Photosynthesis – Carbon Metabolism (1974)	1
E. LATZKO and G.J. KELLY	
1 Introduction	1
2 Enzymology of the Reductive Pentose Phosphate Cycle	1
3 Studies with Isolated Chloroplasts	3
4 Communication between Chloroplast and Cytoplasm	4
5 Glycollate and Photorespiration	6
6 C ₄ Metabolism	7
References	9

Photosynthesis. Biochemical and Physiological Aspects of Carbon Metabolism (1976)	14
E. LATZKO and G. J. KELLY	
1 Introduction	14
2 Enzymology of the Reductive Pentose Phosphate Cycle	14
3 Studies with Isolated Chloroplasts	18
4 Communication between Chloroplast and Cytoplasm	20
5 Starch and Sucrose Metabolism	20
6 Photorespiration and Glycollate Metabolism	23
7 C ₄ Metabolism	25
References	27

Photosynthesis. Control of Carbon Metabolism Through Enzyme Regulation and Membrane-Mediated Metabolite Transport (1978) . . . 33
 E. LATZKO and G.J. KELLY

1	Introduction	33
2	The Reductive Pentose Phosphate Cycle (Calvin Cycle)	33
3	The Chloroplast	36
4	Products of Photosynthesis	39
5	Photorespiration	42
6	C ₄ Metabolism	45
	References	47

Photosynthesis. Carbon Metabolism: Chloroplast Capability and the Uncertain Fate of CO₂ (1980) 53
 E. LATZKO and G.J. KELLY

1	Introduction	53
2	Fixation of CO ₂ by RuBP Carboxylase	53
3	Products of CO ₂ Fixation: A Consideration of Chloroplast Capability	57
4	Release of CO ₂ by Photorespiration	61
5	Capture and Recapture of CO ₂ by PEP Carboxylase	65
	References	68

Photosynthesis. Carbon Metabolism: The Profound Effects of Illumination on the Metabolism of Photosynthetic Cells (1982) . . . 75
 G.J. KELLY and E. LATZKO

1	Introduction	75
2	Prologue: Advances in Methodology	76
3	The Uptake of Inorganic Carbon by Photosynthetic Cells	77
4	The Calvin Cycle: Enzymes and Their Regulation	78
5	On the Light-Mediated Control of Enzyme Activities	81
6	Transport by the Chloroplast Envelope	83
7	Products of CO ₂ Fixation	85
8	C ₄ Metabolism	88
9	Photorespiration	92
	References	97

Photosynthesis. Carbon Metabolism: On Land and at Sea (1984) . . . 104

G.J. KELLY and E. LATZKO

1	Introduction	104
2	The Superior Performance of Marine Phytoplankton in Photosynthetic Carbon Assimilation	105
3	The Uptake of Inorganic Carbon, and Evidence of a Role for Carbonic Anhydrase	106
4	Chloroplast Carbon Metabolism	107
5	Cytosolic Synthesis of Sucrose from Carbon Exported from the Chloroplast	111
6	Nitrogen Assimilation, and Lipid Biosynthesis	114
7	C ₄ Metabolism	116
8	Respiration	119
	References	122

Photosynthesis: Carbon Metabolism: By Day and by Night (1986) . . 130

J.A.M. HOLTUM, G.J. KELLY, and E. LATZKO

1	Introduction	130
2	Inorganic Carbon Uptake	130
3	A Pot-Pourri of Observations with Isolated Intact Chloroplasts . .	131
4	RuBP Carboxylase	132
5	Enzymes by Day and by Night	134
6	Respiration by Day and by Night	135
7	Fructose-2,6-P ₂ Regulation of Cytosolic Carbohydrate Metabolism	138
8	Starch Metabolism	140
9	Lipid Biosynthesis	140
10	Nitrogen Assimilation	141
11	C ₄ Pathway	141
12	C ₃ -C ₄ Intermediates	145
13	Crassulacean Acid Metabolism (CAM)	146
	References	150

Photosynthesis. Carbon Metabolism: New Regulators of CO₂ Fixation, the New Importance of Pyrophosphate, and the Old Problem of Oxygen Involvement Revisited (1989)		157
G.J. KELLY, J.A.M. HOLTUM, and E. LATZKO		
1	Introduction	157
2	Inorganic Carbon Uptake	158
3	Investigations with Isolated Plastids	158
4	The Return of RuBP Carboxylase	159
5	RuBP Carboxylase and the Limits to Photosynthesis	161
6	The Other Calvin Cycle Enzymes	163
7	Light-Mediated Enzyme Regulation	164
8	Starch Metabolism	165
9	Sucrose Metabolism: Fructose-2,6-P ₂ , and a Role of PP _i ?	165
10	Mitochondrial Respiration in Illuminated Photosynthetic Cells?	167
11	Photorespiration	169
12	The Many Roles of O ₂ in Photosynthetic Carbon Metabolism	170
13	C ₄ Plants	171
14	C ₃ -C ₄ Intermediates	174
15	CAM Plants	175
	References	178

Photosynthesis. Carbon Metabolism: On Regulation at the Cellular Level and at the Whole Plant Level, and Some Considerations Concerning the Interactions of These Regulatory Events with the Increasing Level of Atmospheric CO₂ (1992)		185
G.J. KELLY and E. LATZKO		

1	Introduction	185
2	Uptake of CO ₂	186
3	Environmental Regulation of RuBP Carboxylase Activity	186
4	Chloroplast Enzymes and Their Light-Mediated Regulation	189
5	Starch and Sucrose in Source and Sink Tissues	191
6	Mitochondrial Respiration During Photosynthesis	193
7	Photorespiration	194
