
Contents

1	Auxiliary Material	1
1.1	Operator Ideals	1
1.2	Operator Determinants	4
1.3	Fredholm Operators	9
1.4	Operator Matrices and Their Determinants	11
1.5	Banach Algebras	12
1.6	C^* -Algebras	17
1.7	Local Principles	21
1.8	L^p and H^p	27
1.9	BMO and VMO	36
1.10	Smoothness Classes	38
1.11	Notes and Comments	41
2	Basic Theory	45
2.1	Multiplication Operators	45
2.2	Toeplitz Operators	49
2.3	Hankel Operators	52
2.4	Invertibility of Toeplitz Operators on H^2	57
2.5	Spectral Inclusion Theorems	64
2.6	The Connection Between Fredholmness and Invertibility	71
2.7	Compactness of Hankel Operators and $C + H^\infty$ Symbols	77
2.8	Local Methods for Scalar Toeplitz Operators	85
2.9	Matrix Symbols	99
2.10	Notes and Comments	103
3	Symbol Analysis	111
3.1	Local Sectoriality	111
3.2	Asymptotic Multiplicativity	119
3.3	Piecewise Quasicontinuous Functions	128
3.4	Harmonic Approximation: Algebraization	140
3.5	Harmonic Approximation: Essentialization	149

3.6	Harmonic Approximation: Localization	152
3.7	Harmonic Approximation: Local Spectra	157
3.8	Local Sectoriality Continued	166
3.9	Notes and Comments	169
4	Toeplitz Operators on H^2	171
4.1	Fredholmness	171
4.2	Stable Convergence	178
4.3	Index Computation	187
4.4	Transfinite Localization	191
4.5	Local Toeplitz Operators	211
4.6	Symbols with Specific Local Range	217
4.7	Toeplitz Algebras	226
4.8	The Role of the Harmonic Extension	240
4.9	Notes and Comments	244
5	Toeplitz Operators on H^p	249
5.1	General Theorems	249
5.2	Khvedelidze Weights	253
5.3	Locally p, ϱ -Sectorial Symbols	254
5.4	Localization	264
5.5	PC Symbols	267
5.6	P_2C Symbols	277
5.7	Fisher-Hartwig Symbols	281
5.8	Notes and Comments	283
6	Toeplitz Operators on ℓ^p	287
6.1	Multipliers on Weighted ℓ^p Spaces	287
6.2	Continuous Symbols	293
6.3	Piecewise Continuous Symbols	297
6.4	Analytic Symbols	308
6.5	Notes and Comments	320
7	Finite Section Method	323
7.1	Basic Facts	323
7.2	$C + H^\infty$ Symbols	335
7.3	Locally Sectorial Symbols	344
7.4	PC Symbols: ℓ^p Theory	347
7.5	PC Symbols: H^p Theory	353
7.6	Operators from $\text{alg}_{\mathcal{L}(H^2)}T(PC)$	357
7.7	Fisher-Hartwig Symbols: $H^2(\varrho)$ Theory	374
7.8	Fisher-Hartwig Symbols: ℓ_μ^p Theory	378
7.9	Invertibility Versus Finite Section Method	389
7.10	Pseudospectra	394
7.11	Notes and Comments	400

8	Toeplitz Operators over the Quarter-Plane	409
8.1	Function Classes on the Torus	409
8.2	Elementary Properties of Quarter-Plane Operators	417
8.3	Continuous Symbols	421
8.4	The Invertibility Problem	428
8.5	Bilocal Fredholm Theory	438
8.6	$PQC \otimes PQC$ Symbols	448
8.7	Finite Section Method: Kozak's Theory	454
8.8	Finite Section Method: Bilocal Theory	461
8.9	Higher Dimensions	470
8.10	Notes and Comments	475
9	Wiener-Hopf Integral Operators	481
9.1	Basic Properties	481
9.2	Continuous Symbols	486
9.3	Piecewise Continuous Symbols	488
9.4	AP and SAP Symbols	492
9.5	Some Phenomena Caused by SAP Symbols	497
9.6	Other Oscillating Symbols	501
9.7	Finite Section Method	504
9.8	Operators over the Quarter Plane	513
9.9	Notes and Comments	520
10	Toeplitz Determinants	525
10.1	The First Szegő Limit Theorem	525
10.2	Krein Algebras	529
10.3	Wiener-Hopf Factorization	533
10.4	The Strong Szegő Limit Theorem	537
10.5	Higher Order Asymptotics	543
10.6	Semirational Symbols	554
10.7	Nonvanishing Index	558
10.8	Selfadjoint Symbols	566
10.9	The Pure Fisher-Hartwig Singularity	570
10.10	Separation Theorems	572
10.11	Fisher-Hartwig Symbols	582
10.12	More on Unbounded Symbols	592
10.13	Wiener-Hopf Determinants	595
10.14	Eigenvalues	605
10.15	Notes and Comments	611
	References	621
	Notation	653
	Index	661

Analysis of Toeplitz Operators

Böttcher, A.; Silbermann, B.

2006, XIV, 665 p. 15 illus., Hardcover

ISBN: 978-3-540-32434-8
