
Contents

1	Introduction	1
1.1	Stochastic Analogs of Classical Differential Equations	1
1.2	Filtering Problems	2
1.3	Stochastic Approach to Deterministic Boundary Value Problems	3
1.4	Optimal Stopping	3
1.5	Stochastic Control	4
1.6	Mathematical Finance	4
2	Some Mathematical Preliminaries	7
2.1	Probability Spaces, Random Variables and Stochastic Processes	7
2.2	An Important Example: Brownian Motion	12
	Exercises	15
3	Itô Integrals	21
3.1	Construction of the Itô Integral	21
3.2	Some properties of the Itô integral	30
3.3	Extensions of the Itô integral	34
	Exercises	37
4	The Itô Formula and the Martingale Representation Theorem	43
4.1	The 1-dimensional Itô formula	43
4.2	The Multi-dimensional Itô Formula	48
4.3	The Martingale Representation Theorem	49
	Exercises	54
5	Stochastic Differential Equations	63
5.1	Examples and Some Solution Methods	63
5.2	An Existence and Uniqueness Result	68
5.3	Weak and Strong Solutions	72

Exercises	74
6 The Filtering Problem	83
6.1 Introduction	83
6.2 The 1-Dimensional Linear Filtering Problem	85
6.3 The Multidimensional Linear Filtering Problem	104
Exercises	105
7 Diffusions: Basic Properties	113
7.1 The Markov Property	113
7.2 The Strong Markov Property	116
7.3 The Generator of an Itô Diffusion	121
7.4 The Dynkin Formula	124
7.5 The Characteristic Operator	126
Exercises	128
8 Other Topics in Diffusion Theory	139
8.1 Kolmogorov's Backward Equation. The Resolvent	139
8.2 The Feynman-Kac Formula. Killing	143
8.3 The Martingale Problem	146
8.4 When is an Itô Process a Diffusion?	148
8.5 Random Time Change	153
8.6 The Girsanov Theorem	159
Exercises	168
9 Applications to Boundary Value Problems	175
9.1 The Combined Dirichlet-Poisson Problem. Uniqueness	175
9.2 The Dirichlet Problem. Regular Points	179
9.3 The Poisson Problem	190
Exercises	197
10 Application to Optimal Stopping	205
10.1 The Time-Homogeneous Case	205
10.2 The Time-Inhomogeneous Case	218
10.3 Optimal Stopping Problems Involving an Integral	222
10.4 Connection with Variational Inequalities	224
Exercises	228
11 Application to Stochastic Control	235
11.1 Statement of the Problem	235
11.2 The Hamilton-Jacobi-Bellman Equation	237
11.3 Stochastic control problems with terminal conditions	251
Exercises	252

12 Application to Mathematical Finance	261
12.1 Market, portfolio and arbitrage	261
12.2 Attainability and Completeness	271
12.3 Option Pricing	278
Exercises	298
Appendix A: Normal Random Variables	305
Appendix B: Conditional Expectation	309
Appendix C: Uniform Integrability and Martingale Convergence	311
Appendix D: An Approximation Result	315
Solutions and Additional Hints to Some of the Exercises	319
References	349
List of Frequently Used Notation and Symbols	357
Index	361

Physical Approach to Short-Term Wind Power Prediction

Lange, M.; Focken, U.

2006, XII, 208 p., Hardcover

ISBN: 978-3-540-25662-5
