Preface and acknowledgments	v
1 Introduction V.A. Vasil'ev and E.B. Yanovskaya	1
I Noncooperative game theory and social choice	19
2 A probabilistic model of social choice E.B. Yanovskaya	21
3 Equilibrium points in general noncooperative games and their mixed extensions E.B. Yanovskaya	33
4 On the theory of optimality principles for noncooperative games V. Lapitsky	57
II Cooperative game theory	77
5 A sufficient condition for the coincidence of the core of a cooperative game with its solution G. Diubin	79
6 On the Shapley function for games with an infinite number of players G. Diubin	83

7	Cores and generalized NM-solutions for some classes of cooperative games V.A. Vasil'ev	91
III	Bargaining theory	151
8	The linear bargaining solution S. Pechersky	153
9	On the superlinear bargaining solution S. Pechersky	165
10	Stable compromises under corrupt arbitration N.S. Kukushkin	175
IV	Equilibrium theory	179
11	Stability of economic equilibrium F.L. Zak	181
12	An algorithmic approach for searching an equilibrium in fixed budget exchange models V.I. Shmyrëv	217
13	Equilibrated states and theorems on the core V.I. Danilov and A.I. Sotskov	237
	List of editors and authors	251

Russian Contributions to Game Theory and Equilibrium  
Theory

Driessen, T.S.H.; van der Laan, G.; Vasil'ev, V.A.;

Yanovskaya, E. (Eds.)

2006, X, 254 p., Hardcover
