
Contents

Algebraic geometry and geometric modeling: insight and computation <i>Ron Goldman</i>	1
Implicitization using approximation complexes <i>Marc Chardin</i>	23
Piecewise approximate implicitization: experiments using industrial data <i>Mohamed F. Shalaby, Jan B. Thomassen, Elmar M. Wurm, Tor Dokken, Bert Jüttler</i>	37
Computing with parameterized varieties <i>Daniel Lazard</i>	53
Implicitization and Distance Bounds <i>Martin Aigner, Ibolya Szilágyi, Bert Jüttler, Josef Schicho</i>	71
Singularities and their deformations: how they change the shape and view of objects <i>Alexandru Dimca</i>	87
Overview of topological properties of real algebraic surfaces <i>Viatcheslav Kharlamov</i>	103
Illustrating the classification of real cubic surfaces <i>Stephan Holzer, Oliver Labs</i>	119
Bézier patches on almost toric surfaces <i>Rimvydas Krasauskas</i>	135
On parametric surfaces of low degree in $\mathbb{P}^3(\mathbb{C})$ <i>Mohamed Elkadi, André Galligo, Thi Ha Lê</i>	151

On the intersection with revolution and canal surfaces <i>Mario Fioravanti, Laureano Gonzalez-Vega, Ioana Necula</i>	169
A sampling algorithm computing self-intersections of parametric surfaces <i>A. Galligo, J.P. Pavone</i>	185
Elimination in generically rigid 3D geometric constraint systems <i>Jörg Peters, Meera Sitharam, Yong Zhou, JianHua Fan</i>	205
Minkowski decomposition of convex lattice polygons <i>Ioannis Z. Emiris, Elias P. Tsigaridas</i>	217
Reducing the number of variables of a polynomial <i>Enrico Carlini</i>	237
Index	249

Algebraic Geometry and Geometric Modeling

Elkadi, M.; Mourrain, B.; Piene, R. (Eds.)

2006, X, 252 p. 52 illus., 27 illus. in color., Hardcover

ISBN: 978-3-540-33274-9
