1	Paradise Lost – the Last Major Colonization	1
	W.G. LEE, R.B. ALLEN, D.M. TOMPKINS	
1.1	Introduction	1
1.2	Themes and Debates on Alien Species	2
1.3	Outline of the Book	8
1.4	Conclusion	11
	References	12
A	Magnitude of Alien Invasions	
2	Becoming New Zealanders: Immigration and the Formation of the Biota	17
	M.S. MCGLONE	
2.1	Introduction	17
2.2	Dispersal and Vicariance: Late Cretaceous to the Pleistocene	17
2.3	Dispersal and Formation of the Modern Biota	23
2.4	Evolutionary Effects of Selective Dispersal and Island Environments	26
2.5	New Zealand in an Invasive World	26
	References	29
3	Creating Gardens: the Diversity and Progression of European Plant Introductions	33
	P.A. WILLIAMS, E.K. CAMERON	
3.1	Introduction	33
3.2	The Chroniclers	34
3.3	Plant Introductions and Their Escape	35

3.4	Regional Differences	39
3.5	Naturalized Flora	41
3.6	Attitudes Past and Present	44
3.7	Responding to the Deluge	44
	References	46
4	Introduced Mammals in a New Environment	49
	I.A.E. ATKINSON	
4.1	Introduction	49
4.2	Mammal Introductions in New Zealand	50
4.3	Changes in the Herbivore–Predator Regime Since 1200 A.D.	56
4.4	Response of the New Zealand Biota	59
4.5	Conclusions	61
	References	62
5	Parasites and Biological Invasions	67
	D.M. TOMPKINS, R. POULIN	
5.1	Introduction	67
5.2	Taxonomic Affiliation of Emerging Infectious Diseases of Wildlife	68
5.3	Determinants of Establishment Success by Introduced and Invading Parasites	69
5.4	Exotic Parasite Impact on Native Fauna	70
5.5	Introduced Species as New Hosts for Native Parasites	71
5.6	Context Dependence of Exotic Parasite Impact	72
5.7	Disease Threat of Biological Invasions to New Zealand’s Avifauna	74
5.8	Disease Threat of Biological Invasions to New Zealand Freshwater Fish	77
5.9	Conclusions	79
	References	81
6	Export of Plant and Animal Species from an Insular Biota	85
	G.W. YEATES, P.A. WILLIAMS	
6.1	Introduction	85
6.2	Plant Emigrants	85
6.3	Animal Emigrants	89

Contents	XI
6.4 Conclusions	94
References	97

B Controls on Invasion Success

7	Genetics of Invasive Species in New Zealand	103
	D. GLEESON, H. HARMAN, T. ARMSTRONG	
7.1	Introduction	103
7.2	Genetics of Colonization	103
7.3	New Zealand Examples	105
7.4	Potential Genetic Impacts on Indigenous Biota	114
7.5	Conclusions	115
	References	115
 8	 Are the Marine Biotas of Island Ecosystems More Vulnerable to Invasion?	 119
	G.J. INGLIS, B.J. HAYDEN, W.A. NELSON	
8.1	Introduction	119
8.2	Island Bioinvasion Theory	120
8.3	Are Marine Biotas of Islands More Invaded?	120
8.4	Are the Marine Biotas of Islands Less Diverse?	123
8.5	Insularity and Niche Opportunity	124
8.6	Are Marine Species of Islands Poor Competitors?	126
8.7	Do NIS Have Greater Impacts in Island Environments?	128
8.8	Is Propagule Pressure to Islands Greater than to Mainland Areas?	129
8.9	Conclusions	130
	References	131
 9	 Factors Affecting the Release, Establishment and Spread of Introduced Birds in New Zealand	 137
	R.P. DUNCAN, T.M. BLACKBURN, P. CASSEY	
9.1	Introduction	137
9.2	Data Sources and Analysis	139
9.3	Factors Affecting Release	140

XII		Contents
9.4	Factors Affecting Establishment	142
9.5	Factors Affecting Spread	148
9.6	Conclusions	150
	References	151
10	Biological Control Agents: Can They Tell Us Anything About the Establishment of Unwanted Alien Species?	155
	S.V. FOWLER, H.M. HARMAN, R. NORRIS, D. WARD	
10.1	Introduction	155
10.2	Establishment Rates for Biological Control Agents	156
10.3	Release Size	156
10.4	Climate and Phenology	158
10.5	Genetic Issues	160
10.6	Natural Enemies	161
10.7	Other Factors	162
10.8	Conclusions	164
	References	164
11	The Context of Plant Invasions in New Zealand: Evolutionary History and Novel Niches	167
	J.M. CRAINE, W.G. LEE, S. WALKER	
11.1	Introduction	167
11.2	New Zealand's Core and Novel Niches	169
11.3	Core and Novel Niches: a Predictive, Useful Framework? . .	175
	References	176
12	Controls on the Population Dynamics of Invading Mammals	179
	D.M. FORSYTH	
12.1	Introduction	179
12.2	Models of Invading Large Herbivore-Plant Dynamics . . .	179
12.3	Reconciling Models with Data	184
12.4	Environmental Variation and the Dynamics of Invading Mammals	187
12.5	Harvesting and the Dynamics of Invading Mammals	189

12.6	Interspecific Competition and the Dynamics of Invading Mammals	189
12.7	Synthesis and Directions for Further Work	190
References	191

13	What Controls Invasion of Indigenous Forests by Alien Plants?	195
	S.K. WISER, R.B. ALLEN	
13.1	Introduction	195
13.2	Role of Disturbance	196
13.3	Substrate and Soil Fertility	199
13.4	Species Richness	199
13.5	Propagule Pressure and Dispersal	201
13.6	Geographic Patterns of Invasion	202
13.7	Temporal Perspectives on Invasion Patterns	204
13.8	Conclusions and Future Research Directions	205
References	207

C Consequences of Alien Invasions

14	Consequences of Brown Trout Invasion for Stream Ecosystems	213
	C.R. TOWNSEND, K.S. SIMON	
14.1	Introduction	213
14.2	Consequences of Brown Trout Invasion for the Behavior of Individuals	214
14.3	Consequences of Brown Trout Invasion for Populations . . .	215
14.4	Consequences of Brown Trout Invasion for Community Interactions	218
14.5	Consequences of Brown Trout Invasion for Ecosystem Processes	221
14.6	What Mediates the Influence of Brown Trout vs. Native Fish?	222
14.7	Lessons for Management	223
References	224

**15 Relative (Un)Importance of Introduced Animals
 as Pollinators and Dispersers of Native Plants 227**
D. KELLY, A.W. ROBERTSON, J.J. LADLEY, S.H. ANDERSON,
R.J. MCKENZIE

15.1 Introduction 227

15.2 Approach 230

15.3 Bird Flower-Visitors 234

15.4 Bird Fruit-Visitors 235

15.5 Invertebrate Flower-Visitors 238

15.6 Implications of Findings 240
