

Contents

1 What are Endophytes?	1
<i>Barbara Schulz, Christine Boyle</i>	
1.1 Introduction and Definitions	1
1.2 Colonisation	2
1.3 Assemblages and Adaptation	4
1.4 Life History Strategies	6
1.5 Balanced Antagonism	7
1.6 Conclusions	9
References	10

Part I Endophytic Bacteria

2 Spectrum and Population Dynamics of Bacterial Root Endophytes	15
<i>Johannes Hallmann, Gabriele Berg</i>	
2.1 Introduction	15
2.2 Population Density	15
2.3 Bacterial Spectrum	16
2.4 Bacterial Diversity	21
2.5 Factors Influencing Colonisation.....	21
2.5.1 Methodology	21
2.5.2 Geography	22
2.5.3 Plant Species	22
2.5.4 Plant Genotype	23
2.6 Interactions	24
2.6.1 Plant Pathogens	24
2.6.2 Plant Symbionts	25
2.6.3 Plant Defence Mechanisms	25
2.6.4 Agricultural Practices	25
2.7 Potential Human Pathogens Among Root Endophytes.....	26
2.8 Conclusions	27
References	28

3	Bacterial Endophytes as Elicitors of Induced Systemic Resistance	33
	<i>Joseph W. Kloepper, Choong-Min Ryu</i>	
3.1	Introduction and Terminology	33
3.2	Scope of Endophytes that Elicit Induced Resistance and Pathosystems Affected	34
3.3	Internal Colonization of Endophytes that Elicit Induced Resistance	39
3.4	Plant Responses to Endophytic Elicitors	41
3.5	Implementation in Production Agriculture: Two Case Studies	44
3.6	Conclusions	49
	References	50
4	Control of Plant Pathogenic Fungi with Bacterial Endophytes	53
	<i>Gabriele Berg, Johannes Hallmann</i>	
4.1	Introduction	53
4.2	Spectrum of Indigenous Endophytic Bacteria with Antagonistic Potential Towards Fungal Plant Pathogens	54
4.3	Mode of Action of Antagonistic Bacteria	58
4.3.1	Antibiosis	58
4.3.2	Competition	59
4.3.3	Lysis	59
4.3.4	Induction of Plant Defence Mechanisms	60
4.3.5	Plant Growth	60
4.4	Control Potential of Endophytic Bacteria.....	60
4.5	Enhancing Biocontrol Efficiency	61
4.6	Conclusions	65
	References	66
5	Role of Proteins Secreted by Rhizobia in Symbiotic Interactions with Leguminous Roots	71
	<i>Maged M. Saad, William J. Broughton, William J. Deakin</i>	
5.1	Introduction	71
5.2	Bacterial Protein Secretion Systems	73
5.2.1	Type I Secretion Systems	73
5.2.2	Type II Secretion Systems	77
5.2.3	Type III Secretion Systems	77
5.2.4	Type IV Secretion Systems	82
5.3	Conclusions	83
	References	83

6 Research on Endophytic Bacteria: Recent Advances with Forest Trees	89
<i>Richa Anand, Leslie Paul, Chris Chanway</i>	
6.1 Introduction	89
6.2 Bacterial Endophytes of Forest Trees.....	91
6.3 Endophytic Bacteria of Conifers.....	92
6.4 Modes and Sites of Entry.....	95
6.5 Mechanisms of Plant Growth Promotion	97
6.6 Future Work.....	102
References	103

Part II Endophytic Fungi

7 Biodiversity of Fungal Root-Endophyte Communities and Populations, in Particular of the Dark Septate Endophyte <i>Phialocephala fortinii</i> s. l.	107
<i>Thomas N. Sieber, Christoph R. Grünig</i>	
7.1 Introduction	107
7.2 Species Diversity of Root Endophyte Communities	108
7.2.1 Geography and Climate.....	109
7.2.2 Soil	114
7.2.3 Multitrophic Interactions	115
7.2.4 Natural and Anthropogenic Disturbances	117
7.3 Dark Septate Endophytes	119
7.3.1 History	119
7.3.2 Biodiversity.....	119
7.3.3 Diversity of <i>Phialocephala fortinii</i>	121
7.4 Conclusions	125
References	126
8 Endophytic Root Colonization by <i>Fusarium</i> Species: Histology, Plant Interactions, and Toxicity	133
<i>Charles W. Bacon, Ida E. Yates</i>	
8.1 Introduction	133
8.2 Plant and Fungus Interactions	134
8.2.1 Hemibiotrophic Characteristics.....	138
8.2.2 Histology	139
8.2.3 Mycotoxins.....	143
8.2.4 Mycotoxins and Host Relationships.....	144
8.2.5 Physiological Interactions and Defense Metabolites...	145
8.3 Summary.....	146
References	147

9 Microbial Endophytes of Orchid Roots	153
<i>Paul Bayman, J. Tupac Otero</i>	
9.1 Introduction	153
9.2 Habits and Types of Orchid Roots	153
9.3 Bacteria as Epiphytes and Endophytes of Orchid Roots	154
9.4 Orchid Endophytes or Orchid Mycorrhizal Fungi?	155
9.5 Problems with the Taxonomy of Orchid Endophytic Fungi....	157
9.6 Host Specificity of Orchid Endophytes	158
9.7 Endophytic Fungi in Roots of Terrestrial, Photosynthetic Orchids	158
9.8 Endophytic Fungi in Roots of Myco-Heterotrophic Orchids ..	167
9.9 Endophytic Fungi in Roots of Epiphytic and Lithophytic Orchids	169
9.10 Endophytic Fungi in Epiphytic Orchid Roots: Importance to Plant Hosts.....	171
9.11 Conclusions	172
References	173
10 Fungal Endophytes in Submerged Roots	179
<i>Felix Bärlocher</i>	
10.1 Introduction	179
10.2 Aquatic Hyphomycetes	180
10.3 Fungi in Submerged Roots	181
10.4 Conclusions and Outlook.....	186
References	188
11 Nematophagous Fungi as Root Endophytes	191
<i>Luis V. Lopez-Llorca, Hans-Börje Jansson, José Gaspar Maciá Vicente, Jesús Salinas</i>	
11.1 Introduction	191
11.2 Nematophagous Fungi.....	191
11.2.1 Nematode Parasites	192
11.2.2 Mycoparasites	195
11.2.3 Root Endophytes.....	195
11.3 Concluding Remarks	202
References	203
12 Molecular Diversity and Ecological Roles of Mycorrhiza-Associated Sterile Fungal Endophytes in Mediterranean Ecosystems	207
<i>Mariangela Girlanda, Silvia Perotto, Anna Maria Luppi</i>	
12.1 Introduction	207

12.2	Diversity of DSE Associates of Ecto- and Endo-Mycorrhizal Plants in Mediterranean Ecosystems in Northern Italy	209
12.3	Ecological Relationships with Conventional Mycorrhizal and Pathogenic Symbionts	214
12.4	Conclusions	219
	References	220
13	<i>Oidiodendron maius</i>: Saprobe in Sphagnum Peat, Mutualist in Ericaceous Roots?	227
	<i>Adrianne V. Rice, Randolph S. Currah</i>	
13.1	Introduction	227
13.2	<i>Oidiodendron maius</i> as a Saprobe.....	230
13.3	Ericoid Mycorrhizas	234
13.4	<i>Oidiodendron maius</i> as an Ericoid Mycorrhizal Fungus	237
13.5	Significance and Relevance.....	239
13.6	Conclusions	241
	References	242
14	Mycorrhizal and Endophytic Fungi of Epacrids (Ericaceae)	247
	<i>John W.G. Cairney</i>	
14.1	Introduction	247
14.2	Endophytes of Epacrid Roots.....	248
14.3	Diversity and Spatial Distribution of Endophyte Taxa in Epacrid Root Systems.....	251
14.4	Mycorrhizal Status of Endophytes from Epacrids.....	253
14.5	Saprotrophic Potential of Mycorrhizal Fungi.....	254
14.6	Symbiotic Functioning of Mycorrhizal Fungi	255
14.7	Conclusions	257
	References	257
15	Mutualistic Interactions with Fungal Root Endophytes	261
	<i>Barbara Schulz</i>	
15.1	Introduction	261
15.2	Colonisation and Histology	262
15.3	Secondary Metabolites.....	264
15.4	Growth Enhancement.....	265
15.5	Disease Suppression	269
15.6	Stress Tolerance.....	271
15.7	Factors Determining the Status of the Interaction.....	272
15.8	Conclusions	273
	References	276

16 Understanding the Roles of Multifunctional Mycorrhizal and Endophytic Fungi	281
<i>Mark C. Brundrett</i>	
16.1 How Mycorrhizal Fungi Differ from Endophytes	281
16.1.1 Definitions	281
16.1.2 Roles of Endophytes and Mycorrhizal Fungi.....	282
16.2 Endophytic Activity by Mycorrhizal Fungi.....	283
16.2.1 Glomeromycotan (Vesicular-Arbuscular Mycorrhizal) Fungi.....	283
16.2.2 Ectomycorrhizal Fungi.....	286
16.2.3 Fungi in Orchids	287
16.2.4 Ericoid Mycorrhizal Fungi	290
16.2.5 Endophytic Fungi in Mycorrhizal Roots.....	290
16.3 Issues with the Identification and Categorisation of Fungi in Roots	291
16.4 Evolution of Root-Fungus Associations	292
16.5 Conclusions	293
References	293

Part III Methods

17 Isolation Procedures for Endophytic Microorganisms	299
<i>Johannes Hallmann, Gabriele Berg, Barbara Schulz</i>	
17.1 Introduction	299
17.2 Surface Sterilisation	300
17.2.1 Pre-treatment	300
17.2.2 Sterilising Agents	301
17.2.3 Surfactants	305
17.2.4 Rinsing	305
17.2.5 Sterility Check and Optimisation.....	305
17.3 Culture of Tissue and Plant Fluid of Sterilised Roots on Nutrient Medium	306
17.3.1 Segments	306
17.3.2 Maceration of Root Tissue	306
17.3.3 Centrifugation of Root Tissue	307
17.4 Vacuum and Pressure Extraction	308
17.5 Media.....	309
17.5.1 Media for Isolating Bacteria	310
17.5.2 Media for Isolating Fungi	310
17.5.3 Supplements.....	310
17.5.4 Selective Media	311

17.6	Cultivation-Independent Methods.....	311
17.7	Quantification of Colonisation	313
17.8	Conclusions	313
	References	314
18	Microbial Interactions with Plants: a Hidden World?	321
	<i>Guido V. Bloembergen, Margarita M. Camacho Carvajal</i>
