Part I Analysis of the Adsorption Kinetics

1 Protein Adsorption Kinetics:	
Influence of Substrate Electric Potential	1
<i>Paul R. Van Tassel</i>	
1.1 Introduction	1
1.2 Theoretical Prediction	2
1.3 Experimental Measure	6
1.3.1 OWLS Principles	6
1.3.2 OWLS Experiments	8
1.4 Results	9
1.5 Discussion	17
1.5.1 Surface-Bound Counterions	19
1.5.2 Local pH Effects	20
1.5.3 Solvent Interfacial Structure	20
1.5.4 Protein Charge Heterogeneity	20
1.6 Conclusions	21
References	21
2 From Kinetics to Structure: High Resolution Molecular Microscopy	23
<i>Jeremy J. Ramsden</i>	
2.1 Introduction	23
2.2 Optical Waveguide Lightmode Spectroscopy	25
2.2.1 Principles of Optical Biosensing	27
2.2.2 Mode Equations for OWLS	28
2.2.3 The Uniform Thin Film Approximation (UTFA)	30
2.2.4 Optical Invariants	31
2.3 The Practical Determination of Waveguide Parameters	34
2.3.1 Device Fabrication	35
2.3.2 Fluid Handling Arrangements	36
2.4 Static Structure	37
2.5 Kinetic Analysis and Dynamic Structural Inference	37
2.5.1 Particle Transport	37

2.5.2	The Chemical Adsorption Coefficient.....	40
2.5.3	The Analysis of The Available Area Function.....	41
2.6	Behaviour of Real Proteins	43
2.6.1	Evaluation of Lateral Diffusivity and 2D Crystal Unit Cell Size	44
2.6.2	Desorption.....	45
2.6.3	Multilayers	46
2.7	Conclusions	47
	References	48
3	Initial Adsorption Kinetics in a Rectangular Thin Channel, and Coverage-Dependent Structural Transition Observed by Streaming Potential	51
	<i>Philippe Déjardin, Elena N. Vasina</i>	
3.1	Introduction	51
3.2	The Initial Adsorption Constant and its Limit Expressions....	56
3.2.1	The Local Initial Adsorption Constant $k(x)$, its Limit Expressions and Approximation.....	56
3.2.2	The Mean Adsorption Constant, its Limit Expressions and Approximation.....	59
3.2.3	Experimental Results and Discussion	61
3.3	The Structural Transition with Increasing Interfacial Concentration	63
3.3.1	Observation by Streaming Potential	64
3.3.2	Different Models	66
3.4	Conclusion	67
	Appendix.....	68
	References	69

Part II Analysis of the Structure at the Interface

4	Dual Polarisation Interferometry: An Optical Technique to Measure the Orientation and Structure of Proteins at the Solid–Liquid Interface in Real Time	75
	<i>Neville Freeman</i>	
4.1	Introduction	75
4.2	Experimental Approaches Adopted	79
4.2.1	Typical Approach Adopted	79
4.2.2	Experimental Protocols	79
4.2.3	Advantages.....	79
4.2.4	Verifying DPI as an Experimental Approach	80

4.3	DPI: Applications.....	80
4.3.1	Introduction.....	80
4.3.2	Protein Orientation	81
4.3.3	Bovine Serum Albumin Structures at pH 3 and pH 7	82
4.3.4	Protein Orientation and Subsequent Activity.....	83
4.3.5	Protein Structure and Small Molecule Interactions....	87
4.3.6	Protein Structure and Metal Ion Interactions.....	90
4.4	Future Developments	91
4.5	Conclusions	93
	Appendix 1 DPI: Background	93
A.1.1	Neutron Reflection	93
A.1.2	Surface Plasmon Resonance.....	94
	Appendix 2 DPI: Theory	95
	Appendix 3 DPI: Implementation	99
A.3.1	Hardware	99
A.3.2	Data Analysis.....	101
	References	102
5	Total Internal Reflection Ellipsometry: Monitoring of Proteins on Thin Metal Films	105
	<i>Michal Poksinski, Hans Arwin</i>	
5.1	Introduction	105
5.2	Total Internal Reflection Ellipsometry.....	106
5.3	Experimental Setup.....	110
5.4	Application Examples.....	113
5.5	Further Possibilities	117
	References	118
6	Conformations of Proteins Adsorbed at Liquid–Solid Interfaces	119
	<i>Sylvie Noinville, Madeleine Revault</i>	
6.1	Introduction	119
6.2	Experimental Techniques.....	125
6.2.1	High-Resolution Structure of Proteins.....	125
6.2.2	Secondary Structure of Proteins	126
6.2.3	Orientation, Localised Structural Information	127
6.2.4	Spatial Distribution of Proteins in the Adsorbed Layer	128
6.2.5	Solvation Information.....	129
6.3	Surface Effects on Both Protein Structure and Solvation by the ATR-FTIR Technique.....	130
6.3.1	FTIR Spectral Analysis.....	130

6.3.2	Proteins in Solution	132
6.3.3	Surface-Induced Conformational Changes of a Soft Protein: BSA.....	134
6.3.4	Surface-Induced Conformational Changes of a Hard Protein: Lysozyme	138
6.3.5	Folding or unfolding of proteins on hydrophobic supports.....	141
6.4	Conclusion	142
	References	142
7	Evaluation of Proteins on Bio-Devices	151
	<i>Satoka Aoyagi, Masahiro Kudo</i>	
7.1	Introduction	151
7.2	Time-of-Flight Secondary Ion Mass Spectrometry (TOF-SIMS)	153
7.2.1	Principles of TOF-SIMS	153
7.2.2	TOF-SIMS Spectra and Secondary-Ion Images	156
7.2.3	Data Analysis.....	157
7.3	Analysis of Proteins on Bio-Devices.....	161
7.3.1	Characterization of Proteins on Substrates	161
7.3.2	Investigation of Conformation and Orientation of Proteins on Substrates	164
7.3.3	Imaging of Protein Distribution	165
7.3.4	Other Points and Future Directions.....	168
7.4	Summary.....	169
	References	169

Part III Some Applications

8	Fibronectin at Polymer Surfaces with Graduated Characteristics	175
	<i>Tilo Pompe, Lars Renner, Carsten Werner</i>	
8.1	Introduction	175
8.2	Gradated Substrate Physicochemistry	177
8.3	Fibronectin Exchange at a Constant Surface Concentration...	181
8.4	Fibronectin Exchange at Variable Surface Concentrations.....	188
8.5	Relevance of the Interfacial Constraints of Fibronectin for Cell-Matrix Adhesion.....	195
	References	197

9 Development of Chemical Microreactors by Enzyme Immobilization onto Textiles	199
<i>Christophe Innocent, Patrick Seta</i>	
9.1 Introduction	199
9.2 Nonconducting Cellulosic Textiles.....	201
9.2.1 Pepsin and Trypsin Immobilization on Cotton.....	201
9.2.2 Immobilization of Uricase and Xanthine Oxidase on Ion-Exchanging Textiles.....	211
9.2.3 Urease Electrodialysis Coupling	223
9.3 Electron-Conducting Textile.....	227
9.3.1 Enzyme Immobilization on Carbon Felt	227
9.3.2 Electrocatalysis Coupling with Enzyme-Conducting Textile Catalytic Reactivity	238
References	242
 10 Approaches to Protein Resistance on the Polyacrylonitrile-based Membrane Surface: an Overview	 245
<i>Ling-Shu Wan, Zhi-Kang Xu, Xiao-Jun Huang</i>	
10.1 Introduction	245
10.2 Copolymerization Procedures.....	246
10.3 Poly(ethylene glycol) Tethering.....	252
10.4 Physical Adsorption	257
10.5 Biomacromolecule Immobilization.....	259
10.6 Biomimetic Modification	263
10.7 Conclusion	266
References	268
 11 Modulation of the Adsorption and Activity of Protein/Enzyme on the Polypropylene Microporous Membrane Surface by Surface Modification	 271
<i>Qian Yang, Zhi-Kang Xu, Zheng-Wei Dai</i>	
11.1 Surface Modifications for Reducing Nonspecific Protein Adsorption	271
11.1.1 Plasma treatment	273
11.1.2 Ultraviolet (UV) modification	276
11.1.3 γ -Ray-induced modification	282
11.1.4 Ozone Method	285
11.2 Surface-Modified PPMs for Enzyme Immobilization	286
11.2.1 Physical Adsorption/Entrapment.....	287
11.2.2 Covalent Binding.....	289
11.2.3 Site-Specific Immobilization	294
11.3 Conclusions	295
References	295

12 Nonbiofouling Surfaces Generated from Phosphorylcholine-Bearing Polymers	299
<i>Yasuhiko Iwasaki, Nobuo Nakabayashi, Kazuhiko Ishihara</i>	
12.1 Introduction	299
12.2 Forces Involved in Protein Adsorption	300
12.3 Design of Phosphorylcholine-Bearing Surfaces	302
12.4 Mechanism of Resistance to Protein Adsorption on the MPC Polymer Surface	303
12.5 Fundamental Interactions Between MPC Polymers and Proteins.....	310
12.6 Recent Designs of Nonfouling Phosphorylcholine Surfaces with Well-Defined Structures	312
12.7 Control of Cell–Material Interactions on a Phosphorylcholine Polymer Nonfouling Surface	314
12.7.1 Cell Manipulation on a Well-Defined Phosphorylcholine Polymer Brush.....	315
12.7.2 Selective Cell Attachment to a Biomimetic Polymer Surface Through the Recognition of Cell-Surface Tags	318
12.8 Conclusion	321
References	321
Subject Index	327

Proteins at Solid-Liquid Interfaces

Déjardin, P. (Ed.)

2006, XVI, 330 p. 162 illus., Hardcover

ISBN: 978-3-540-32657-1
