MRCP Technique	
I Introduction: Basic Principles of Magnetic Resonance Imaging	1
1 Technique	6
1.1 Magnetic Resonance Sequences	6
# 1 Overview of Imaging Protocol	6
# 2 Snapshot T2-Weighted MRI	10
# 3 Snapshot T2-Weighted MRI: Double-Echo Technique	12
# 4 Snapshot T2-Weighted MRI: Is Fat Suppression Required?	14
# 5 “Projective” Cholangiography	16
# 6 “Projective” Cholangiography: Limitations	18
# 7 An Alternative Approach: Calculation of Maximum-Intensity Projection Images	20
# 8 Other Techniques for Obtaining T2-Weighted Images	22
# 9 T1-Weighted MRI: Non-fat-suppressed Magnetization-prepared Snapshot Gradient Echo	24
# 10 T1-Weighted MRI: Use of Fat Suppression	26
1.2 Practical Setup of an MRCP Study	
# 11 Selection of Slice Location for Projective MRCP	27
# 12 Selection of Slice Thickness	28
# 13 Dynamic Evaluation of the Vaterian Sphincter Complex	30
1.3 Use of Contrast Media and Drugs	32
# 14 Oral Contrast Media	32
# 15 Nonspecific Intravenous Contrast Media (1): Parenchymal Organs and Lymph Nodes	34
# 16 Nonspecific Intravenous Contrast Media (2): Vascular „Roadmapping“	36
# 17 Specific Intravenous Contrast Media (1): Hepatocyte-Directed Agents	38
# 18 Specific Intravenous Contrast Media (2): Reticuloendothelial Agents	40
# 19 Drugs Stimulating Excretory Function	42
# 20 Spasmolytic Drugs (1): Buscopan	44
# 21 Spasmolytic Drugs (2): Glucagon	45
1.4 Comparison with Other Techniques	46
# 22 MRCP Compared with ERCP (1): Limitations of ERCP	46
# 23 MRCP Compared with ERCP (2): Limitations of MRCP	48
# 24 MRCP Compared with Ultrasonography	50
# 25 MRCP Compared Multislice Computed Tomography	52
Intrahepatic Bile Ducts	
2 Intrahepatic Bile Ducts	56
2.1 Normal Anatomy and Variants	56
# 26 Normal Anatomy	56
# 27 Variant Anatomy (1): Variable Junction of the Posterior Right Hepatic Duct	58
# 28 Variant Anatomy (2): Other Variations	60
# 29 Postoperative Anatomy: After Hepat(ic)ojejunostomy	62

Extrahepatic Bile Duct

3.2 Benign Nontraumatic Abnormalities	144
#68 Developmental Abnormalities (1): Choledochal Cyst	144
#69 Developmental Abnormalities (2): Atresia	146
#70 Web	148
#71 Mirizzi Syndrome	150
#72 Stones in the Common Bile Duct (CBD)	152
#73 Stones in the Common Bile Duct (2): Pitfalls in Diagnosis with MRCP/ERCP	154
#74 Stones Complicated by Fistula	156
#75 Bacterial Cholangitis	157
#76 Primary Sclerosing Cholangitis	158
#77 Common Bile Duct Stenosis in Acute Pancreatitis	160
#78 Common Bile Duct Stenosis in Chronic Pancreatitis	162
#79 Other Benign Causes of Bile Duct Narrowing	164
3.3 Traumatic, Postoperative, and Iatrogenic Abnormalities	168
#80 After Hepatic Transplantation (1): Anastomotic Stricture	168
#81 After Hepatic Transplantation (2): Ischemic Stricture	170
#82 After Cholecystectomy (1): Stricture of the Common Bile Duct	172
#83 After Cholecystectomy (2): Bile Leak	174
#84 Post-cholecystectomy Syndrome	176
#85 Bile Duct Trauma Related to Nonbiliary Surgery	177
#86 Choledochoduodenostomy with Sump Syndrome	178
3.4 Malignant Tumors	180
#87 Extrahepatic Cholangiocarcinoma (1): Klatskin Tumor	180
#88 Extrahepatic Cholangiocarcinoma (2): Distal Duct Type	184

#89 Bile Duct Involvement by Gallbladder Carcinoma	186
#90 Bile Duct Involvement by Pancreatic Carcinoma	188
#91 Bile Duct Involvement by Other Extrabiliary Neoplasms	190

Gallbladder and Cystic Duct

4 Gallbladder and Cystic Duct	194
4.1 Normal Anatomy and Variants	194
#92 Gallbladder	194
#93 Cystic Duct	196
4.2 Benign Nontraumatic Abnormalities	198
#94 Cholecystolithiasis, Classical Appearance	198
#95 Cholecystolithiasis, Variant Appearance	200
#96 Acute Cholecystitis	202
#97 Acute Cholecystitis with Pericholecystitis	204
#98 Complications of Acute Cholecystitis (1): Intramural Abscess	206
#99 Complications of Acute Cholecystitis (2): Gangrene	208
#100 Complications of Acute Cholecystitis (3): Perforation	209
#101 Acute Emphysematous Cholecystitis	210
#102 Peridiverticulitis of the Gallbladder	211
#103 Cholecystoenteric Fistula	212
#104 Chronic Cholecystitis	214
#105 Xanthogranulomatous Cholecystitis	216
#106 Cholesterolosis	218
#107 Cholesterol Polyp	220
#108 Diffuse Adenomyomatosis	222
#109 Focal Adenomyomatosis	224
#110 Porcelain Gallbladder	226
#111 Reactive Thickening of the Gallbladder Wall	228
#112 Varices in the Gallbladder Wall	230

4.3 Traumatic, Postoperative, and Iatrogenic Abnormalities 232

113 Blunt Gallbladder Trauma . . . 232

114 After Cholecystectomy: Complications with Cystic Duct Remnant . . . 234

4.4 Malignant Tumors 236

115 Gallbladder Carcinoma, General 237

116 Spread of Gallbladder Carcinoma (1): Direct Invasion of Liver Parenchyma and/or Biliary Tree 238

117 Spread of Gallbladder Carcinoma (2): Lymph Node Metastases 240

118 Spread of Gallbladder Carcinoma (3): Other Metastases . . 242

Vaterian Sphincter Complex

5 Vaterian Sphincter Complex 246

5.1 Normal Anatomy and Variants 246

119 Normal Anatomy 246

120 Normal Contractile Activity . . 248

121 Variant Anatomy (1): Type of Junction 250

122 Variant Anatomy (2): “Pseudocalculus” Sign 252

123 Variant Anatomy (3): Length of Common Channel 254

124 Variant Anatomy (4): Papilla in or Adjacent to a Duodenal Diverticulum 256

5.2 Benign Nontraumatic Abnormalities 258

125 Impacted Stone 258

126 Choledochocoele 260

127 Sphincter Dysfunction, General 261

128 Sphincter Dysfunction, Features on Dynamic MRCP . . 262

129 Sphincter Dysfunction, False-Negative Diagnosis on Dynamic MRCP 266

130 Benign Tumors 268

5.3 Traumatic, Postoperative, and Iatrogenic Abnormalities 270

131 Sequelae/Complications of ERCP 270

5.4 Malignant Tumors 272

132 (Peri-)Ampullary Carcinoma 272

133 Carcinoma of the Pancreatic Head Invading the Vaterian Sphincter Complex 274

Pancreatic Ducts

6 Pancreatic Ducts 276

6.1 Normal Anatomy and Variants 276

134 Normal Pancreas: Location and Signal Intensity 276

135 Classical Ductal Anatomy . . . 278

136 Classical Ductal Anatomy in Pancreatic Head 280

137 Variant Anatomy (1): “Bifid” Configuration with a Prominent Duct of Santorini 282

138 Variant Anatomy (2): Ansa Pancreatica and Ductal Loops 284

139 Variant Anatomy (3): Focal Narrowing at the Junction 285

140 Variant Anatomy (4): Pancreas Divisum 286

141 Variant Anatomy (5): Uneven Lipomatosis 290

142 Variant Anatomy (6): Lobulations of the Pancreatic Head 292

143 Developmental Abnormalities (1): Agenesis of the Dorsal Pancreas 293

144 Developmental Abnormalities (2): Annular Pancreas . . . 294

145 Developmental Abnormalities (3): Ectopic Pancreas . . . 296

146 Developmental Abnormalities (4): Partial Duplication . . 298

147 The Elderly Pancreas 299

148 Postoperative Anatomy (1): After Partial Resection 300

# 149	Postoperative Anatomy (2): After Pancreatic Transplan- tation	302	# 168	Chronic Obstructive Pancreatitis	338
6.2	Benign Nontraumatic Abnormalities	304	# 169	Nonalcoholic Duct-Destructive Chronic Pancreatitis	340
# 150	Santorinicele and Wirsungocele	304	# 170	Hereditary Pancreatitis	344
# 151	Acute Pancreatitis, General	306	# 171	Simple True Cyst	346
# 152	Edematous Pancreatitis (Grades A and B)	307	# 172	Cysts in Von Hippel-Lindau Disease	348
# 153	Acute Pancreatitis with Peri- pancreatic Inflammation (Grade C)	308	# 173	Lymphangioma	350
# 154	Acute Pancreatitis with III-Defined Fluid Collection/ Phlegmon (Grades D and E)	310	# 174	Cystic Fibrosis	352
# 155	Complications of Acute Pancreatitis (1): Necrosis	312	# 175	Microcystic Serous Cystadenoma	354
# 156	Complications of Acute Pancreatitis (2): Pseudocyst	314	# 176	Macrocytic Serous Cystadenoma	356
# 157	Complications of Acute Pancreatitis (3): Vascular Complications	316	# 177	Benign Neuroendocrine Tumors	358
# 158	Recurrent (Relapsing) Pancreatitis	318	# 178	Schwannoma	362
# 159	Chronic Pancreatitis, General	320	# 179	Granulomatous Disease of the Pancreas	364
# 160	Chronic Pancreatitis, Signal Intensity Changes and Enhancement Pattern	321	# 180	Hemochromatosis	366
# 161	Chronic Pancreatitis, Ductal Changes (1): ERCP Classification	322	6.3	Traumatic, Postoperative and Iatrogenic Abnormalities	368
# 162	Chronic Pancreatitis, Ductal Changes (2): Early Disease	324	# 181	Pancreatic Duct Injury	368
# 163	Chronic Pancreatitis, Ductal Changes (3): Advanced Disease	326	# 182	Complications of Pancreatic Transplantation (1): Pancreatitis	370
# 164	Atypical Ductal Changes in Chronic Pancreatitis	328	# 183	Complications of Pancreatic Transplantation (2): Other Complications	372
# 165	Complications of Chronic Pancreatitis (1): Pseudocyst	330	# 184	Complications of Partial Pancreatic Resection	374
# 166	Complications of Chronic Pancreatitis (2): Other Complications	332	6.4	Malignant Tumors and Tumors with Malignant Potential	375
# 167	Chronic Pancreatitis with Focal Inflammatory Mass	334	# 185	Adenocarcinoma, General	375
			# 186	Adenocarcinoma, Signal Intensity	376
			# 187	Adenocarcinoma, Ductal Changes	378
			# 188	Variant Morphology of Adenocarcinoma (1): Degree Obstruction	382
			# 189	Variant Morphology of Adeno- carcinoma (2): Necrosis/Cystic Degeneration	384

# 190	Adenocarcinoma in Pancreas Divisum	386	# 195	Recurrent Adenocarcinoma . . .	396
# 191	Spread of Adenocarcinoma (1): Vascular Invasion	388	# 196	Secondary Pancreatic Tumors	398
# 192	Spread of Adenocarcinoma (2): Lymph Nodes	390	# 197	Malignant Neuroendocrine Tumors	400
# 193	Spread of Adenocarcinoma (3): Distant Metastases	392	# 198	Mucinous Pancreatic Neoplasm (Peripheral Type) . .	404
# 194	Adenocarcinoma with Retro-obstructive Pancreatitis	394	# 199	Intraductal Mucinous Neoplasm	406
