## Contents

<b>1</b>	<b>Introduction</b> . . . . .	1
1.1	The beginnings . . . . .	1
<b>2</b>	<b>Basic definitions and preliminaries</b> . . . . .	7
2.1	Volume . . . . .	10
2.2	Mean exit time . . . . .	13
2.3	Laplace operator . . . . .	14
2.4	Resistance . . . . .	16
2.5	Model fractals . . . . .	18

---

### Part I Potential theory and isoperimetric inequalities

---

<b>3</b>	<b>Some elements of potential theory</b> . . . . .	25
3.1	Electric network model . . . . .	25
3.2	Basic inequalities . . . . .	29
3.3	Harnack inequality and the Green kernel . . . . .	35
3.4	Resistance regularity . . . . .	43
<b>4</b>	<b>Isoperimetric inequalities</b> . . . . .	49
4.1	An isoperimetric problem . . . . .	50
4.2	Transient graphs . . . . .	53
4.3	Open problems . . . . .	60
<b>5</b>	<b>Polynomial volume growth</b> . . . . .	61
5.1	Faber-Krahn inequality and on-diagonal upper bounds . . . . .	62

---

**Part II Local theory**

---

<b>6</b>	<b>Motivation of the local approach</b>	71
6.1	Properties of the exit time	71
6.2	Examples	76
<b>7</b>	<b>Einstein relation</b>	83
7.1	Weakly homogeneous graphs	84
7.2	Harnack graphs	86
7.3	Strong anti-doubling property	90
7.4	Local space-time scaling	92
<b>8</b>	<b>Upper estimates</b>	95
8.1	Some further heuristics	95
8.2	Mean value inequalities	96
8.3	Diagonal estimates for strongly recurrent graphs	97
8.4	Local upper estimates and mean value inequalities	99
8.5	$\lambda, m$ -resolvent	100
8.5.1	Definition of $\lambda, m$ -resolvent	100
8.5.2	Upper bound for the $0, m$ -resolvent	101
8.5.3	Feynman-Kac formula for polyharmonic functions	101
8.5.4	Upper bound for $\lambda, m$ -resolvent	105
8.6	Diagonal upper estimates	108
8.7	From $DUE$ to $UE$	110
8.8	Completion of the proof of Theorem 8.2	113
8.9	Upper estimates and the relative Faber-Krahn inequality	115
8.9.1	Isoperimetric inequalities	116
8.9.2	On-diagonal upper bound	117
8.9.3	Estimate of the Dirichlet heat kernel	117
8.9.4	Proof of the diagonal upper estimate	122
8.9.5	Proof of $DUE(E) \implies (FK)$	124
8.9.6	Generalized Davies-Gaffney inequality	126
8.9.7	Off-diagonal upper estimate	128
<b>9</b>	<b>Lower estimates</b>	131
9.1	Parabolic super mean value inequality	131
9.2	Particular lower estimate	136
9.2.1	Bounded oscillation	136
9.2.2	Time derivative of the heat kernel	138
9.2.3	Near diagonal lower estimate	140
9.3	Lower estimates without upper ones	142
9.3.1	Very strongly recurrent graphs	147
9.3.2	Harnack inequality implies a lower bound	149

<b>10 Two-sided estimates</b> .....	153
10.1 Time comparison (the return route) .....	155
10.2 Off-diagonal lower estimate .....	159
<b>11 Closing remarks</b> .....	165
11.1 Parity matters .....	165
11.2 Open problems .....	168
<b>12 Parabolic Harnack inequality</b> .....	169
12.1 A Poincaré inequality .....	178
<b>13 Semi-local theory</b> .....	181
13.1 Kernel function .....	181
13.2 Two-sided estimate .....	182
13.3 Open problems .....	184
<b>Subject index</b> .....	189
<b>References</b> .....	191
