

Contents

1	What Is a Stem Cell Niche? <i>S.-I. Nishikawa, M. Osawa</i>	1
2	New Strategy for Comprehensive Analysis of Gene Functions in Embryonic Stem cells <i>J. Takeda, K. Horie, K. Yusa</i>	15
3	Paternal Dual Barrier by Ifg2-H19 and Dlk1-Gtl2 to Parthenogenesis in Mice <i>T. Kono, M. Kawahara, Q. Wu, H. Hiura, Y. Obata</i>	23
4	Cell-Cell Fusion as a Means to Establish Pluripotency <i>J.T. Do, H.R. Schöler</i>	35
5	Toward Reprogramming Cells to Pluripotency <i>P. Collas, C.K. Taranger</i>	47
6	Molecular Switches and Developmental Potential of Adult Stem Cells <i>M. Zenke, T. Hieronymus</i>	69
7	Adult Small Intestinal Stem Cells: Identification, Location, Characteristics, and Clinical Applications <i>C.S. Potten, J.R. Ellis</i>	81
8	Tracking Stem Cells In Vivo <i>R. Yoneyama, E.R. Chemaly, R.J. Hajjar</i>	99

9	Establishment of Nuclear Transfer Embryonic Stem Cell Lines from Adult Somatic Cells by Nuclear Transfer and Its Application <i>T. Wakayama</i>	111
10	Derivation of Germ Cells from Embryonic Stem Cells <i>J. Kehler, K. Hübner, H.R. Schöler</i>	125
11	Germline Recruitment in Mice: A Genetic Program for Epigenetic Reprogramming <i>Y. Ohinata, Y. Seki, B. Payer, D. O'Carroll, M.A. Surani, M. Saitou</i>	143
12	Transplantation of Germ Line Stem Cells for the Study and Manipulation of Spermatogenesis <i>I. Dobrinski</i>	175
13	Progenitor Cell-Based Myelination as a Model for Cell-Based Therapy of the Central Nervous System <i>S.A. Goldman, J. Lang, N. Roy, S.J. Schanz, F.S. Sim, S. Wang, V. Washco, M.S. Windrem</i>	195
14	Adult Neural Stem Cells and Central Nervous System Repair <i>H. Okano</i>	215
15	Stem Cell Therapy for Parkinson's Disease <i>J. Takahashi</i>	229
	Previous Volumes Published in This Series	245

Stem Cells in Reproduction and in the Brain

Morser, J.; Nishikawa, S.-I.; Schoeler, H.R. (Eds.)

2006, XIV, 249 p., Hardcover

ISBN: 978-3-540-31436-3
