2	Morphology of Retinal Ganglion Cells of the RHT	7
3.2	Neurotransmitters in the RHT	8
3.2.1	Glutamate and PACAP	8
3.2.2	Other Neurotransmitters of the RHT	9
3.2.3	RHT Neurotransmitter Receptors in the SCN	9
3.2.3.1	Glutamate Receptors	9
3.2.3.2	PACAP Receptors	9
3.3	Melanopsin—An Irradiance-Detecting Photopigment of the RHT	10
3.4	Retinal Input—Physiology	11
3.4.1	Photic Regulation of the Circadian Rhythm	11
3.4.2	Putative Neurotransmitters of the RHT	13
3.4.3	Photic Activation of the RGCs of the RHT	13
3.4.4	Electrophysiological Responses of SCN Neurons to Photic Stimulation	14
3.4.5	Signal Transduction and Gene Expression in SCN Neurons After Photic Stimulation	16
3.4.6	PACAP Interacts with Glutamate Signaling During Light-Induced Phase Shift	17
4	Non-photoc Regulation of Circadian Rhythms	18
4.1	Midbrain Raphe Input—Neuroanatomy	20
4.1.1	The Median Raphe Projection to the SCN	20
4.1.2	Serotonin Receptors in the SCN	20
4.2	Serotonin (5-HT) and Regulation of the Circadian System	21
4.2.1	Serotonin in Non-photoc Phase Shifting of the Circadian Rhythm	22
4.2.1.1	Serotonin Is Released in the SCN In Vivo	22
4.2.1.2	Behavioral Effects of Neurotoxic Destruction of 5-HT Projection to the SCN	23
4.2.1.3	Effects of 5-HT on the Circadian Rhythm During the Subjective Day	23
4.2.2	Serotonin Modulates Light-Induced Phase Shift During Subjective Night	24
4.2.2.1	Activation of 5-HT _{1A/7} Receptors Modulates Light Signaling in the SCN	24

4.2.2.2	Activation of 5-HT _{1B} Receptors Modulates Light Signaling in the SCN	25
4.2.2.3	Signal Transduction and Gene Expression Associated with 5-HT Stimulation	26
4.3	The Intergeniculate Leaflet and the Geniculohypothalamic Tract–Neuroanatomy	27
4.4	Effects of NPY on Circadian Rhythm During Subjective Day	29
4.5	NPY Modulates Light-Induced Phase Shifts During Subjective Night	30
5	Summary	30
	Subject Index	73

Neuronal Input Pathways to the Brain's Biological Clock
and their Functional Significance

Hannibal, J.; Fahrenkrug, J.

2006, X, 76 p. 22 illus., 13 illus. in color., Softcover

ISBN: 978-3-540-27788-0
