

## Contents

<b>1. Interaction of Ethylene and Other Compounds with the Ethylene Receptor: Agonists and Antagonists</b>	
EDWARD C. SISLER, VARVARA P. GRICHKO AND MARGRETHE SEREK . . . . .	1
1.1 Introduction . . . . .	1
1.2 Ethylene and Agonists. . . . .	1
1.2.1 Discovery of Ethylene Action and Some Important Lessons from the Past . . . . .	1
1.2.2 Molecular Requirements . . . . .	2
1.2.3 Ethylene Binding . . . . .	4
1.3 Ethylene Antagonists. . . . .	5
1.3.1 Chemicals Adjuvants Counteracting Ethylene . . . . .	5
1.3.2 Ethylene Agonists That Require Continuous Exposure to Give a Response. . . . .	6
1.3.3 Naturally Occurring Ethylene Antagonists . . . . .	9
1.3.4 Photoactivated Compounds . . . . .	9
1.4 Ethylene Agonists That Require a Single Exposure . . . . .	12
1.4.1 Ring Strain and Cyclopropene . . . . .	12
1.4.2 1-Methylcyclopropene . . . . .	13
1.4.3 3-Methylcyclopropene . . . . .	13
1.4.4 3,3-Dimethylcyclopropene . . . . .	15
1.4.5 Other 1-Alkyl Cyclopropenes . . . . .	15
1.4.6 Other Cyclopropenes . . . . .	15
1.4.7 Is the Binding Site Restricted? . . . . .	16
1.4.8 Hydrophobic Interaction . . . . .	17
1.5 How Does an Agonist Start a Signal? . . . . .	18
1.6 Selected Papers on Significance of Ethylene Antagonists . . . . .	19
1.6.1 Application in Molecular Biology. . . . .	19
1.6.2 Application for Control of Plant Growth and Development . . . . .	22
1.6.3 Commercial Use. . . . .	24
1.6.4 Limitations of Compounds . . . . .	26
1.6.5 Future Needs . . . . .	28
1.7 Concluding Remarks. . . . .	28
References . . . . .	29

<b>2. Ethylene and Plant Growth</b>	
DANNY THOLEN, HENDRIK POORTER AND LAURENTIUS A.C.J. VOESENEK . . . . .	35
2.1 Introduction . . . . .	35
2.2 Plant Growth Rate . . . . .	36
2.2.1 Plant Growth Analysis . . . . .	37
2.3 Ethylene and Leaf Expansion . . . . .	38
2.4 Ethylene and Photosynthesis . . . . .	41
2.5 Ethylene and Growth under Optimal Conditions . . . . .	42
2.6 Ethylene and Growth under Limiting Environmental Conditions . . . . .	43
2.7 Ethylene: Effects on Plant Growth? . . . . .	45
References . . . . .	46
<b>3. Ethylene and Leaf Senescence</b>	
ANTONIO FERRANTE AND ALESSANDRA FRANCINI . . . . .	51
3.1 Introduction . . . . .	51
3.2 Ethylene during Leaf Development . . . . .	52
3.3 Ethylene-Induced Leaf Senescence . . . . .	53
3.3.1 Leaf Yellowing . . . . .	53
3.3.2 Leaf Abscission . . . . .	54
3.4 Effect of Ethylene Inhibitors, Promoters, and Ethylene-Releasing Compounds on Leaf Senescence . . . . .	55
3.5 Leaf Sensitivity and Ethylene Production . . . . .	58
3.6 Effect of Ethylene on the Antioxidant System during Leaf Senescence . . . . .	59
3.7 Ethylene and Other Plant Hormones during Leaf Senescence . . . . .	61
3.8 Ethylene and Gene Expression during Leaf Senescence . . . . .	61
References . . . . .	64
<b>4. Effect of Ethylene on Adventitious Root Formation</b>	
JINXIANG WANG AND RUICHI PAN . . . . .	69
4.1 Introduction . . . . .	69
4.2 Ethylene Stimulates Adventitious Root Formation . . . . .	70
4.3 Ethylene Inhibits Adventitious Rooting . . . . .	72
4.4 Ethylene Has No Role in Adventitious Root Formation . . . . .	74
4.5 Interactions between Ethylene and Other Hormones . . . . .	74
4.6 Discussion . . . . .	75
4.7 Outlook . . . . .	77
References . . . . .	77
<b>5. Ethylene and Plant Responses to Abiotic Stress</b>	
UWE DRUEGE . . . . .	81
5.1 Introduction . . . . .	81
5.2 Abiotic Stress and Ethylene Biosynthesis . . . . .	81
5.2.1 Wounding and Mechanical Stress . . . . .	82
5.2.1.1 Wound Ethylene in Fruits . . . . .	84

Contents	XV

<b>6. Ethylene in the <i>Rhizobium</i>-Legume Symbiosis</b>	
JEROEN DEN HERDER, SOFIE GOORMACHTIG AND MARCELLE HOLSTERS ..... 119	
6.1 <i>An Introduction to Legume Nodulation</i> ..... 119	
6.2 <i>Ethylene-Sensitive RHC Nodulation</i> ..... 121	
<ul style="list-style-type: none"> <li>6.2.1 <i>Pharmacological Evidence</i> ..... 121</li> <li>6.2.2 <i>Mutant Analysis and Transgenic Approaches in</i> <i>Plants and Bacteria</i> ..... 123</li> <li>6.2.3 <i>Ethylene Interferes with NF Signaling Within the</i> <i>Root Hairs</i> ..... 125</li> </ul>	
6.3 <i>Ethylene is Indispensable for LRB Nodulation</i> ..... 125	
<ul style="list-style-type: none"> <li>6.3.1 <i>Pharmacological Data Show That Ethylene is Needed</i> <i>for Crack-Entry Invasion</i>..... 126</li> <li>6.3.2 <i>Ethylene Mediates the Phenotypic Plasticity in</i> <i>Root Nodule Development</i> ..... 126</li> <li>6.3.3 <i>Ethylene Mediates the Switch from Intercellular</i> <i>to Intracellular Invasion</i> ..... 127</li> </ul>	
6.4 <i>Ethylene Determines Nodule Primordium Positioning</i> ..... 128	
6.5 <i>Long-Distance Regulation Does Not Involve Ethylene</i> ..... 129	
6.6 <i>Conclusions</i> ..... 129	
<i>References</i> ..... 130	
<b>7. The Role of Ethylene in the Regulation of Stem Gravitropic Curvature</b>	
MARCIA A. HARRISON ..... 135	
7.1 <i>The Modulating Role of Ethylene on Stem Gravitropic</i> <i>Curvature</i> ..... 135	
7.2 <i>Overview of Curvature Kinetics for Light-Grown Compared</i> <i>to Dark-Grown Tissues</i> ..... 136	
7.3 <i>Ethylene Production Increases after Horizontal</i> <i>Reorientation and during Curvature</i> ..... 138	

7.4	Differing Sensitivities to Exogenous Ethylene may alter the Gravitropic Response .....	140
7.4.1	Evidence of a Stimulatory Role for Ethylene in Stem Gravitropism.....	140
7.4.2	Ethylene's Role in Slowing Gravitropic Curvature .....	143
7.5	Ethylene and Auxin Cross-Talk in the Regulation of Gravitropic Curvature.....	144
7.6	Concluding Remarks.....	147
	References .....	148
<b>8.</b>	<b>Role of Ethylene in Fruit Ripening</b>	
	PRAVENDRA NATH, PRABODH K. TRIVEDI, VIDHU A. SANE AND ANIRUDHA P. SANE .....	151
8.1	Introduction.....	151
8.2	What is Fruit Ripening? .....	152
8.3	Ethylene Biosynthesis in Fruits .....	154
8.3.1	ACC Synthase in Fruits .....	154
8.3.2	ACC Oxidase in Fruits.....	155
8.4	Ethylene Perception and Signal Transduction in Fruits .....	156
8.5	Gene Expression and Regulation during Ripening in Fruits.....	158
8.5.1	Developmental Regulation .....	159
8.5.2	Ethylene Regulation of Transcription Factors.....	159
8.5.3	Gene Expression during Softening.....	160
8.5.4	Genes Involved in Changes in Pigments and Volatiles.....	162
8.5.5	Other Ripening-Related Genes Isolated by Differential Screening .....	162
8.6	Roles of Other Hormones and Metabolites during Ripening .....	163
8.6.1	Auxin.....	164
8.6.2	Jasmonate and Jasmonic Acid .....	164
8.6.3	Absciscic Acid .....	165
8.6.4	Other Metabolites.....	166
8.7	Biotechnological Usage of Ethylene Biology.....	167
8.7.1	Transgenic Fruits with Altered Ethylene Production .....	167
8.7.2	Transgenic Fruits with Altered Ethylene Perception .....	170
8.7.3	Transgenic Fruits with Altered Fruit Softening.....	171
8.7.4	Ripening-Related Promoters.....	174
8.8	Conclusions .....	176
	References .....	176
