
List of Contents

Role of the Innate Immune System and Host–Commensal Mutualism	1
<i>S. Rakoff-Nahoum and R. Medzhitov</i>	
Molecular Networks Orchestrating GALT Development	19
<i>D. Finke and D. Meier</i>	
Lymphoid Tissue Inducer Cells in Intestinal Immunity	59
<i>I. I. Ivanov, G. E. Diehl, and D. R. Littman</i>	
Specificity and Plasticity of Memory Lymphocyte Migration	83
<i>J. Rodrigo Mora and U. H. von Andrian</i>	
IgA Adaptation to the Presence of Commensal Bacteria in the Intestine	117
<i>A. J. Macpherson</i>	
Intestinal IgA Synthesis: A Primitive Form of Adaptive Immunity That Regulates Microbial Communities in the Gut	137
<i>S. Fagarasan</i>	
B Cell Recruitment and Selection in Mouse GALT Germinal Centers	155
<i>S. Casola and K. Rajewsky</i>	
Structural Insights into Antibody-Mediated Mucosal Immunity	173
<i>A. E. Hamburger, P. J. Bjorkman, and A. B. Herr</i>	
Subject Index	205

Gut-Associated Lymphoid Tissues

Honjo, T.; Melchers, F. (Eds.)

2006, XI, 210 p., Hardcover

ISBN: 978-3-540-30656-6
