<b>Introduction</b> .....	1
---------------------------	---

---

## **Part I. The Communication Mechanism of Cognition**

---

<b>1. Matters of Method</b> .....	9
1.1 Sign- or Agent-Oriented Analysis of Language? .....	9
1.2 Verification Principle .....	11
1.3 Equation Principle .....	13
1.4 Objectivation Principle .....	14
1.5 Equivalence Principles for Interfaces and for Input/Output .....	16
1.6 Surface Compositionality and Time-Linearity .....	17
<b>2. Interfaces and Components</b> .....	21
2.1 Cognitive Agents with and without Language .....	21
2.2 Modalities and Media .....	23
2.3 Alternative Ontologies for Referring with Language .....	25
2.4 Theory of Language and Theory of Grammar .....	26
2.5 Immediate Reference and Mediated Reference .....	27
2.6 The SLIM Theory of Language .....	29
<b>3. Data Structure and Algorithm</b> .....	35
3.1 Proplets for Coding Propositional Content .....	35
3.2 Internal Matching between Language and Context Proplets .....	36
3.3 Storage of Proplets in a Word Bank .....	38
3.4 Time-Linear Algorithm of LA-Grammar .....	40
3.5 Cycle of Natural Language Communication .....	43
3.6 Bare Bone Example of Database Semantics: DBS-letter .....	46
<b>4. Concept Types and Concept Tokens</b> .....	51
4.1 Kinds of Proplets .....	51
4.2 Type-Token Relation for Establishing Reference .....	54
4.3 Context Recognition .....	57

4.4	Context Action	58
4.5	Sign Recognition and Production	59
4.6	Universal versus Language-Dependent Properties	61
<b>5.</b>	<b>Forms of Thinking</b>	<b>65</b>
5.1	Retrieving Answers to Questions	65
5.2	Episodic versus Absolute Propositions	69
5.3	Inference: Reconstructing <i>Modus Ponens</i>	71
5.4	Indirect Uses of Language	75
5.5	Secondary Coding as Perspective Taking	78
5.6	Shades of Meaning	79
<hr/>		
<b>Part II. The Major Constructions of Natural Language</b>		
<hr/>		
<b>6.</b>	<b>Intrapositional Functor–Argument Structure</b>	<b>87</b>
6.1	Overview	87
6.2	Determiners	89
6.3	Adjectives	94
6.4	Auxiliaries	97
6.5	Passive	98
6.6	Prepositions	100
<b>7.</b>	<b>Extrapositional Functor–Argument Structure</b>	<b>103</b>
7.1	Overview	103
7.2	Sentential Argument as Subject	105
7.3	Sentential Argument as Object	107
7.4	Adnominal Sentential Modifier with Subject Gap	108
7.5	Adnominal Sentential Modifier with Object Gap	111
7.6	Adverbial Sentential Modifier	112
<b>8.</b>	<b>Intrapositional Coordination</b>	<b>115</b>
8.1	Overview	115
8.2	Simple Coordination of Nouns in Subject and Object Position	118
8.3	Simple Coordination of Verbs and of Adjectives	123
8.4	Complex Coordination of Verbs and Objects: Subject Gapping	126
8.5	Complex Coordination of Subjects and Objects: Verb Gapping	130
8.6	Complex Coordination of Subjects and Verbs: Object Gapping	133
<b>9.</b>	<b>Extrapositional Coordination</b>	<b>137</b>
9.1	Overview	137
9.2	Interpretation and Production of Extrapositional Coordination	138
9.3	Simple Coordinations as Sentential Arguments and Modifiers	141

9.4	Complex Coordinations as Sentential Arguments and Modifiers . . . . .	147
9.5	Turn-Taking in Questions and Answers . . . . .	153
9.6	Complex Propositions as Thought Structures . . . . .	157
<b>10.</b>	<b>Intrapropositional and Extrapropositional Coreference . . . . .</b>	<b>161</b>
10.1	Overview . . . . .	161
10.2	Intrapropositional Coreference . . . . .	163
10.3	Langacker–Ross Constraint for Sentential Arguments . . . . .	165
10.4	Langacker–Ross Constraint for Adnominal Sentential Modifiers . . . . .	168
10.5	Langacker–Ross Constraint for Adverbial Sentential Modifiers . . . . .	171
10.6	Handling Pronominal Coreference by Means of Inference . . . . .	174
<hr/>		
<b>Part III. The Declarative Specification of Formal Fragments</b>		
<hr/>		
<b>11.</b>	<b>DBS.1: Hearer Mode . . . . .</b>	<b>183</b>
11.1	Automatic Word Form Recognition . . . . .	183
11.2	Lexicon of LA-hear.1 . . . . .	185
11.3	Preamble of LA-hear.1 . . . . .	187
11.4	Definition of LA-hear.1 . . . . .	188
11.5	Interpreting a Sequence of Sentences . . . . .	191
11.6	Storing the Output of LA-hear.1 in a Word Bank . . . . .	195
<b>12.</b>	<b>DBS.1: Speaker Mode . . . . .</b>	<b>197</b>
12.1	Definition of LA-think.1 . . . . .	197
12.2	Navigating with LA-think.1 . . . . .	199
12.3	Automatic Word Form Production . . . . .	202
12.4	Definition of LA-speak.1 . . . . .	203
12.5	Producing a Sequence of Sentences . . . . .	204
12.6	Summarizing the DBS.1 System . . . . .	207
<b>13.</b>	<b>DBS.2: Hearer Mode . . . . .</b>	<b>209</b>
13.1	Lexicon of LA-hear.2 . . . . .	209
13.2	Preamble and Definition of LA-hear.2 . . . . .	216
13.3	Interpreting a Sentence with Complex Noun Phrases . . . . .	220
13.4	Interpreting a Sentence with a Complex Verb Phrase . . . . .	226
13.5	Interpreting a Sentence with a Three-Place Verb . . . . .	229
13.6	Storing the Output of LA-hear.2 in a Word Bank . . . . .	234
<b>14.</b>	<b>DBS.2: Speaker Mode . . . . .</b>	<b>237</b>
14.1	Definition of LA-think.2 . . . . .	237
14.2	Definition of LA-speak.2 . . . . .	240
14.3	Automatic Word Form Production . . . . .	243

14.4 Producing a Sentence with Complex Noun Phrases . . . . .	249
14.5 Producing a Sentence with a Complex Verb Phrase . . . . .	254
14.6 Producing a Sentence with a Three-Place Verb . . . . .	258
<b>15. DBS.3: Adnominal and Adverbial Modifiers . . . . .</b>	<b>263</b>
15.1 Interpreting Elementary and Complex Modifiers . . . . .	263
15.2 ADN and ADA Interpretations of Prepositional Phrases . . . . .	272
15.3 ADV Interpretation of Prepositional Phrases . . . . .	277
15.4 Intensifiers in Noun Phrases and Prepositional Phrases . . . . .	282
15.5 Elementary Adverbs with Intensifiers . . . . .	288
15.6 Definition of LA-hear.3 . . . . .	291
<hr/>	
<b>Appendices</b>	
<hr/>	
<b>A. Universal Basis of Word Order Variation . . . . .</b>	<b>303</b>
A.1 Overview of the Basic Railroad System . . . . .	303
A.2 Incremental Language Production Based on Navigation . . . . .	307
A.3 Realizing Alternative Word Orders from One-Place Propositions . . . . .	310
A.4 Realizing Basic SO Word Orders from Two-Place Propositions . . . . .	312
A.5 Realizing OS Word Orders from Alternative Navigations . . . . .	316
A.6 Realizing Basic Word Orders from Three-Place Propositions . . . . .	318
<b>B. Declarative Description of the Motor Procedure . . . . .</b>	<b>321</b>
B.1 Start State Application . . . . .	321
B.2 Matching between Proplet Patterns and Language Proplets . . . . .	324
B.3 Time-Linear Breadth-First Derivation Order . . . . .	326
B.4 Rule Application and the Basic Structure of the LA-Hear Motor . . . . .	327
B.5 Operations . . . . .	330
B.6 Basic Structure of the LA-Think and the LA-Think-Speak Motor . . . . .	332
<b>C. Glossary . . . . .</b>	<b>335</b>
C.1 Proplet Attributes . . . . .	335
C.2 Proplet Values . . . . .	335
C.3 Variables, Restrictions, and Agreement Conditions . . . . .	337
C.4 Abstract Surfaces . . . . .	339
C.5 Rule Names . . . . .	339
C.6 List of Analyzed Examples . . . . .	341
<b>Bibliography . . . . .</b>	<b>347</b>
<b>Name Index . . . . .</b>	<b>357</b>
<b>Subject Index . . . . .</b>	<b>361</b>

A Computational Model of Natural Language  
Communication  
Interpretation, Inference, and Production in Database  
Semantics

Hausser, R.R.

2006, XII, 365 p., Hardcover

ISBN: 978-3-540-35476-5
