
Contents

Part I Core Technologies for Mobile Information Systems

1 Basic Concepts

B. Pernici 3

2 Reference Architecture and Framework

M. Adorni, F. Arcelli, S. Bandini et al. 25

3 E-Services

D. Ardagna, A. Avenali, L. Baresi et al. 47

4 Middleware and Architectural Reflection

M. Adorni, F. Arcelli, R. Baldoni et al. 81

Part II Enabling Technologies

5 Adaptive Networks

P. Giacomazzi, A. Lapiana, G. Mulas et al. 117

6 Data Management

C. Bolchini, F.A. Schreiber, L. Tanca 155

7 Low-Power Architectures for Mobile Systems

D. Barretta, L. Breveglieri, P. Maistri et al. 177

Part III Design of Mobile Information Systems

8 Methods and Tools for the Development of Adaptive Applications

R. Torlone, T. Barbieri, E. Bertini et al. 209

| | |
|--|-----|
| 9 Development of Services for Mobile Information Systems | |
| <i>D. Ardagna, L. Baresi, C. Batini et al.</i> | 249 |
| 10 Knowledge-Based Tools for E-Service Profiling and Mining | |
| <i>A. Corallo, G. Lorenzo, G. Solazzo, D. Arnone</i> | 265 |
| 11 Applications. MultiLezi: Implementation of an Adaptive Multichannel Learning Environment | |
| <i>T. Barbieri, A. Bianchi, S. Bruna et al.</i> | 293 |
| <hr/> | |
| Part IV Appendices | |
| <hr/> | |
| A The Quality Registry | |
| <i>C. Cappiello.....</i> | 307 |
| B Functional Interaction Abilities: Conceptual Model of the User Context | |
| <i>P. Graziani, M. Billi, L. Burzagli et al.</i> | 319 |
| References | 327 |
| Index | 351 |

Mobile Information Systems

Infrastructure and Design for Adaptivity and Flexibility

Pernici, B. (Ed.)

2006, XVI, 354 p., Hardcover

ISBN: 978-3-540-31006-8
