Preface	V
Introduction.....	1
1 The current situation: markets in upheaval, turbulence in the sector oligopoly.....	9
1.1 Overview	9
1.2 Structural growth weakness in the triad	12
1.3 Competition from Asia intensifies	15
1.4 Growing overcapacities, decreasing capacity utilization	20
1.5 Atomization of model ranges	26
1.6 Change in the buying patterns of "automobile consumers"	29
1.7 Intensified overall price and cost competition	32
1.7.1 The situation of the branch as a whole	32
1.7.2 Profit pressure in core business, but not for all producers	34
1.8 Passing the loss on to the components suppliers.....	37
1.9 Conclusion: branch with increasing profit pressure	39
2 The Western European automotive industry: cost stress and profit pressure	41
2.1 External pressure factors	41
2.1.1 Cost gap in international comparison.....	41
2.1.2 Intensification of global location competition.....	56
2.1.3 Asian OEMs in catching up competition on quality / performance / styling.....	66

2.1.4	"First we take Manhattan, then we take Berlin!" - Asian brands on the advance	69
2.2	Home-made load factors	73
2.2.1	Boundless model palettes	73
2.2.2	Exploding development costs, decreasing amounts of coverage	77
2.2.3	Lacking model flexibility and decreasing capacity utilization	81
2.2.4	Crowding out competition/ overcapacities/ margin pressure	83
2.2.5	Operative losses in the core segments of the "productive" added value chain/ management mistakes	84
3	Global mega trends until 2015: intensified selection process.....	87
3.1	OECD-volume markets: in saturation	87
3.2	Growth champions of the future: BRIC states	93
3.3	New orientation of global production locations	98
3.4	Brand orientation of buyers' preferences, Asian competition advances	104
3.5	Asian competitors on the advance.....	112
3.6	Concentration at all levels: upheaval in the added value chain.	118
3.7	Forming of strategic alliances at OEMs.....	125
3.8	Changed energy supply conditions	127
3.9	Conclusion: large structural change in the global automotive industry	131
4	Further concentration of automobile manufacturers by 2015.	135
4.1	Predatory competition shows its effect	135
4.2	Evaluation of the 11 largest OEMs according to "survival-criteria"	139
4.2.1	Analysis method.....	139
4.2.2	Establishment of the "TWK's survival-index"	141

4.2.3	Sources of information	141
4.2.4	Valuation model	142
4.3	"IWK Survival-Index": valuations in the various categories	143
4.3.1	Current Economic Situation (CES)	143
4.3.2	Sustainability	149
4.3.3	Strategy	155
4.4	Total results of the ranking	156
4.5	Conclusion: who has the best chances in the predatory competition?	158
5	Consequences for the Components Supply Industry	163
5.1	Typology of the added value chain	163
5.2	Concentration in the producers' oligopoly brings risks for suppliers	166
5.2.1	Upward pressure on costs from OEMs becomes still more rigid	166
5.2.2	Intensified competition due to progressive concentration....	168
5.2.3	Excessive demands on middle-class organization structures	170
5.2.4	Excessive demands on financial power where capitalization is insufficient	171
5.2.5	Conclusion: decreasing profits, increasing risks, further consolidation	173
5.3	Strategic success factors.....	175
5.3.1	Innovation strategy	176
5.3.2	Cost reduction strategy: increase in productivity or transfer to low-cost countries	180
5.3.3	Expansion strategy: more activities within the added value chain	187
5.3.4	Growth strategy: economies of scale and cost synergies	188
5.3.5	Niche strategy: specialization.....	189
5.3.6	Cooperation strategy: creation of clusters.....	192

5.3.7 Location strategy: go to where the OEMs are	196
5.3.8 Financing strategy: securing increasing capital demand	197
5.3.9 Conclusion: profitable growth is possible!	200
6 The future map of global vehicle location – some reflections ..	205
6.1 Stocktaking	205
6.1.1 Industrial states in the maelstrom of globalization	205
6.1.2 Increasing location attractiveness of the NIC's	209
6.2 Perspective of automotive industry in West Europe: the German case	211
6.2.1 The European dimension	212
6.2.2 The German case: location heavyweight of the automotive industry	217
6.3 Determining factors of economic competitiveness	220
6.4 Job Engine Automotive industry: Peak Level passed	224
6.4.1 In the short-term: gradual melting-process	224
6.4.2 In the long-term: reduction to essentials	229
6.5 Summary	236
Appendix	239
List of figures	245
List of tables	249
List of abbreviations	251
Literature	253
Author	261
