

# Contents

<b>1. Ontological Engineering: Principles, Methods, Tools and Languages .....</b>	<b>1</b>
1.1 Introduction .....	1
1.2 What Is an Ontology? Viewpoints from a Philosopher and from an Ontology Engineer .....	3
1.3 What Are the Main Components of an Ontology? .....	5
1.4 Ontological Engineering .....	6
1.5 Principles for the Design of Ontologies .....	8
1.6 Ontology Development Process and Life Cycle .....	9
1.7 Methods, Methodologies, Tools and Languages .....	16
1.7.1 Methods, Methodologies and Tools Used for the Whole Ontology Development Life Cycle .....	16
1.7.2 Ontology Learning .....	22
1.7.3 Ontology Alignment and Merging .....	25
1.7.4 Ontology Evolution and Versioning .....	31
1.7.5 Ontology Evaluation .....	32
1.7.6 Ontology Implementation .....	34
1.8 Conclusions .....	38
1.9 Acknowledgements .....	39
References .....	39
<b>2. Using Ontologies in Software Engineering and Technology .....</b>	<b>49</b>
2.1 Introduction .....	49
2.2 Kinds of Ontologies .....	50
2.2.1 Heavyweight Versus Lightweight Ontologies .....	56
2.3 A Review of the Uses in SET .....	57
2.3.1 Ontology Versus Conceptual Model .....	63
2.3.2 Ontology Versus Metamodel .....	64
2.3.3 Ontologies in Software Engineering Environments .....	65
2.3.4 Representing Ontologies Using Software Engineering Techniques .....	67
2.3.5 Experiences and Lessons Learned in Software Engineering Research .....	69

2.4 A Proposal of Taxonomy.....	73
2.4.1 Ontologies of Domain .....	74
2.4.2 Ontologies as Software Artifacts.....	76
2.5 Review and Classification of Proposals in the Literature.....	79
2.5.1 Proposals of Ontologies of Domain.....	79
2.5.2 Proposals of Ontologies as Software Artifacts .....	86
References .....	95
 <b>3. Engineering the Ontology for the SWEBOK: Issues and Techniques.....</b>	<b>103</b>
3.1 Introduction .....	103
3.2 History and Principles of the SWEBOK Project .....	105
3.2.1 Hierarchical Organization.....	107
3.2.2 Reference Material and Matrix.....	108
3.2.3 Depth of Treatment.....	108
3.3 The Ontology of the SWEBOK from a Conceptual and Consensus-Reaching Perspective.....	109
3.4 The Ontology of the SWEBOK as a Formal Artifact.....	112
3.5 Fundamental Elements of the Ontology of the SWEBOK .....	114
3.5.1 Activities, Artifacts and Agents.....	114
3.5.2 Models, Specifications and Methods.....	116
3.5.3 Theoretical Standpoints and Guidelines .....	117
3.6 Conclusions .....	119
References .....	120
 <b>4. An Ontology for Software Development Methodologies and Endeavours.....</b>	<b>123</b>
4.1 Introduction .....	123
4.2 Ontology Architecture .....	125
4.2.1 The Communities Involved .....	125
4.2.2 Usage and Ontology Domains.....	127
4.2.3 Product and Process.....	131
4.3 Endeavour-Related Concepts.....	133
4.3.1 High-Level View .....	134
4.3.2 The Process Side.....	135
4.3.3 The Product Side .....	137
4.3.4 The Producer Side .....	140
4.3.5 Endeavour-Related Concepts: Conclusion .....	141
4.4 Method-Related Concepts .....	142
4.4.1 Templates and Resources .....	142
4.4.2 Duality in the Method Domain.....	143
4.4.3 Applying the Methodology.....	148

---

4.5 Conclusion .....	148
References .....	149
<b>5. Software Maintenance Ontology.....</b>	<b>153</b>
5.1 Introduction .....	153
5.2 Software Maintenance.....	154
5.3 An Ontology for Software Maintenance .....	156
5.3.1 Overview of the Ontology.....	157
5.3.2 The System Sub-ontology .....	158
5.3.3 The Computer Science Skills Sub-ontology .....	160
5.3.4 The Maintenance Process Sub-ontology .....	162
5.3.5 The Organizational Structure Sub-ontology .....	165
5.3.6 The Application Domain Sub-ontology .....	166
5.4. Validating the Ontology .....	166
5.4.1 Quality Validation .....	167
5.4.2 Relevance Validation .....	168
5.5 Putting the Maintenance Ontology to Work .....	169
5.6 Conclusion .....	171
References .....	172
<b>6. An Ontology for Software Measurement .....</b>	<b>175</b>
6.1 Introduction .....	175
6.2 Previous Analysis.....	177
6.3 A Running Example.....	178
6.4 The Proposal of Software Measurement Ontology .....	179
6.4.1 The SMO.....	179
6.5 Conclusions .....	194
References .....	195
<b>7. An Ontological Approach to SQL:2003 .....</b>	<b>197</b>
7.1 Introduction .....	197
7.2 SQL Evolution .....	198
7.3 The Ontology for SQL:2003 .....	201
7.3.1 The Data Types Sub-ontology .....	202
7.3.2 The Schema Objects Sub-ontology .....	204
7.4 Example .....	209
7.5 Conclusions.....	212
References .....	214
<b>8. The Object Management Group Ontology Definition</b>	
<b>Metamodel .....</b>	<b>217</b>
8.1 Introduction.....	218

8.2 Why a MOF Ontology Metamodel? .....	219
8.2.1 Why a Metamodel? .....	219
8.2.2 Why MOF? .....	220
8.2.3 Why Not UML? .....	221
8.3 The Ontology Development Metamodel .....	222
8.3.1 RDF/OWL Metamodel .....	224
8.3.2 Topic Maps .....	228
8.3.3 Common Logic .....	231
8.3.4 General Structure of Metamodels .....	233
8.4 Profiles and Mappings .....	235
8.4.1 The Need for Translation .....	235
8.4.2 UML Profiles .....	236
8.4.3 Mappings .....	238
8.4.4 Mapping CL .....	240
8.4.5 Interaction of Profiles and Mappings .....	241
8.5 Extendibility .....	242
8.5.1 Metaclass Taxonomy .....	242
8.5.2 Semantic Domain Models .....	243
8.5.3 <i>n</i> -ary associations .....	244
8.6 Discussion .....	244
8.7 Acknowledgments .....	245
References .....	246
<b>9. Ontologies, Meta-models, and the Model-Driven Paradigm .....</b>	<b>249</b>
9.1 Introduction .....	249
9.2 Models and Ontologies .....	253
9.2.1 What's in a Model? .....	253
9.2.2 What's in an Ontology? .....	255
9.3 Similarity Relations and Meta-modelling .....	257
9.3.1 Meta-models .....	258
9.3.2 Metameta-models .....	260
9.3.3 The Meta-pyramid, the Modelling Architecture of MDE .....	261
9.4 MDE and Ontologies .....	262
9.4.1 Domain and Upper-Level Ontologies .....	263
9.4.2 Relationship of Ontologies and System Models on Different Meta-levels .....	264
9.4.3 Employing Domain Ontologies in the MDA .....	265
9.4.4 Conceptual Benefits of an Ontology-Aware Meta-pyramid .....	267
9.4.5 Tools Based on an Ontology-Aware Meta-pyramid .....	268
9.4.6 The mega-Model of Ontology-Aware MDE .....	269
9.5 Related Work .....	270
9.6 Conclusions .....	271

---

9.7 Acknowledgments.....	271
References .....	271
<b>10. Use of Ontologies in Software Development Environments .....</b>	<b>275</b>
10.1 Introduction .....	275
10.2 From SDE to DOSDE .....	277
10.3 Domain-Oriented Software Development Environment.....	279
10.3.1 Domain Ontology in DOSDE .....	279
10.3.2 Task Ontology in DOSDE .....	280
10.3.3 Mapping Domain and Task.....	287
10.3.4 Using Knowledge Throughout the Software Development .....	288
10.4 From DOSDE to EOSDE.....	292
10.5 Enterprise-Oriented Software Development Environments.....	294
10.5.1 Enterprise Ontology .....	296
10.6 Tools in DOSDE and EOSDE.....	300
10.6.1 Domain Theory Browser.....	301
10.6.2 Sapiens: A Yellow Page's Software Tool.....	302
10.6.3 RHPlan: A Software Tool for Human Resource Planning.....	304
10.7 Conclusion .....	305
References .....	306
<b>11. Semantic Upgrade and Publication of Legacy Data.....</b>	<b>311</b>
11.1 Introduction and Motivation .....	311
11.2 Global Approach to Database-to-Ontology Mapping .....	314
11.3 Mapping Situations between Databases and Ontologies.....	315
11.4. The R <sub>2</sub> O Language.....	319
11.4.1 A Mapping Description Specified in R <sub>2</sub> O.....	320
11.4.2 Description of Database Schemas.....	321
11.4.3 Definition of Concept Mappings.....	322
11.4.4 Describing Conditions and Conditional Expressions.....	324
11.4.5 Describing Transformations.....	325
11.4.6 Attribute and Relation Mappings.....	326
11.5 The ODEMapster Processor.....	330
11.6 Experimentation: The Fund Finder Application .....	330
11.6.1 Ontologies in the Funding Domain .....	332
11.6.2 The Presentation Part: Semantic Publishing and Navigation.....	334
11.7 Conclusions and Future Work.....	335
11.8 Acknowledgements.....	337
References .....	337
