
Contents

1 The Commercial and Community Significance of Yeasts in Food and Beverage Production	
Graham H. Fleet	1
2 Taxonomic and Ecological Diversity of Food and Beverage Yeasts	
Patrizia Romano, Angela Capece and Lene Jespersen	13
3 Molecular Methods to Identify and Characterize Yeasts in Foods and Beverages	
M.T. Fernández-Espinar, P. Martorell, R. de Llanos and Amparo Querol	55
4 Yeast Ecological Interactions. Yeast–Yeast, Yeast–Bacteria, Yeast–Fungi Interactions and Yeasts as Biocontrol Agents	
Bennie C. Viljoen	83
5 Physiological and Molecular Responses of Yeasts to the Environment	
Graeme M. Walker and Patrick Van Dijck	111
6 Molecular Mechanisms Involved in the Adaptive Evolution of Industrial Yeasts	
Eladio Barrio, Sara S. González, Armando Arias, Carmela Belloch and Amparo Querol	153
7 Principles and Applications of Genomics and Proteomics in the Analysis of Industrial Yeast Strains	
Ursula Bond and Anders Blomberg	175
8 Carbohydrate Metabolism	
J. Richard Dickinson and Arthur L. Kruckeberg	215
9 Yeasts as Biocatalysts	
Pierre Strehaiano, Felipe Ramon-Portugal and Patricia Taillandier	243

10	Production of Antioxidants, Aromas, Colours, Flavours, and Vitamins by Yeasts	
	Charles A. Abbas	285
11	Food and Beverage Spoilage Yeasts	
	Malcolm Stratford	335
12	The Public Health and Probiotic Significance of Yeasts in Foods and Beverages	
	Graham H. Fleet and Roostita Balia	381
13	The Development of Superior Yeast Strains for the Food and Beverage Industries: Challenges, Opportunities and Potential Benefits	
	Kevin J. Verstrepen, Paul J. Chambers and Isak S. Pretorius	399
	Index	445

Yeasts in Food and Beverages

Querol, A.; Fleet, G.H. (Eds.)

2006, VIII, 453 p., Hardcover

ISBN: 978-3-540-28388-1
