### Part I Introduction

---

#### Introduction to Interactive Video

<i>Riad I. Hammoud</i> .....	3
1 Introduction .....	3
2 What is an Interactive Video? .....	4
3 Video Transformation and Re-structuring Phases .....	6
3.1 Video Structure Components .....	6
3.2 Toward Automatic Video Re-structuring .....	9
3.2.1 Shot Boundary Detection .....	9
3.2.2 Key-frame Detection .....	10
3.2.3 Object Detection .....	11
3.2.4 Intra-Shot Object Tracking .....	13
3.2.5 Recognition and Classification of Video Shots and Objects .....	14
3.2.6 Video Events, Highlights and Scenes Detection .....	15
3.2.7 Text Detection in Video Images .....	15
3.2.8 Video Searching and Browsing Engines .....	16
3.3 Establishing Navigational Links .....	17
4 Rhetoric of Interactive Video Playback .....	18
4.1 Synchronization of Processed Content Playback .....	19
4.2 Design of End-Users Interfaces .....	20
5 Examples of Authoring and Navigational Systems .....	20
6 Book Organization .....	24

#### Automatic Video Summarization

<i>Benoit Huet, Bernard Merialdo</i> .....	27
1 Introduction .....	27
2 State of the Art in Video Summarization .....	27
2.1 Dynamic Summaries .....	28
2.2 Static Summaries .....	29

2.3	Summary Evaluation .....	30
3	A Generic Summarization Approach .....	31
3.1	Maximum Recollection Principle .....	31
3.2	Illustration .....	32
3.3	Maximum Recollection Principle Experiments .....	33
4	Multi-Video Summarization .....	34
4.1	Definition .....	35
4.2	Multi-Video Summarization Experiments .....	36
5	Joint Video and Text Summarization .....	37
5.1	Joint Video and Text Summarization Experiments .....	38
6	Constrained Display Summaries .....	39
7	Home Video Network Interaction .....	39
8	Conclusion .....	41

---

## Part II Algorithms I

---

### Building Object-based Hyperlinks in Videos:

#### Theory and Experiments

	<i>Marc Gelgon, Riad I. Hammoud</i> .....	45
1	Description of the Problem and Purpose of the Chapter .....	45
2	Particularities of Object Detection and Tracking Applied to Building Interactive Videos .....	47
3	Detection of Objects .....	48
3.1	Introduction .....	48
3.2	Motion-Based Detection .....	49
3.3	Interactive Detection .....	49
4	Object Tracking .....	49
4.1	Design and Matching of Object Observations .....	50
4.2	Probabilistic Modelling of the Tracking Task .....	51
4.3	Example of a Object Tracking Technique with Failure Detection .....	53
4.3.1	Object Tracking by Robust Affine Motion Model Estimation .....	53
4.3.2	Automatic Failure Detection .....	55
5	Building Object-Based Hyperlinks in Video .....	57
5.1	Appearance Changes in Video Shot .....	57
5.2	Gaussian Mixture Framework for Classifying Inter-Shots Objects .....	59
5.2.1	Object Classes Registration Interface .....	59
5.2.2	Gaussian Mixture Modeling .....	60
5.2.3	Classification of Non-Registered Object Occurrences ....	62
5.3	Framework for Experimental Validation .....	63
6	Conclusion and Perspectives .....	64

**Real Time Object Tracking in Video Sequences**

<i>Yunqiang Chen, Yong Rui</i> .....	67
1 Introduction .....	67
2 Contour Tracking Using HMM .....	70
2.1 Observation Likelihood of Multiple Cues .....	71
2.2 Computing Transition Probabilities .....	72
2.3 Best Contour Searching by Viterbi Algorithm .....	72
3 Improving Transition Probabilities .....	73
3.1 Encoding Region Smoothness Constraint Using JPM .....	74
3.2 Efficient Matching by Dynamic Programming .....	75
4 Combining HMM with Unscented Kalman Filter .....	76
4.1 UKF for Nonlinear Dynamic Systems .....	77
4.2 Online Learning of Observation Models .....	80
4.3 Complete Tracking Algorithm .....	82
5 Experiments .....	83
5.1 Multiple Cues vs. Single Cue .....	84
5.2 JPM-HMM vs. Plain HMM .....	85
5.3 UKF vs. Kalman Filter .....	86
6 Conclusion .....	87

**On Film Character Retrieval in Feature-Length Films**

<i>Ognjen Arandjelović, Andrew Zisserman</i> .....	89
1 Introduction .....	89
1.1 Previous Work .....	91
2 Method Details .....	92
2.1 Facial Feature Detection .....	92
2.1.1 Training .....	93
2.1.2 SVM-Based Feature Detector .....	94
2.2 Registration .....	95
2.3 Background Removal .....	96
2.4 Compensating for Changes in Illumination .....	98
2.5 Comparing Signature Images .....	99
2.5.1 Improving Registration .....	99
2.5.2 Distance .....	100
3 Evaluation and Results .....	101
3.1 Evaluation Methodology .....	101
3.2 Results and Discussion .....	101
4 Summary and Conclusions .....	103

**Visual Audio: An Interactive Tool for  
Analyzing and Editing of Audio in the Spectrogram**

<i>C.G. van den Boogaart, R. Lienhart</i> .....	107
1 Introduction .....	107
2 From Audio to Visual Audio and Back Again .....	111
2.1 Time-Frequency Transformation: Gabor Transformation .....	111

2.2	One Degree of Freedom: Resolution Zooming .....	115
2.3	Fast Computation .....	117
2.4	Visualization: Magnitude, Phase and Quantization .....	118
3	Manual Audio Brushing .....	119
3.1	Time-Frequency Resolution .....	119
3.2	Selection Masks .....	120
3.3	Interaction .....	123
4	Smart Audio Brushing .....	124
4.1	Audio Objects: Template Masks .....	125
4.2	Detecting Audio Objects.....	125
4.3	Deleting Audio Objects.....	127
5	Conclusion .....	129

---

## Part III Algorithms II

---

### Interactive Video via Automatic Event Detection

	<i>Baoxin Li, M. Ibrahim Sezan</i> .....	133
1	Introduction .....	133
1.1	Related Work .....	134
2	Event-based Modeling and Analysis of Multimedia Streams - A General Framework .....	135
3	Event Modeling via Probabilistic Graphical Models .....	136
4	Event Detection via Maintaining and Tracking Multiple Hypotheses in A Probabilistic Graphical Model .....	139
5	Advantages of Using the Probabilistic Graphical Models.....	142
6	A Case Study: Football Coaching Video Analysis .....	144
6.1	American Football Coaching System .....	144
6.2	Deterministic Algorithm .....	145
6.3	Probabilistic Algorithm.....	147
6.4	Experimental results and performance comparison .....	149
7	A Novel Interface for Supporting Interactive Video .....	150
8	Summary and Future Work.....	153

### Bridging the Semantic-Gap in E-Learning Media Management

	<i>Chitra Dorai</i> .....	157
1	Introduction .....	157
1.1	Streaming Media Business Applications.....	158
1.2	Customer Relationship Management Applications .....	158
1.3	E-Learning Media Applications .....	159
2	Media Computing for Semantics.....	160
2.1	Computational Media Aesthetics .....	162
2.2	Understanding Semantics in Media.....	163
3	Computational Media Aesthetics at Work: An Example .....	164
3.1	Narrative Structures in Instructional Media .....	165

3.2	SVM-Based Instructional Audio Analysis .....	166
3.2.1	Audio Feature Extraction .....	168
3.2.2	Audio Classification Using Combinations of SVMs .....	169
3.2.3	Experimental Results .....	169
3.3	Narrative Constructs in Instructional Media:	
	Discussion Sections .....	170
3.3.1	Audio Preprocessing .....	171
3.3.2	Modeling Discussion Scenes .....	171
3.3.3	Discussion Scene State Machine .....	172
3.3.4	Experimental Results .....	174
3.4	Visual Narrative Constructs in Instructional Media .....	175
3.4.1	Homogeneous Video Segmentation .....	176
3.4.2	Detecting Picture-in-Picture Segments .....	177
3.4.3	Detecting Instructor Segments .....	178
3.4.4	Identifying Candidate Slide and Web Page Segments ....	178
3.4.5	Discriminating Slide and Web-Page Segments .....	179
3.4.6	Experimental Results .....	183
4	Conclusion .....	184

---

## Part IV Interfaces

---

### Interactive Searching and Browsing of Video Archives: Using Text and Using Image Matching

	<i>Alan F. Smeaton, Cathal Gurrin, Hyowon Lee</i> .....	189
1	Introduction .....	189
2	Managing Video Archives .....	190
3	Físchlár-News: System Description .....	194
4	Físchlár-TRECVID: System Description .....	198
4.1	TRECVID: Benchmarking Video Information Retrieval .....	198
4.2	Físchlár-TRECVID .....	200
5	Analysis of Video Searching and Browsing .....	204
6	Conclusions .....	205

### Locating Information in Video by Browsing and Searching

	<i>Andreas Girsensohn, Frank Shipman, John Adcock, Matthew Cooper, Lynn Wilcox</i> .....	207
1	Introduction .....	207
1.1	Detail-on-demand Video .....	207
1.2	Video Search .....	208
2	Overview .....	209
2.1	Detail-on-demand Video .....	209
2.2	Video Search .....	210
3	Hypervideo Summarizations .....	211
3.1	Viewing Interface .....	213
3.2	Determining the Number of Summary Levels .....	214

XVI Contents

3.3	Segmenting Video into Takes and Clips .....	214
3.4	Selecting Clips for Summary Levels .....	215
3.5	Placing Links Between Summary Levels .....	216
4	Video Search User Interface.....	219
4.1	Query Result Visualizations: Story Collage, Shot Keyframe, Video Timeline .....	220
4.2	Feedback on Document Relevance: Tooltips and Magnified Keyframes .....	222
4.3	Overlay Cues: Visited Story, Current Playback Position, Query Relevance.....	223
5	Conclusions.....	224
